Nature Knows No Color-Line J. A. Rogers, 2012-01-01 The classic refutation of scientific racism from the renowned African American journalist and author of *Africa's Gift to America* In *Nature Knows No Color Line* originally published in 1952 historian Joel Augustus Rogers examines the origins of racial hierarchy and the color problem Rogers was a humanist who believed that there were no scientifically evident racial divisions all humans belong to one race He believed that color prejudice generally evolved from issues of domination and power between two physiologically different groups According to Rogers color prejudice was then used a rationale for domination subjugation and warfare Societies developed myths and prejudices in order to pursue their own interests at the expense of other groups This book argues that many instances of the contributions of black people had been left out of the history books and gives many examples Most contemporary college students have never heard of J A Rogers nor are they aware of his long journalistic career and pioneering archival research Rogers committed his life to fighting against racism and he had a major influence on black print culture through his attempts to improve race relations in the United States and challenge white supremacist tracts aimed at disparaging the history and contributions of people of African descent to world civilizations Thabiti Asukile Black International Journalism Archival Research and Black Print Culture *The Journal of African American History* **We the Black Jews** Yosef

Research into the negro ancestry in the white race. (Third edition.). Joel Augustus ROGERS, 1970 **Nature Knows No Color-line** J. A. Rogers, 1952-04 In *Nature Knows No Color Line* originally published in 1952 historian Joel Augustus Rogers examines the origins of racial hierarchy and the color problem Rogers was a humanist who believed that there were no scientifically evident racial divisions all humans belong to one race He believed that color prejudice generally evolved from issues of domination and power between two physiologically different groups According to Rogers color prejudice was then used a rationale for domination subjugation and warfare Societies developed myths and prejudices in order to pursue their own interests at the expense of other groups This book argues that many instances of the contributions of black people had been left out of the history books and gives many examples *Nature Knows No Color-line* James Grafton Rogers, Eden in Sumer on the Niger Catherine Obianuju Acholonu, 2014-01-06 EDEN IN SUMER ON THE NIGER provides archeological linguistic genetic and inscribed evidence of the West African origin of mankind language religion and civilization It provides multidisciplinary evidence of the actual geographical location in West Africa of the Garden of Eden Atlantis and the original homeland of the Sumerian people before their migration to the Middle East By translating hitherto unknown pre cuneiform inscriptions of the Sumerians Catherine Acholonu and Sidney Davis have uncovered thousands of years of Africa's lost pre history and evidences of the

scenes helped turn Blount into Sun Ra Chicago Reader Sun Ra 1914-93 was one of the most wildly prolific and unfailingly eccentric figures in the history of music. Renowned for extravagant performances in which his Arkestra appeared in neo-Egyptian garb, the keyboardist and bandleader also espoused an interstellar cosmology that claimed the planet Saturn as his true home. In *Sun Ra's Chicago*, William Sites brings this visionary musician back to earth, specifically to the city's South Side, where from 1946 to 1961 he lived and relaunched his career. The postwar South Side was a hotbed of unorthodox religious and cultural activism. Afrocentric philosophies flourished, storefront prophets sold dream book bibles, and Elijah Muhammad was building the Nation of Islam. It was also an unruly musical crossroads where the man then known as Sonny Blount drew from an array of intellectual and musical sources, from radical nationalism, revisionist Christianity, and science fiction to jazz, blues, Latin dance music, and pop exotica, to construct a philosophy and performance style that imagined a new identity and future for African Americans. *Sun Ra's Chicago* shows that late twentieth-century Afrofuturism emerged from a deep utopian engagement with the city and that, by excavating the postwar black experience of Sun Ra's South Side milieu, we can come to see the possibilities of urban life in new ways. Four stars. Sites makes the engaging argument that the idiosyncratic jazz legend's penchant for interplanetary journeys and African American utopia was in fact inspired by urban life right on Earth. Spectrum Culture. *Natural* Alan Levinovitz, 2020-04-07

*Illuminates the far-reaching harms of believing that natural means good, from misinformation about health choices to justifications for sexism, racism, and flawed economic policies. People love what's natural: it's the best way to eat, the best way to parent, even the best way to act naturally, just as nature intended. Appeals to the wisdom of nature are among the most powerful arguments in the history of human thought. Yet Nature, with a capital N, and natural goodness are not objective or scientific. In this groundbreaking book, scholar of religion Alan Levinovitz demonstrates that these beliefs are actually religious and highlights the many dangers of substituting simple myths for complicated realities. It may not seem like a problem when it comes to paying a premium for organic food. But what about condemnations of unnatural sexual activity? The guilt that attends not having a natural birth? Economic deregulation justified by the inherent goodness of natural markets? In *Natural*, readers embark on an epic journey from Peruvian rainforests to the backcountry in Yellowstone Park, from a natural bodybuilding competition to a natural cancer-curing clinic. The result is an essential new perspective that shatters faith in Nature's goodness and points to a better alternative. We can love nature without worshipping it, and we can work toward a better world with humility and dialogue rather than taboos and zealotry.*

The Color Line: A Brief in Behalf of the Unborn William Benjamin Smith, 2019-12-10. In *The Color Line: A Brief*

What Comes Naturally Peggy Pascoe, 2009 A long awaited history that promises to dramatically change our understanding of race in America *What Comes Naturally* traces the origins spread and demise of miscegenation laws in the United States laws that banned interracial marriage and sex most often between whites and members of other races Peggy Pascoe demonstrates how these laws were enacted and applied not just in the South but throughout most of the country in the West the North and the Midwest Beginning in the Reconstruction era when the term miscegenation first was coined she traces the creation of a racial hierarchy that bolstered white supremacy and banned the marriage of Whites to Chinese Japanese Filipinos and American Indians as well as the marriage of Whites to Blacks She ends not simply with the landmark 1967 case of *Loving v Virginia* in which the Supreme Court finally struck down miscegenation laws throughout the country but looks at the implications of ideas of colorblindness that replaced them *What Comes Naturally* is both accessible to the general reader and informative to the specialist a rare feat for an original work of history based on archival research
