## **Semilexical Categories The Function Of Content Words And The Content Of Function Words:**

**Semi-lexical Categories** Norbert Corver, Henk van Riemsdijk, 2013-05-22 The distinction between functional categories and lexical categories is at the heart of present day grammatical theory in theories on language acquisition code switching and aphasia At the same time it has become clear however that there are many lexical items for which it is less easy to decide whether they side with the lexical categories or the functional ones This book deals with the grammatical behavior of such in between categories which are referred to here as semi lexical categories **Light Verb Constructions as Complex Verbs**

Anna Pompei, Lunella Mereu, Valentina Piunno, 2023-10-24 The notion of light verb constructions has been traditionally related to the insignificance of the verb which is described as a grammatical item only codifying TAM system and features whereas the whole predicative content is thought to be conveyed by the noun This book deals with the light verb constructions as instances of complex verbs intended as multi predicational but monoclausal structures This allows to deepen the actual verb lightness the effective noun predicativity as well as their effect on the cohesion of the construction The papers in this volume reflect on the concrete contribution of noun and verb to the event and argument structure and on the relevance of semantically different noun classes for the verb selection From different theoretical approaches data of a great variety of languages are investigated such as Indo European languages both modern Germanic Slavic Romance and Iranian languages and ancient Latin and Ancient Greek but also Mandarin Chinese and different polysynthetic languages e g Ket Nivkh Murrinh Patha Kiowa Biniñ Gun wok Ainu The range of topics languages and perspectives presented in this book make it of great interest to both theoretical and applied linguists *Categorial Features* Phoevos Panagiotidis, 2015

Proposes a novel theory of parts of speech bringing together the latest research and discoveries **The Acehnese**

**Language and Society: Language and Linguistics** Maya Saffhida, dkk, 2022-10-27 Indonesia is a pluralistic nation consisting of various ethnic groups throughout the country Each tribe has its own language to communicate both among ethnic and inter ethnic groups Language has an important role as a means of communication for humans to convey their intentions and ideas and express themselves in interactions in society The Acehnese language is one of the regional languages in Aceh Province one of the provinces out of 37 provinces in Indonesia This language is one of the languages with the largest number of speakers in the province It dominates in the acquisition of the language of the people in Aceh However until now few people know about the fundamentals of the Acehnese language Structurally the Acehnese language has many unique features One of its uniqueness is the phonological aspect or the sound of the language The Acehnese language has a higher number of phonemes when compared to other regional languages in Aceh even Indonesian Another of its uniqueness for example is in the aspect of vocabulary and how some word differences are seen in the varieties of Acehnese spoken throughout the province country and even those speakers who reside in other countries There are also many social factors in Acehnese society that affect the meaning of a particular word or phrase in this language Therefore we had invited

