TV started working on a future plan for Iceland consisting for example of roads connecting Iceland's settlements across the Central Highlands. He also started an overlay mapping project mapping both the hazard and resource areas of the country which created a basis for his Iceland Plan proposals. Work on this he continued at Berkeley and at the University of Iceland as he started teaching there in 1988. Many of his articles and books deal with this subject. In 1980 Valsson started his PhD studies in Environmental Planning at UC Berkeley California. In the philosophical section of his dissertation he presented his argument that the Western mechanistic worldview was the underlying cause for today's alienation and that more holistic and integrative schemes were inherent in Eastern worldviews. TV's dissertation is called *A Theory of Integration for Design and Planning Based on the Concept of Complementarity* 1987. In 1988 a year after Valsson returned to Iceland he got an associate professor position in planning at the Engineering Faculty of the University of Iceland and later a tenured professor position. The last part of this book describes Valsson's 27 years at the University. The title of this present book *Shaping the Future Ideas Planning Design* reflects how wide Valsson's field of his operation has been.
