Joel C. Willemssen, 2001-04 The Year 2000 Y2K challenge was a major test of the nation's ability to protect our computer systems and the critical operations and infrastructures they support The government successfully met the Y2K challenge However major mgmt challenges remain in areas such as computer security and critical infrastructure protection This report 1 identifies lessons the federal government has learned from Y2K applicable to improving federal information technology IT mgmt 2 identifies lessons that individual agencies can apply to mgmt of future IT initiatives and 3 discusses how the momentum generated by the government's Y2K efforts can be sustained Report on the Year 2000 Computer Problem, 1998 **Year 2000 computing challenge : lessons learned can be applied to other management challenges :**

**report to the Chairman, Subcommittee on Government Management, Information and Technology, Committee on Government Reform, House of Representatives ,** Abstractions and Embodiments Janet Abbate, Stephanie

Dick, 2022-08-30 Cutting edge historians explore ideas communities and technologies around modern computing to explore how computers mediate social relations Computers have been framed both as a mirror for the human mind and as an irreducible other that humanness is defined against depending on different historical definitions of humanness They can serve both liberation and control because some people's freedom has historically been predicated on controlling others Historians of computing return again and again to these contradictions as they often reveal deeper structures Using twin frameworks of abstraction and embodiment a reformulation of the old mind body dichotomy this anthology examines how social relations are enacted in and through computing The authors examining Abstraction revisit central concepts in computing including algorithm program clone and risk In doing so they demonstrate how the meanings of these terms reflect power relations and social identities The section on Embodiments focuses on sensory aspects of using computers as well as the ways in which gender race and other identities have shaped the opportunities and embodied experiences of computer workers and users Offering a rich and diverse set of studies in new areas the book explores such disparate themes as disability the influence of the punk movement working mothers as technical innovators and gaming behind the Iron Curtain Abstractions and Embodiments reimagines computing history by questioning canonical interpretations foregrounding new

actors and contexts and highlighting neglected aspects of computing as an embodied experience It makes the profound case that both technology and the body are culturally shaped and that there can be no clear distinction between social intellectual and technical aspects of computing Contributors Janet Abbate Marc Aidinoff Troy Kaighin Astarte Ekaterina Babinsteva Andr Brock Maarten Bullynck Jiahui Chan Gerardo Con Diaz Liesbeth De Mol Stephanie Dick Kelcey Gibbons Elyse Graham Michael J Halvorson Mar Hicks Scott Kushner Xiaochang Li Zachary Loeb Lisa Nakamura Tiffany Nichols Laine Nooney Elizabeth Petrick Cierra Robson Hallam Stevens Jaroslav velch

**Managing Crises Overseas** Scott Alan Ast, 2016-09-19

The book examines crisis management for operations located outside of a corporation's normal confines particularly in regions which might be overtly threatening or hostile to multinational corporations and their people and assets overseas Outlining proper operating procedures planning implementation and drills it demonstrates how proper planning and effective management systems in place prior to a crisis can mean the difference between life and death The book helps organizations establish best practices in crisis management to ensure safety and security of personnel assets and properties overseas even in potentially volatile environments