researchers and practitioners to contribute to writing the book *The Acehese Language and Society* as part of the Universitas Syiah Kuala Press Book Series Language and Linguistics      Semantics and Beyond Piotr Stalmaszczyk, 2014-08-27 Papers in the collection concentrate on different issues relevant for contemporary research within semantics such as the linguistic and philosophical status of representations reference theory and indexicals situation semantics formal semantics normativity of meaning and speech acts and different approaches to context and contextualism The authors investigate the links between semantics and syntax and between semantics pragmatics and speech act theory and demonstrate that it is possible to integrate findings from different disciplines Recent studies often advocate a pragmatic turn in the study of meaning and context however the papers in the volume show that semantics and meaning remain in the center of research carried out within contemporary linguistics and philosophy especially the philosophy of language The volume includes contributions by Brian Ball St Anne s College Oxford John Collins University of East Anglia Luis Fern ndez Moreno Complutense University of Madrid Chris Fox University of Essex Filip Kawczy ski University of Warsaw Katarzyna Kijania Placek Jagiellonian University Joanna Klimczyk Polish Academy of Sciences Paul Livingston University of New Mexico Mark Pinder University of Bristol Ernesto Perini Santos Universidade Federal de Minas Gerais Tabea Reiner Ludwig Maximilians Universit t Munich Stefan Riegelnik University of Zurich Arthur Sullivan Memorial University of Newfoundland Massimiliano Vignolo University of Genoa and Mari n Zouhar Slovak Academy of Sciences The volume should be of interest to linguists philosophers of language and philosophers in general      **Verb-Verb Complexes in Asian Languages** Taro Kageyama, Peter E. Hook, Prashant Pardeshi, 2021-02-20 This volume is the first to present a detailed survey of the systems of verb verb complexes in Asian languages from both a synchronic and diachronic perspective Many Asian languages share to a greater or lesser extent a unique class of compound verbs consisting of a main verb and a quasi auxiliary verb known as a vector or explicator These quasi auxiliary verbs exhibit unique grammatical behaviour that suggests that they have an intermediate status between full lexical verbs and wholly reduced auxiliaries They are also semantically unique in that when they are combined with main verbs they can convey a rich variety of functional meanings beyond the traditional notions of tense aspect and modality such as manner and intensity of action benefaction for speaker or hearer and polite or derogatory styles in speech In this book leading specialists in a range of Asian languages offer an in depth analysis of the long standing questions relating to the diachrony and geographical distribution of verb verb complexes The findings have implications for the general understanding of the grammaticalization of verb categories complex predicate formation aktionsart and event semantics the morphology syntax semantics interface areal linguistics and typology      Language Change at the Syntax-Semantics Interface Chiara Gianollo, Agnes Jäger, Doris Penka, 2014-12-12 Bringing together diachronic research from a variety of perspectives notably typology formal syntax and semantics this volume focuses on the interplay of syntactic and semantic factors in language change an issue so far largely neglected both in mostly lexical historical semantics as well as

historical syntax but recently brought into focus by grammaticalization theory as well as Minimalist diachronic syntax The contributions draw on data from numerous Indo European languages including Vedic Sanskrit Middle Indic Greek as well as English and German and discuss a range of phenomena such as change in negation markers indefinite articles quantifiers modal verbs argument structure among others The papers analyze diachronic evidence in the light of contemporary syntactic and semantic theory addressing the crucial question of how syntactic and semantic change are linked and whether both are governed by similar constraints principles and systematic mechanisms The volume will appeal to scholars in historical linguistics and formal theories of syntax and semantics

**Significance in Language** Jim Feist, 2022-01-19 This book offers a unique perspective on meaning in language broadening the scope of existing understanding of meaning by introducing a comprehensive and cohesive account of meaning that draws on a wide range of linguistic approaches The volume seeks to build up a complete picture of what meaning is different types of meaning and different ways of structuring the same meaning across myriad forms and varieties of language across such domains such as everyday speech advertising humour and academic writing Supported by data from psycholinguistic and neurolinguistic research the book combines different approaches from scholarship in semantics including formalist structuralist cognitive functionalist and semiotics to demonstrate the ways in which meaning is expressed in words but also in word order and intonation The book argues for a revised conceptualisation of meaning toward presenting a new perspective on semantics and its wider study in language and linguistic research This book will appeal to scholars interested in meaning in language in such fields as linguistics semantics and semiotics The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Linguistic Universals and Language Variation** Peter Siemund, 2011-06-30 The volume explores the relationship between linguistic universals and language variation Its contributions identify the recurrent patterns and principles behind the complex spectrum of observable variation The volume bridges the gap between cross linguistic variation regional variation diachronic variation contact induced variation as well as socially conditioned variation Moreover it addresses fundamental methodological and theoretical issues of variation research The volume brings together internationally renowned specialists of their fields while at the same time offering a platform for gifted and highly talented young researchers The authors come from different theoretical backgrounds and through their work illustrate a rich array of scientific methods All authors share a strong belief in empirically founded theoretical work The contributions span a high number of languages and dialects from many parts of the world They are extremely broad in their empirical coverage addressing an impressive selection of grammatical domains

