The Unnamable Archipelago: Wounds of the Postcolonial in Postwar Japanese Literature and Thought Dennitza Gabrakova, 2018-05-01 In *The Unnamable Archipelago: Wounds of the Postcolonial in Postwar Japanese Literature and Thought* Dennitza Gabrakova discusses how the island imagery in the works by Imafuku Ryūta, Ukai Satoshi, Minako Ariyoshi, Sawako Hino, Keizukezawa Natsuki, Shimada Masahiko and Tawada Yoko shapes a critical understanding of Japan on multiple intersections of trauma and sovereignty. The book attempts an engagement with the vocabulary of postcolonial critique while attending to the complexity of its translation into Japanese.

The Metabolist Imagination William O. Gardner, 2020-04-14 Japan's postwar urban imagination through the Metabolism architecture movement and visionary science fiction authors. The devastation of the Second World War gave rise to imaginations both utopian and apocalyptic. In Japan, a fascinating confluence of architects and science fiction writers took advantage of this space to begin remaking urban design. In *The Metabolist Imagination*, William O. Gardner explores the unique Metabolism movement which allied with science fiction authors to foresee the global cities that would emerge in the postwar era. This first comparative study of postwar Japanese architecture and science fiction builds on the resurgence of interest in Metabolist architecture while establishing new directions for exploration. Gardner focuses on how these innovators created unique versions of shared concepts including futurity, megastructures, capsules, and cybercities, making lasting contributions that resonate with contemporary conversations around cyberpunk, climate change, anime, and more. *The Metabolist Imagination* features original documentation of collaborations between giants of postwar Japanese art and architecture such as the landmark 1970 Osaka Expo. It also provides the most sustained English language discussion to date of the work of Komatsu Sakyō, considered one of the big three authors of postwar Japanese science fiction. These studies are underscored by Gardner's insightful approach treating architecture as a form of speculative fiction while positioning science fiction as an intervention into urban design, making it a necessary read for today's visionaries.

Fifty Key Writers on Photography Mark Durden, 2013-02-15 A clear and concise survey of some of the most significant writers on photography who have played a major part in defining and influencing our understanding of the medium. It provides a succinct overview of writing on photography from a diverse range of disciplines and perspectives and examines the shifting perception of the medium over the course of its 170-year history. Key writers discussed include Roland Barthes, Susan Sontag, Jacques Derrida, Henri Cartier-Bresson, Geoffrey Batchen. Fully cross-referenced and in an A-Z format, this is an accessible and engaging introductory guide.

Photography and Ontology Donna West Brett, Natalya Lusty, 2018-09-03 This edited collection explores the complex ways in which photography is used and interpreted as a record of evidence, as a form of communication, as a means of social and political provocation, as a mode of surveillance, as a narrative of the self, and as an art form. What makes photographic images unsettling and how do the re-uses and interpretations of photographic images

unsettle the self evident reality of the visual field Taking up these themes this book examines the role of photography as a revelatory medium underscored by its complex association with history memory experience and identity Cartographies of the Absolute Alberto Toscano, Jeff Kinkle, 2015-02-27 Can capital be seen Cartographies of the Absolute surveys the disparate answers to this question offered by artists film makers writers and theorists over the past few decades It zones in on the crises of representation that have accompanied the enduring crisis of capitalism foregrounding the production of new visions and artefacts that wrestle with the vastness invisibility and complexity of the abstractions that rule our lives

Photography and Doubt Sabine T. Kriebel, Andrés Mario Zervigón, 2016-11-25 Recent decades have seen photography's privileged relationship to the real come under question Spurred by the postmodern critique of photography in the 1980s and the rise of digital technologies soon thereafter scholars have been asking who and what built this understanding of the medium in the first place Photography and Doubt reflects on this interest in photography's referential power by discussing it in rigorously historical terms How was the understanding of photographic realism cultivated in the first place What do cases of staged and manipulated photography reveal about that realism's hold on audiences across the medium's history Have doubts about photography's testimonial power stimulated as much knowledge as its realism Edited by Sabine T Kriebel and Andrés Mario Zervigón Photography and Doubt is the first multi authored collection specifically designed to explore these questions Its 13 original essays illustrated with 73 color images explore cases when the link between the photographic image and its referent was placed under stress and when photography was as attuned to its myth making capabilities as to its claims to authenticity Photography and Doubt will serve as a valuable resource for students and scholars in art history visual and media studies philosophy and the history of science and technology Tsuchi Bert Winther-Tamaki, 2022-05-31 An examination of Japanese contemporary art through the lens of ecocriticism and environmental history Collectively referred to by the word *tsuchi* earthy materials such as soil and clay are prolific in Japanese contemporary art Highlighting works of photography ceramics and installation art Bert Winther Tamaki explores the many aesthetic manifestations of *tsuchi* and their connection to the country's turbulent environmental history investigating how Japanese artists have continually sought a passionate and redemptive engagement with earth In the seven decades following 1955 Japan has experienced severe environmental degradation as a result of natural disasters industrial pollution and nuclear irradiation Artists have responded to these ongoing catastrophes through modes of mudlarking and muckracking utilizing raw elements from nature to establish deeper contact with the primal resources of their world and expose its unfettered contamination Providing a comparative assessment of more than seventy works of art this study reveals Japanese artists' engagement with a richly diverse repertoire of earthy materialities elucidating their aesthetic properties changing conditions and cultural significance By focusing on the role of *tsuchi* as a convergence point for a wide range of creative practices this book offers a critical reassessment of contemporary art in Japan and its intrinsic relationship to the environment Situating art within the context of ecology and

urbanization Tsuchi shows artists striving to explore and reprocess raw forms of earth beneath the corruptions of human activity

Reimagining Hiroshima and Nagasaki N.A.J. Taylor, Robert Jacobs, 2017-09-14 This edited volume reconsiders the importance of the attacks on Hiroshima and Nagasaki from a post Cold War perspective It has been argued that during the Cold War era scholarship was limited by the anxiety that authors felt about the possibility of a global thermonuclear war and the role their scholarship could play in obstructing such an event The new scholarship of Nuclear Humanities approaches this history and its fallout with both more nuanced and integrative inquiries paving the way towards a deeper integration of these seminal events beyond issues of policy and ethics This volume therefore offers a distinctly post Cold War perspective on the nuclear attacks on Hiroshima and Nagasaki The chapters collected here address the memorialization and commemoration of Hiroshima and Nagasaki by officials and states but also ordinary people's resentment suffering or forgiveness The volume presents a variety of approaches with contributions from academics and contributions from authors who are strongly connected to the cities of Hiroshima and Nagasaki and its people In addition the work branches out beyond the traditional subjects of social sciences and humanities to include contributions on art photography and design This variety of approaches and perspectives provides moral and political insights on the full range of vulnerabilities such as emotional bodily cognitive and ecological that pertains to nuclear harm This book will be of much interest to students of critical war studies nuclear weapons World War II history Asian History and International Relations in general
