Rethinking International Organizations Dennis Dijkzeul,Yves Beigbeder,2003-08-01 The management of international organizations is attracting growing attention Most of this attention is highly critical of both the UN system and International NGOs Sometimes this criticism lacks depth or reflects insufficient understanding of these organizations or is based on narrow and sometimes biased internal political concerns of a particular country International relations theory has insufficiently studied the type of linkages that these organizations provide between international decision making and Northern fundraising on the one hand and practical action in the South on the other As a result current theory too rarely focuses on the inner functioning of these organizations and is unable to explain the deficiencies and negative outcomes of

their work While the authors identify and describe the pathologies of international organizations in for example international diplomacy fundraising and implementation they also stress positive elements such as their intermediary role The latter in particular could form the basis of more efficient and effective policies in addition to other recent trends also described in this volume that hold hope for a stronger functioning of these organizations in the future This book presents a long overdue empirical and theoretical overview of criticism on and cures for these organizations It provides a fundamental rethinking of current approaches to the management of international organizations

Interpreting TRIPS Hiroko Yamane,2011-03-21 Protection of intellectual property rights IPRs has become a global issue The Trade Related Aspects of Intellectual Property TRIPS Agreement outlines the minimum standards for IPR protection for WTO members and offers a

global regime for IPR protection However the benefits of TRIPS are more questionable in poorer countries where national infrastructure for research and development R D and social protection are inadequate whereas the cost of innovation is high Today after more than a decade of intense debate over global IPR protection the problems remain acute although there is also evidence of progress and cooperation This book examines various views of the role of IPRs as incentives for innovation against the backdrop of development and the transfer of technology between globalised knowledge based high technology economies The book retraces the origins content and interpretations of the TRIPS Agreement including its interpretations by WTO dispute settlement organs It also analyses sources of controversy over IPRs examining pharmaceutical industry strategies of emerging countries with different IPR policies The continuing international debate over IPRs is examined in depth as are TRIPS rules and the controversy about implementing the flexibilities of the Agreement in the light of national policy objectives The author concludes that for governments in developing countries as well as for their business and scientific communities a great deal depends on domestic policy objectives and their implementation IPR protection should be supporting domestic policies for innovation and investment This in turn requires a re casting of the debate about TRIPS to place cooperation in global and efficient R D at the heart of concerns over IPR protection

Sugar Policy and Reform Donald F. Larson, Brent Borrell, 2001 Interventions in sugar markets come about for many reasons Often the consequences of these policies persist even when the circumstances that motivated them change Or the underlying problems that motivated past interventions remain even when it s clear that current approaches have failed Reform of sugar markets needs to go beyond eliminating failed policies and find lasting solutions

Governing Global Trade Theodore H. Cohn, 2017-05-15 Cohn s topic of global trade is of enormous and proliferating interest He provides a good background from 1945 to the present and on core contemporary themes such as civil society participation and the domesticisation of the trade agenda Whilst there is a wealth of literature on policy oriented aspects such as negotiating rounds there are few that provide the careful comprehensive historical overview that this work offers and none that do so with reference to international institutions such as the G7 Quad OECD and UNCTAD as well as the WTO in global trade governance This seminal work has been awarded the British Columbia Political Science Association Weller Prize for 2003 Cohn s political science background will appeal directly to a university audience and a broader public policy market It is also suitable for those interested in trade in the cognates of economics and law This work s theoretical framework embraces and synthesises the major approaches in the field of international relations and will be appropriate for the dominant schools of realists and liberal institutionalists alike It could therefore be apt for courses on international relations theory or international political economy taught in a theoretical mode This book reinforces and broadens the focus of all previous works in The G8 and Global Governance series
