Platone E La Tradizione Platonica:

Platone e la tradizione platonica Mauro Bonazzi, Franco Trabattoni, 2003 **Platonism and Forms of Intelligence** John Dillon, Marie-Elise Zovko, 2012-10-31 The volume contains a collection of papers presented at the International Symposium which took place in Hvar Croatia in 2006 In recent years there has been an upsurge of interest in the study of Plato Platonism and Neoplatonism Taking the position that it is of vital importance to establish an ongoing dialogue among scientists artists academics theologians and philosophers concerning pressing issues of common interest to humankind this collection of papers endeavours to bridge the gap between contemporary research in Platonist philosophy and other fields where insights gained from the study of Plato and Platonist philosophy can be of consequence and benefit Authors Werner Beierwaltes Luc Brisson Amber Carpenter John Dillon Jonathan Doner Franco Ferrari Francesco Fronterotta F A J de Haas Aaron Hughes Byron Kaldis Daniel Kolak Thomas Leinkauf Dionysis Mentzeniotis Jean Marc Narbonne Giannis Stamatellos Vladimir Stoupel Patrick Quinn Jure Zovko and Marie lize Zovko *Physics and Philosophy of Nature in Greek Neoplatonism* Riccardo Chiaradonna, Franco Trabattoni, 2009-03-25 Traditional scholarship has generally neglected the philosophy of nature in Greek Neoplatonism In the last few decades however this attitude has changed radically Natural philosophy has increasingly been regarded as a crucial aspect of late antique thought Furthermore several studies have outlined the impressive historical legacy of Neoplatonic physics Building on this new interest the ten papers published here concentrate on Neoplatonic philosophy of nature from Plotinus to Simplicius and on its main conceptual features and its relation to the previous philosophical and scientific traditions The papers were presented at a conference sponsored by the European Science Foundation in Castelveccchio Pascoli in June 2006 This volume makes an important contribution to the understanding of Greek Neoplatonism and its historical significance **The New Cambridge Companion to Plotinus** Lloyd Gerson, James Wilberding, 2022-06-02 Plotinus stands at a crossroads in ancient philosophy between the more than 600 years of philosophy that came before him and the new Platonic tradition He was the first and perhaps the greatest systematizer of Plato's thought and all later students of Plato in the following centuries approached Plato through him This Companion from a new generation of ancient philosophy scholars reflects the current state of research on Plotinus with chapters on topics including mathematics fate and determinism happiness the theory of forms categories of reality matter and evil and Plotinus legacy The volume offers an accessible overview of the thought of one of the pivotal figures in the history of philosophy and reveals his importance as a thinker whose impact goes far beyond his importance as an interpreter of Plato *New Essays on Ancient Pyrrhonism* Diego E. Machuca, 2011-07-12 Scholarship on ancient Pyrrhonism has made tremendous advances over the past three decades thanks especially to the careful reexamination of Sextus Empiricus extant corpus Building on this momentum the authors of the eight essays collected here examine some of the most vexed and intriguing exegetical and philosophical questions posed by Sextus presentation of this form of skepticism The essays explore in a new light the

