Resumen. This paper explores democratic planning in its various forms and conflicts as an attempt to suggest possible ways to exercise it in today's contemporary context. Democracy can be an ambiguous term, characterized by equity or equality or both. This ambiguity can also be found on the scope of its implementation. The main disagreement among scholars advocating for "democratic planning", is whether democracy should be inherent in the decision-making process or in the outcomes which are product of that process. This work articulately distinguishes planners, like Paul Davidoff, who emphasize process from others, like Hounchell, who emphasize outcomes and notes the strengths and shortcomings of both. It uses three case studies, which bring up real examples of many of the dilemmas of practical democratic planning, as part of the analysis that will lead to solid conclusions on how to exercise democratic planning in a contemporary metropolis characterized by diversity, difference and the growing presence of minorities.

Palabras clave. Democracy, equity, decision-making, diversity.

Abstract. El texto explora la planificación democrática en sus diversas formas y conflictos como un intento de sugerir posibles formas de ejercerla en el contexto contemporáneo. Democracia puede ser un concepto ambiguo, caracterizado por la equidad, la igualdad o ambos. Esta ambigüedad puede encontrarse también en el horizonte de su implementación. El principal desacuerdo entre los académicos que defienden la "planificación democrática" es si la democracia debería ser inherente al proceso de toma de decisiones o a los resultados a los que da lugar dicho proceso. Este trabajo distingue de manera articulada entre varios planificadores, tal como Paul Davidoff, quien destaca los resultados y aspectos fortalezas/débiles, así como los pasos que se encuentran en ambos. Utiliza tres estudios de caso que ofrecen ejemplos concretos de muchos de los dilemas de la práctica de la planificación democrática como parte de un análisis que conducirá a conclusiones sólidas sobre cómo ejercerla en las metrópolis contemporáneas, caracterizadas por la diversidad, la diferencia y la presencia creciente de las minorías.

Keywords. Democracy, equity, decision-making, diversity.

Introduction

–What can democracy mean in relation to planning?–

The Indian Amartya Sen (Nobel in Economic Sciences) has argued the basic principle of democracy is the ability of citizens to guide public policy's direction. Beyond political representation and respect for the rule of the majority, it implies protection of rights and freedom of all individuals, access to social benefits, and right to access information and to participate actively in collective deliberation. On the same line as Cornelius Castoriadis and his classical distinction between democracy as regime and democracy as procedure, Charles Lindblom (1977) gives another interesting definition of democracy. He quotes Robert A. Dahl (1971): *"The key characteristic of a democracy is the continuing responsiveness of the government to the preferences of its citizens"* (Lindblom, 1977, p. 250). All of these authors emphasize the need of societies to legitimize their laws and to explain why they should be morally fair and right.

This essay explores democratic planning in its various forms and conflicts as an attempt to suggest possible ways to exercise it in today's contemporary context. I will use the term 'democracy' to refer to a particular way of group decision-making or deliberation in planning

ensure that their work sustains and nurtures social diversity Urban Structure Matters Petter Naess,2006-09-27 Going beyond previous investigations into urban land use and travel Petter Naess presents new research from Denmark on residential location and travel to show how and why urban spatial structures affect people's travel behaviour In a comprehensive case study of the Copenhagen metropolitan area Naess combines traditional quantitative travel surveys with qualitative interviews in order to identify the more detailed mechanisms through which urban structure affects travel behaviour The case study findings are compared with those from other Nordic countries and analyzed and evaluated in the light of relevant theory and literature to provide solid valuable conclusions for planning sustainable urban development With a broader range of statistics than previous studies and conclusions of international relevance *Urban Structure Matters* provides well grounded conclusions for how spatial planning of urban areas can be used to reduce car dependence and achieve a more sustainable development of cities *Transcultural Cities* Jeffrey Hou,2013-02-11 *Transcultural Cities* uses a framework of transcultural placemaking cross disciplinary inquiry and transnational focus to examine a collection of case studies around the world presented by a multidisciplinary group of scholars and activists in architecture urban planning urban studies art environmental psychology geography political science and social work The book addresses the intercultural exchanges as well as the cultural transformation that takes place in urban spaces In doing so it views cultures not in isolation from each other in today's diverse urban environments but as mutually influenced constituted and transformed In cities and regions around the globe migrations of people have continued to shape the makeup and making of neighborhoods districts and communities For instance in North America new immigrants have revitalized many of the decaying urban landscapes creating renewed cultural ambiance and economic networks that transcend borders In Richmond BC Canada an Asian night market has become a major cultural event that draws visitors throughout the region and across the US and Canadian border Across the Pacific foreign domestic workers in Hong Kong transform the deserted office district in Central on weekends into a carnivalesque site While contributing to the multicultural vibes in cities migration and movements have also resulted in tensions competition and clashes of cultures between different ethnic communities old timers newcomers employees and employers individuals and institutions In *Transcultural Cities* Jeffrey Hou and a cross disciplinary team of authors argue for a more critical and open approach that sees today's cities urban places and placemaking as vehicles for cross cultural understanding *Religion and Urbanism* Yamini Narayanan,2015-11-19 Conceptions of sustainable cities in the pluralistic and multireligious urban settlements of developing nations need to develop out of local cultural religious and historical contexts to be inclusive and accurately respond to the needs of the poor ethnic and religious minorities and women *Religion and Urbanism* contributes to an expanded understanding of sustainable cities in South Asia by demonstrating the multiple and often conflicting ways in which religion enables or challenges socially equitable and ecologically sustainable urbanisation in the region In particular this collection focuses on two aspects that must inform the sustainable cities

discourse in South Asia the intersections of religion and urban heritage and religion and various aspects of informality This book makes a much needed contribution to the nexus between religion and urban planning for researchers postgraduate students and policy makers in Sustainable Development Development Studies Urban Studies Religious Studies Asian Studies Heritage Studies and Urban and Religious Geography

Leading the inclusive city Hambleton, Robin, 2014-11-24 Cities are often seen as helpless victims in a global flow of events and many view growing inequality in cities as inevitable This engaging book rejects this gloomy prognosis and argues that imaginative place based leadership can enable citizens to shape the urban future in accordance with progressive values advancing social justice promoting care for the environment and bolstering community empowerment This international and comparative book written by an experienced author shows how inspirational civic leaders are making a major difference in cities across the world The analysis provides practical lessons for local leaders and a significant contribution to thinking on public service innovation for anyone who wants to change urban society for the better

Design for Social Diversity Emily Talen, Sungduck Lee, 2018-03-13 The most successful urban communities are very often those that are the most diverse in terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities This new edition addresses the physical requirements of socially diverse neighborhoods Using the city of Chicago and its surrounding suburban areas as a case study the authors investigate whether social diversity is related to particular patterns and structures found within the urban built environment Design for Social Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity
