Pricing and Cost Recovery in Long Distance Transport David Starkie,M.R. Grenning,M.M. Starrs,2012-12-06 The 1977 BTE Report on Cost Recovery in Australian Transport 1974 75 provided estimates of the aggregate level of financial cost recovery in the various modes by broad transport task It suggested that there were substantial differences between modes in the level of cost recovery The 1979 Transport Pricing and Cost Recovery seminar concluded that economic efficiency objectives required more attention in transport pricing and investment decisions than had been apparent in the past The principles for economically efficient pricing were spelt out and several specific issues were identified which are worth following up in this seminar These include reconciliation of financial and economic efficiency objectives and the identification of appropriate revenue targets specification of the changes in accounting and management information systems which would be required to implement more economically rational pricing and identification of the principles for estimating compensation for public service obligations Finally a brief account is given of recent BTE work on cost recovery in general aviation and in road and rail transport BTE has suggested that economic efficiency considerations would require substantial modification to the present means of collecting revenue from general aviation with more reliance placed on direct pricing measures like flight specific air navigation charges and airport movement charges On road rail competition an order of magnitude comparison of road and rail cost recovery in the Adelaide Victorian border corridor suggests that only the road mode approximately covers short run avoidable costs and that both modes fail to cover long run avoidable costs

Australian Transport Literature Information System ,1986 *Cost Recovery* Richard B. Lanza,2009-08-11 Cost Recovery Turning Your Accounts Payable Department into a Profit Center shows how to identify a company's hidden financial assets It

provides tools to assist organizations generate cash recoveries stop profit leaks move away from control issues and work towards process improvements The book shows how to incorporate profit recovery technology and how to pair a company with a recovery expert best suited to the company s needs to achieve bottom line results The book discusses how to utilize free services offered by cost recovery consultants using of top money saving proves improvements and how to create a plan to maximize recovering technology *The Economics of Long-Distance Transportation* P. Khachaturov,1983-02-10 **ECMT Round Tables Estimation and Evaluation of Transport Costs** European Conference of Ministers of Transport,2007-09-14 This roundtable examines how regulators can best gather and interpret information used to evaluate transport costs *Efficient Transport for Europe Policies for the Internalisation of External Costs* European Conference of Ministers of Transport,1998-07-17 This report summarises the theoretical and practical dimensions to internalisation reviews recent estimates of external costs explores the mix of policies that might be used to promote internalisation successfully and estimates the size of incentives required in monetary terms OECD Environmental Performance Reviews: Israel 2011 OECD,2011-11-08 This 2011 review of Israel s environmental conditions and policies evaluates progress in sustainable development improving natural resource management integrating environmental and economic policies and strengthening international co operation *National Transportation Planning* Adib Kanafani,Daniel Sperling,2012-12-06 Soon after starting work on the development of a methodology for national transportation planning in Venezuela we realized the importance of an integrated management process for such an effort We also realized the absence in the literature of specific guidelines on how to manage and conduct a transportation planning effort The literature on the subject of national transportation planning is predominantly theoretical and technical in nature To a large extent the absence of literature on management and broad based methodological approaches reflects the limited and ad hoc nature of the experience in national transportation planning This book is an attempt to fill that gap The main objective of the book is to show one way by which a methodology for national transportation planning can be integrated into a process management framework It reports on the experience that the authors had in the Venezuelan case as well as in earlier national planning efforts The book is not intended as a theoretical discussion of planning Instead it adopts a particular theoretical stand and proceeds on that basis to develop a program for applying a specific methodology The intention is to leave as much of the details and elaborations of that methodology to the user This is motivated by two considerations The first is a pragmatic attempt to limit the scope of the book Measuring the Marginal Social Cost of Transport Christopher Nash,Bryan Matthews,2005-10-20 Many transport economists have for some time proposed marginal social cost as the principle on which prices in the transport sector should be based and in recent years their prescription has come to be taken more and more seriously by policy makers However in order to properly test the possible implications of implementing pricing based on marginal social cost and ultimately to introduce such a system it is necessary to actually measure the marginal social costs

concerned and how they vary according to mode time and context This book reviews the transport pricing policy debate and reports on the significant advances made in measuring the marginal social costs of transport particularly through UNITE and other European research projects We look in turn at infrastructure operating costs user costs both of congestion and of charges in frequency of scheduled transport services accidents and environmental costs and how these estimates have been used to examine the impact of marginal cost pricing in transport We finish by examining how the results of case studies might be generalised to obtain estimates of marginal social costs for all circumstances and finally presenting our conclusions

Review of Road Cost Recovery D. P. Luck,1988 *Out of Water* Colin Chartres,Samyuktha Varma,2010-07-14 From cities to biofuels competition for water is accelerating Climate change threatens to intensify the onset and severity of the water crisis in several regions of the developing world this is already happening throughout much of Asia the Mediterranean southwestern Australia and the southwestern US Along with water shortages unsafe water becomes an increasingly widespread problem too As water crises trigger food and health crises billions may slip further into poverty leading to greater social and political unrest new wars and worsening national security Out of Water doesn t just illuminate the coming global water crisis it presents innovative solutions in agriculture engineering governance and beyond including state of the art techniques for integrated water management This book will help raise the level of debate about water to the highest levels of government and identify workable reforms and incentives to help water users utilize this crucial resource far more efficiently **Africa's Transport Infrastructure** Heinrich Bofinger,2011-01-01 This book will be of interest to governments in the region and to multilateral and bilateral aid and lending agencies as well as to graduate students faculty and researchers in African studies and transport studies Book Jacket **Australian Transport** Australia.