skeptical interpretation of Plato the differences between Pyrrhonism and Cyrenaicism the Pyrrhonist's stance on ordinary life religion language and ethics Sextus' discussion of our access to our own mental states and the relationship between Pyrrhonism and epistemic internalism and externalism These new essays represent a substantial contribution to the advancement of scholarship on Pyrrhonian skepticism Essays on Plato's Epistemology Franco Trabattoni, 2016-03-21 An Innovating approach to Plato's philosophy Through a careful survey of several significant Platonic texts mainly focussing on the nature of knowledge Essays on Plato's Epistemology offers the reader a fresh and promising approach to Plato's philosophy as a whole From the very earliest reception of Plato's philosophy there has been a conflict between a dogmatic and a sceptical interpretation of his work and thought Moreover the two sides are often associated respectively with a metaphysical and an anti metaphysical approach This book continuing a line of thought that is nowadays strongly present in the secondary literature and also followed by the author in over thirty years of research maintains that a third way of thinking is required Against the widespread view that an anti dogmatic philosophy must go together with an anti metaphysical stance Trabattoni shows that for Plato on the contrary a sober and reasonable assessment of both the powers and limits of human reason relies on a proper metaphysical outlook **Framing the Dialogues: How to Read Openings and Closures in Plato**, 2020-12-07 **Framing the Dialogues: How to Read Openings and Closures in Plato** is a collection of 14 chapters with an Introduction that focuses on the intricate and multifarious ways in which Plato frames his dialogues Its main aim is to explore both the association between inner and outer framework and how this relationship contributes to and sheds light upon the framed dialogues and their philosophical content All contributors to the volume advocate the significance of closures and especially openings in Plato arguing that platonic frames should not be treated merely as trimmings or decorative literary devices but as an integral part of the central philosophical discourse The volume will prove to be an invaluable companion to all those interested in Plato as well as in classical literature in general Ancient Greek Dialectic and Its Reception Melina G. Mouzala, 2023-09-05 The volume focusses on ancient Greek dialectic and its impact on later philosophical thought up to Byzantium The contributions are written by distinguished scholars in their respective fields of study and shed light on the relation of ancient Greek dialectic to various aspects of human life and soul to self knowledge and self consciousness to science rhetoric and political theory **The Development of Dialectic from Plato to Aristotle** Jakob Leth Fink, 2012-11-01 The period from Plato's birth to Aristotle's death 427-322 BC is one of the most influential and formative in the history of Western philosophy The developments of logic metaphysics epistemology ethics and science in this period have been investigated controversies have arisen and many new theories have been produced But this is the first book to give detailed scholarly attention to the development of dialectic during this decisive period It includes chapters on topics such as dialectic as interpersonal debate between a questioner and a respondent dialectic and the dialogue form dialectical methodology the dialectical context of certain forms of arguments the role of the respondent in guaranteeing good argument

dialectic and presentation of knowledge the interrelations between written dialogues and spoken dialectic and definition induction and refutation from Plato to Aristotle The book contributes to the history of philosophy and also to the contemporary debate about what philosophy is *Reassessing Homer in the Platonic Tradition* Christina-Panagiota Manolea, François Renaud, Harold Tarrant, 2025-05-19 Plato's famous and infamous criticism of Homer was the climax of a series of attacks by early thinkers on the first and greatest Greek poet Homer It triggers an even longer series of responses attempting either to justify further the old quarrel between philosophy poetry Pl Resp 607b c or in most cases to reconcile the two great authors The so called Plato Homer problem is in broad outline twofold with numberless ramifications and sub issues Why does Plato's Republic repeatedly attack and even exile the greatest cultural authority of the Greeks And why does he do so while quoting Homer abundantly more than any other author and even adapting many artistic features of Homeric poetry This volume concentrates on the various responses to the controversy among Platonically minded writers while including a few other reactions from just outside that circle Strategies of reconciliation are many including both allegorical and non allegorical approaches involving the notions of myth mimesis inspiration wisdom theology etc The volume presents original treatments of major figures such as Porphyry and Proclus as well lesser known authors or texts e g Platonic Spuria and non Platonists Xenophon Aristotle scholiasts etc who serve as enlightening comparative figures While recent literature on these questions usually concentrates on single authors this book details its reception in the Platonic tradition overall ,

The Cambridge Companion to Plutarch Frances B. Titchener, Alexei V. Zadorojnyi, 2023-07-13 Engaging introduction by leading scholars to the many aspects of Plutarch's numerous and varied works and their subsequent reception *World Soul - Anima Mundi* Christoph Helmig, 2020-01-20 From Plato's Timaeus onwards the world or cosmos has been conceived of as a living rational organism Most notably in German Idealism philosophers still talked of a Weltseele Schelling or Weltgeist Hegel This volume is the first collection of essays on the origin of the notion of the world soul anima mundi in Antiquity and beyond It contains 14 original contributions by specialists in the field of ancient philosophy the Platonic tradition and the history of theology The topics range from the obscure Presocratic Heraclitus to Plato and his ancient readers in Middle and Neoplatonism including the Stoics to the reception of the idea of a world soul in the history of natural science A general introduction highlights the fundamental steps in the development of the Platonic notion throughout late Antiquity and early Christian philosophy Accessible to Classicists historians of philosophy theologians and invaluable to specialists in ancient philosophy the book provides an overview of the fascinating discussions surrounding a conception that had a long lasting effect on the history of Western thought Ontology in Early Neoplatonism Riccardo Chiaradonna, 2023-08-07 Neoplatonists from Plotinus onward incorporate Aristotle's logic and ontology into their philosophies this process is of both intrinsic and historical interest and paves the way for subsequent philosophical debates in the Middle Ages and beyond The ten essays collected in this book focus on the readings of Aristotle by Plotinus Porphyry and Iamblichus in the 3rd and 4th centuries