›**Prometheus Bound**‹ - **A Separate Authorial Trace in the Aeschylean Corpus** Nikos Manousakis, 2020-06-08 Classics Computer Science and Linguistics are brought together in this book in an attempt to provide an answer to the authorship question concerning Prometheus Bound a disputed play in the Aeschylean corpus by applying some well

established Computer Stylistics methods One of the main objectives of Stylometry which broadly speaking is the study of quantified style is Authorship Attribution In its traditional form it can range from manually calculating descriptive statistics to the use of computer assisted methodologies However non traditional Authorship Attribution drastically changed the field It brought together modern Linguistics and Artificial Intelligence applications machine learning natural language processing and its key characteristic is that it aims at developing fully automated systems for the attribution of texts of unknown authorship In this book the author employs a series of supervised and unsupervised techniques used in non traditional Authorship Attribution applied here for the first time in ancient drama The outcome of the analysis indicates a significant distance between the disputed text and the secure plays of Aeschylus but also various interesting micro linguistic ties of affinity with other authors especially Sophocles and Euripides

**Syntactic Development, Its Input and Output** Anat

Ninio, 2011-03-03 This important new book places the syntactic learning process under close scrutiny Its focus is on the characteristics of linguistic input and the resultant output which it suggests do not follow the orderly uniform processes assumed by some versions of formalistic linguistic theory

**Italian Dialectology at the Interfaces** Silvio Cruschina, Adam

Ledgeway, Eva-Maria Remberger, 2019-02-15 Recent years have seen a growing interest in linguistic phenomena whose formal manifestation and underlying licensing conditions represent the convergence of two or more areas of the grammar an area of investigation particularly invigorated in recent generative research by developments such as phase theory of Chomsky 2001 2008 and the cartographic enterprise of Rizzi 1997 Cinque 1999 In this respect the dialects of Italy are no exception in that they present comparative Romance linguists and theoretical linguists alike with many valuable opportunities to study the linguistic interfaces as highlighted by the many case studies presented in this volume which provide a series of original insights into how different components of the linguistic system syntactic phonetic phonological morphological semantic and pragmatic do not necessarily operate in isolation but rather interact to license phenomena whose nature and distribution can only be fully understood in terms of the formal mapping between the interfaces

**Language Contact and the Development of Modern Hebrew**, 2015-11-16 Language Contact and the Development of Modern Hebrew is a first rigorous attempt by scholars of Hebrew to evaluate the syntactic impact of the various languages with which Modern Hebrew was in contact during its formative years Twenty four different innovative syntactic constructions of Modern Hebrew are analysed and shown to originate in previous stages of Hebrew which since the third century CE solely functioned as a scholarly and liturgical language The syntactic changes in the constructions are traced to the native languages of the first Modern Hebrew learners and later to further reanalysis by the first generation of native speakers The contents of this volume was also published as a special double issue of Journal of Jewish Languages 3 1 2 2015 Contributors are Vera Agranovsky Chanan Ariel Elitzur Bar Asher Siegal Miri Bar Ziv Isaac Bleaman Nora Boneh Edit Doron Keren Dubnov Itamar Francez Roey Gafter Ophira Gamliel Yehudit Henshke Uri Horesh Olga Kagan Samir Khalaily Irit Meir

Valentina Vapnarsky, Edy Veneziano, 2017-10-15 This book presents a collection of chapters on the nature flexibility and acquisition of lexical categories These long debated issues are looked at anew by exploring the hypothesis of lexical polycategoriality according to which lexical forms are not fully or univocally specified for lexical category in a wide number of unrelated languages and within different theoretical and methodological perspectives Twenty languages are thoroughly analyzed Apart from French Arabic and Hebrew the volume includes mostly understudied languages spoken in New Guinea Australia New Caledonia Amazonia Meso and North America Resulting from a long standing collaboration between leading international experts this book brings under one cover new data analyses and results on word categories from the linguistic and acquisitional point of view It will be of the utmost interest to researchers teachers and graduate students in different fields of linguistics morpho syntax semantics typology language acquisition as well as psycholinguistics cognition and anthropology      'COME' and 'GO' off the Beaten Grammaticalization Path Maud Devos, Jenneke van der Wal, 2014-05-08 This

