Sex And The Brain:

Sex on the Brain Deborah Blum, 1998-07-01 Go beyond the headlines and the hype to get the newest findings in the burgeoning field of gender studies Drawing on disciplines that include evolutionary science anthropology animal behavior neuroscience psychology and endocrinology Deborah Blum explores matters ranging from the link between immunology and sex to male female gossip styles The results are intriguing startling and often very amusing For instance did you know that Male testosterone levels drop in happy marriages scientists speculate that women may use monogamy to control male behavior Young female children who are in day care are apt to be more secure than those kept at home young male children less so Anthropologists classify Western societies as mildly polygamous The Los Angeles Times has called *Sex on the Brain* superbly crafted science writing graced by unusual compassion wit and intelligence that forms an important addition to the literature of gender studies *Sex and the Brain* Gillian Einstein, 2007-10-19 A collection of foundational texts on the nature and behavioral consequences of sex differences in the brain allowing readers to follow the development of a rapidly growing but contentious field and giving them the tools to analyze emerging scientific findings from many perspectives This collection of foundational papers on sex differences in the brain traces the development of a much invoked fast growing young field at the intersection of brain and behavior The reader is introduced to the meaning and nature of sexual dimorphisms the mechanisms and consequences of steroid hormone action and the impact of the field on interpretations of sexuality and gender Building on each other in point counterpoint fashion the papers tell a fascinating story of an emerging science working out its core assumptions Experimental and theoretical papers woven together by editor s introductions open a window onto knowledge in the making and a vigorous debate between reductionist and pluralist interpreters Five major sections include papers on conceptual and methodological background central nervous system dimorphisms mechanisms for creating dimorphisms dimorphisms and cognition and dimorphisms and identity Each section builds from basic concepts to early experiments from experimental models to humans and from molecules to mind Papers by such leading scholars as Arthur Arnold Frank Beach Anne Fausto Sterling Patricia Goldman Rakic Doreen Kimura Simon LeVay Bruce McEwen Michael Merzenich Bertram O Malley Geoffrey Raisman and Dick Swaab illustrate a rich blend of perspectives approaches methods and findings *Sex and the Brain* will show students how a scientific paper can be analyzed from many perspectives and supply them with critical tools for judging a rapidly emerging science in a contentious area **The Scientific American Book of Love, Sex and the Brain** Judith Horstman, Scientific American, 2011-11-15 Who do we love Who loves us And why Is love really a mystery or can neuroscience offer some answers to these age old questions In her third enthralling book about the brain Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love from the bonding of parent and child to the passion of erotic love the affectionate love of companionship the role of animals in our lives and the love of God Drawing on the latest neuroscience she explores why

and how we are born to love how we're hardwired to crave the companionship of others and how very badly things can go without love Among the findings parental love makes our brain bigger sex and orgasm make it healthier social isolation makes it miserable and although the craving for romantic love can be described as an addiction friendship may actually be the most important loving relationship of your life Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines The Scientific American Book of Love Sex and the Brain offers a fascinating look at how the brain controls our loving relationships most intimate moments and our deep and basic need for connection