Their discussions cover key issues in the history of logic and metaphysics such as substance hylomorphism causation existence and predication Among the topics tackled in this volume are Plotinus criticism of Aristotle's physical essentialism which is a major chapter in the history of metaphysics and the interpretation of Porphyry's *Isagoge* one of the most influential and enigmatic works in the history of philosophy Further essays focus on the readings of Aristotle's categories developed by Porphyry and Iamblichus which raise interesting questions at the intersection of logic and ontology and on the integration of Aristotle's ontology into Neoplatonist accounts of being and existence *Thabit ibn Qurra* Roshdi Rashed, 2009-12-15 Thabit ibn Qurra 826-901 was one of history's most original thinkers and displayed expertise in the most difficult disciplines of this time geometry number theory and astronomy as well as ontology physics and metaphysics Approximately a dozen of this shorter mathematical and philosophical writings are collected in this volume Critically edited with accompanying commentary these writings show how Thabit Ibn Qurra developed and reconceived the intellectual inheritance of ancient Greece in all areas of knowledge **New Perspectives on Late Antiquity** David Hernández de la Fuente, 2011-01-18 Perhaps it is fully justified to think of Late Antiquity 3rd-7th centuries as the first Renaissance of the Classical World This period can be considered a fundamental landmark for the transmission of the Classical Legacy and the transition between the ancient and the medieval individual During Late Antiquity the Classical Education or *enkyklios paideia* of Hellenism was linked definitively to the Judeo-Christian and Germanic elements that have modelled the Western World The present volume combines diverse interests and methodologies with a single purpose unity and diversity as a Neo-Platonic motto providing an overall picture of the new means of researching Late Antiquity This collective endeavour stemming from the 2009 1st International Congress on Late Antiquity in Segovia Spain focuses not only on the analysis of new materials and latest findings but rather puts together different perspectives offering a scientific update and a dialogue between several disciplines *New Perspectives on Late Antiquity* contains two main sections 1 Ancient History and Archaeology and 2 Philosophy and Classical Studies including both overview papers and case studies Among the contributors to this volume are some of the most relevant scholars in their fields including P. Brown J. Alvar P. Barcel C. Codoer F. Fronterotta D. Gigli F. Lisi and R. Sanz *The Systemic Turn in Human and Natural Sciences* Lucia Urbani Ulivi, 2018-12-14 This book is dedicated to the consolidation and to the expansion of theoretic systems thinking as a necessary integration of the general reductionist and analytical attitude dominant in our culture Reductionism and analytical approaches have produced significant results in many fields of contemporary knowledge giving a great contribution to relevant scientific discoveries and to their technological application but their validity has been improperly universalized as the only and best methods of knowledge in every domain It is nowadays clear that analytical or mereological approaches are inadequate to solve many problems and that we should introduce or support the diffusion of new concepts and different research attitudes A good candidate to support such a shift is the well-known theoretical approach based on the concept of system that no more considers the

elementary constituents of an object but the entity emerging from the relations and interactions among its elementary parts. It becomes possible to reconstruct several domains both philosophical and scientific from the systemic point of view introducing fresh ideas in the research in view of a general rational vision of the world on more comprehensive basis. This book contributes to the diffusion and evolution of systemic thinking by focusing on two main objectives: developing and updating the systemic approach in disciplines currently using it and introducing the systemic perspective in humanistic disciplines where the approach is not widely used. *The Systemic Turn in Human and Natural Sciences* A Rock in the Pond is comprised of ten chapters. The chapter authors adopt a trans disciplinary perspective consisting in the recognition and harmonization of the special outlooks that together within the general systemic paradigm gives an ideal unity to the book.