edition brings together some lesser known grammaticalization paths travelled by come and go in familiar and less familiar languages No single book volume has been dedicated to the topic of grammatical targets different from tense and aspect so far This study will increase our insight in grammaticalization processes in general as they force us to rethink certain aspects of grammaticalization      *Giving Gifts and doing Favours* Victoria Beatrix Fendel, 2025-06-12 Support verb constructions like to make a suggestion or to take heart are verbal multi word expressions They are lexically morphosyntactically semantically and pragmatically versatile and thus form an integral enriching and natural part of the classical Greek lexicon grammar Taking heart does not involve barbarism and taking a picture does not involve theft yet how does one know that for a corpus language like classical literary Attic Greek This book embraces the diversity of this internally heterogenous group of constructions which sit at three interfaces      **EXPLORING LINGUISTIC LANDSCAPES. **Avram and Andrei Avram** Anca SEVCENCO, Irina STOICA, Ioana STOICESCU, Mihaela TĂNASE-DOGARU, Alina TIGĂU, Veronica TOMESCU, 2025-01-01 The present volume honors the successful and productive scientific activity of Larisa Avram and Andrei Avram Colleagues and collaborators from universities in Romania and around the world contributed with papers that span various domains of research theoretical and experimental syntax and phonology semantics and pragmatics

*Selected Lexical and Grammatical Issues in the Meaning-text Theory* Leo Wanner, Igor? Aleksandrovi? Mel??uk, 2007-01-01 The Meaning Text Theory MTT is a lexicon centred and dependency based theory for the description of language using a holistic model that incorporates semantics syntax morphology and lexis This volume prepared on the occasion of Igor Mel cuk s 70th birthday offers a cross section of the current advances in MTT and its applications The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics sound symbolism as

manifested by ideophones and idiosyncratic lexical relations as manifested by lexical functions LFs In particular LFs are addressed from different angles including the introduction of new standard LFs the argument structure and semantic decomposition of lexical relations captured by LFs automatic recognition of LF instances in corpora and the use of LFs in terminology and natural language processing The second part of the book deals with such prominent model oriented issues as semantic paraphrasing in MTT the role of phrase structure in MTT and syntactic analysis within MTT

*A Grammar of Ngardi* Thomas Ennever, 2021-11-08 Ngardi is a highly endangered language with fewer than 10 remaining speakers and is no longer being acquired by children Despite the limited circulation of a draft dictionary Cataldi 2011 there has been no published reference grammar of this language Upon publication this work will constitute the most comprehensive grammar of any Ngumpin Yapa language The Ngardi language exhibits many of the same typologically interesting features first identified in the related language Warlpiri namely phenomena of non configurational syntax and null anaphora This grammar also brings to light a number of unique properties which will be of interest to linguistic typologists and formal theorists The registration of arguments both through case marking on free NPs as well as in pronominal enclitics is similar to Warlpiri but differs in its detail particularly in the ability to register various non core cases e g locative and allative as arguments in the pronominal complex Within the verbal system Ngardi is notable for a large number of verbal inflections 20 which mark various distinctions in tense aspect and mood as well as associated motion and speaker centric directionality Ngardi exhibits a highly articulated system of complex predication covering both complex verb and serial verb constructions Other typologically interesting aspects of the language include the presence of dedicated apprehensional constructions and interesting interactions between negation and clausal modality The descriptive value of this grammar is enhanced by its sustained regional comparison of the linguistic features of Ngardi with those of neighbouring Ngumpin Yapa and Western Desert languages This grammar and a forthcoming dictionary of Ngardi will be of great significance to both those few remaining Ngardi speakers as well as the next generation of Ngardi people for whom accessible published materials will be an invaluable resource

Translanguaging as Everyday Practice Gerardo Mazzaferro, 2018-10-04 This volume offers empirically grounded perspectives on translanguaging as a locally situated interactional accomplishment of practical action and its significance within different domains of social life school education diasporic families and communities workplaces urban linguistic landscapes advertising practices and mental health centres focusing on case studies from different countries and continents The 14 chapters contribute to the understanding of translanguaging as a communicative and discursive practice which is relationally constructed and strategically deployed by individuals during everyday encounters with language and cultural diversity The contributions testify to translanguaging as an interdisciplinary and critical research paradigm by assembling scholars working on translanguaging from different perspectives and a wide range of social cultural and geographical contexts This volume contributes to the further development of new theoretical and analytical tools for the

investigation of translanguaging as everyday practice and how and why language practices are constructed negotiated opposed or subverted by social actors
