Concurrency 88 Friedrich H. Vogt, 1988-10-12 This volume contains the proceedings of CONCURRENCY 88 an international conference on formal methods for distributed systems held October 18 19 1988 in Hamburg CONCURRENCY 88 responded to great interest in the field of formal methods as a means of mastering the complexity of distributed systems In addition the impulse was determined by the fact that the various methodological approaches such as constructive or property oriented methods have not had an extensive comparative analysis nor have they been investigated with respect to their possible integration and their practical implications The following topics were addressed Specification Languages Models for Distributed Systems Verification and Validation Knowledge Based Protocol Modeling Fault Tolerance Distributed Databases The volume contains 12 invited papers and 14 contributions selected by the program committee They were presented by authors from Austria the Federal Republic of Germany France Israel Italy the Netherlands the United Kingdom and the United States

Mathematical Models for the Semantics of Parallelism Marisa Venturini Zilli, 1987-10-07 The papers collected in this volume are most of the material presented at the Advanced School on Mathematical Models for the Semantics of Parallelism held in Rome September 24 October 1 1986 The need for a comprehensive and clear presentation of the several semantical approaches to parallelism motivated the stress on mathematical models by means of which comparisons among different approaches can also be performed in a perspicuous way

Mathematical Foundations of Programming Semantics Stephen Brookes, 1994-05-20 This volume is the proceedings of the Ninth International Conference on the Mathematical Foundations of Programming Semantics held in New Orleans in April 1993 The focus of the conference series is the semantics of programming languages and the mathematics which supports the study of the semantics The semantics is basically denotation The mathematics may be classified as category theory lattice theory or logic Recent conferences and workshops have increasingly emphasized applications of the semantics and mathematics The study of the semantics develops with the mathematics and the mathematics is inspired by the applications in semantics The volume presents current research in denotational semantics and applications of category theory logic and lattice theory to semantics

Advances in Petri Nets 1991 Helmut Plünnecke, Wolfgang Reisig, 1991 The main idea behind the series of volumes Advances in Petri Nets is to present to the general computer science community recent results which are the most representative and significant for the development of the area The papers for the volumes are drawn mainly from the annual International Conferences on Applications and Theory of Petri Nets Selected papers from the latest conference are independently refereed and revised and extended as necessary Some further papers submitted directly to the editor are included Advances in Petri Nets 1991 covers the 11th International Conference on Applications and Theory of Petri Nets held