Plato's "Sophist" Revisited Beatriz Bossi, Thomas M. Robinson, 2013-03-22 This book consists of a selection of papers which throw new light on old problems in one of Plato's most difficult dialogues. The papers included fall into three broad categories: a) those dealing directly with the ostensible aim of the dialogue, the various definitions of a sophist from different perspectives; T. Robinson, F. Casades, J. Monserrat, P. Sandoval, A. Bernabé, M. Narcy and K. Dorter; b) a number which tackle a specific question brought up in the dialogue and that is how Plato relates to Heraclitus and to Parmenides in the matter of his understanding of being and non being; E. H. Szabo, O. Brien, B. Bossi, P. Mesquita and N. Cordero; and c) those discussing various other broad issues brought to the fore in the dialogue such as the greatest kinds, true and false statement, difference and mimesis; F. Fronterotta, J. de Garay, D. Ambuel and L. Palumbo. The variety of schools and backgrounds of the authors makes this book unique as a tool for the appreciation of the different approaches possible to well known hermeneutical problems.

Aristotelianism in the First Century BCE Andrea Falcon, 2011-12-15 This book is a full study of the remaining evidence for Xenarchus of Seleucia, one of the earliest interpreters of Aristotle. Andrea Falcon places the evidence in its context: the revival of interest in Aristotle's philosophy that took place in the first century BCE. Xenarchus is often presented as a rebel challenging Aristotle and the Aristotelian tradition. Falcon argues that there is more to Xenarchus and his philosophical activity than an opposition to Aristotle: he was a creative philosopher and his views are best understood as an attempt to revise and update Aristotle's philosophy. By looking at how Xenarchus negotiated different aspects of Aristotle's philosophy, this book highlights elements of rupture as well as strands of continuity within the Aristotelian tradition. **From Athens to Chartres** Édouard Jeuneau, Haijo Jan Westra, 1992 The intellectual history of the Middle Ages involves many earlier traditions and developments from them but just as many completely new lines of thought. The influence of Classical Antiquity is always present in the continuation and adaptation of late antique forms of education and intellectual training but also in the works of the Latin Church Fathers and of the major ancient philosophers whose works were passed down and built upon in the Middle Ages. From the 12th century onwards Arabic-Islamic learning, which bore the clear stamp of Greek philosophy and science, became known in Latin-speaking Europe and was a catalyst for many new developments. In keeping with the

educational system of the period theology and philosophy the latter being seen as a universal science were the main vehicles of intellectual life In logic ethics and natural philosophy as well as in scientific theology medieval scholars attained standards which in some cases have not even been equalled today *Studien und Texte zur Geistesgeschichte des Mittelalters* aims to address itself to this cultural plurality with a correspondingly broad publication programme It is open to specialist research into the influence of Classical philosophy to text editions to monographs on the history of various intellectual problems to examinations of hitherto undiscovered or undervalued contributions by medieval thinkers to the development of thought Conceived as an homage for Edouard Jauneau maitre par excellence the volume is introduced by a reconstruction of the Creation on the North portal of Chartres Cathedral followed by a section on the transmission of significant texts such as Plato's *Timaeus* through the manuscript tradition The chapter on later Greek philosophy contains studies on Plotinus and Augustine Proclus and Pseudo Dionysius A separate section interprets the thought of Johannes Scottus Eriugena whose connections with earlier authors and influence on medieval neoplatonists constitutes a leitmotiv throughout the volume The twelfth century is represented by articles on Gilbert of Poitiers on matter Adelard of Bath Honorius of Autun Abelard's ethics and theology monastic asceticism Hildegard of Bingen's allegories allegorical zoology Alan of Lille's anthropology the role of the Muses and the Hermetic Asclepius The particular usefulness of this study is its presentation of neoplatonic thought in its historical unfolding from Antiquity to the Later Middle Ages through a wide range of disciplines focused on specific ideas and metaphors
