**Hardwired: How Our Instincts to Be Healthy are Making Us Sick** Robert S. Barrett,Louis Hugo Francescutti,2020-10-30 For the first time in a thousand years Americans are experiencing a reversal in lifespan Despite living in one of the safest and most secure eras in human history one in five adults suffers from anxiety as does one third of adolescents Nearly half of the US population is overweight or obese and one third of Americans suffer from chronic pain the highest level in the world In the United States fatalities due to prescription pain medications now surpass those of heroin and cocaine combined and each year 10% of all students on American college campuses contemplate suicide With the proliferation of social media and the algorithms for social sharing that prey upon our emotional brains inaccurate or

misleading health articles and videos now move faster through social media networks than do reputable ones This book is about modern health or lack of it The authors make two key arguments that our deteriorating wellness is rapidly becoming a health emergency and two that much of these trends are rooted in the way our highly evolved hardwired brains and bodies deal with modern social change The co authors a PhD from the world of social science and an MD from the world of medicine combine forces to bring this emerging human crisis to light Densely packed with fascinating facts and little told stories the authors weave together real life cases that describe how our ancient evolutionary drives are propelling us toward ill health and disease Over the course of seven chapters the authors unlock the mysteries of our top health vices why hospitals are more dangerous than warzones our addiction to sugar salt and stress our emotionally driven brains our relentless pursuit of happiness our sleepless society our understanding of risk and finally how world history can be a valuable tutor Through these varied themes the authors illustrate how our social lives are more of a determinant of health outcome than at any other time in our history and to truly understand our plight we need to recognize when our decisions and behavior are being directed by our survival seeking hardwired brains and bodies

**Consumer Behavior** John C. Mowen,1987 **Australian Geographic** ,2006 **Introduction to Psychology** Patricia M. Wallace,1990 During the 1980s war in El Salvador Radio Venceremos was the main news outlet for the Frente Farabundo Mart para la Liberaci n Nacional FMLN the guerrilla organization that challenged the government The broadcast provided a vital link between combatants in the mountains and the outside world as well as an alternative to mainstream media reporting In this first person account Santiago the legend behind Radio Venceremos tells the story of the early years of that conflict a rebellion of poor peasants against the Salvadoran government and its benefactor the United States Originally published as La Terquedad del Izote this memoir also addresses the broader story of a nationwide rebellion and its international context particularly the intensifying Cold War and heavy U S involvement in it under President Reagan By the war s end in 1992 more than 75 000 were dead and 350 000 wounded in a country the size of Massachusetts Although outnumbered and outfinanced the rebels fought the Salvadoran Army to a draw and brought enough bargaining power to the negotiating table to achieve some of their key objectives including democratic reforms and an overhaul of the security forces Broadcasting the Civil War in El Salvador is a riveting account from the rebels point of view that lends immediacy to the Salvadoran conflict It should appeal to all who are interested in historic memory and human rights U S policy toward Central America and the role the media can play in wartime

*The 3M Model of Motivation and Personality* John C. Mowen,2013-03-14 Integrating control theory evolutionary psychology and a hierarchical approach to personality this book presents a new approach to motivation personality and consumer behavior Called the 3M which stands for Meta theoretic Model of Motivation this theory seeks to account for how personality traits interact with the situation to influence consumer attitudes and actions The book proposes that multiple personality traits combine to form a motivational network that acts to influence behavior Mowen argues that in order to understand the causes of enduring

behavioral tendencies one must identify the more abstract traits underlying surface behaviors In constructing the 3M model the author reports data from fifteen empirical studies employing over 3500 respondents In this hierarchical model four types of personality traits are identified elemental compound situational and surface traits Eight elemental traits are proposed as forming the underlying dimensions of personality Consistent with control theory the research reveals that the elemental traits combine to form compound traits such as self efficacy task orientation playfulness and competitiveness These elemental and compound traits combine with situational influences to cause enduring behavioral tendencies within general situational contexts Examples of situational traits investigated include impulsive buying value consciousness sports interest and health motivation In the 3M model the elemental compound and situational traits combine to yield surface traits which are enduring dispositions to act in specific behavioral contexts Five surface traits are empirically investigated in the book compulsive buying sports participation healthy diet lifestyles proneness to bargaining and a tendency to frugality Across these five studies the empirical results reveal that the 3M model accounts for over 44% of the variance in the surface trait measures By presenting a new meta theory of motivation and personality that is testable Mowen s 3M model accounts for high levels of variance in consumer behavior By integrating the work of selected past and current theorists into a comprehensible whole the 3M model provides coherence in a field currently dominated by conflicting ideas theories and approaches The book provides evidence that by understanding the individual dispositions that underlie consumer behavior public policy officials and marketing specialists can develop better communication programs to influence and persuade their target audiences The book shows how to employ the 3M model to segment the marketplace provide psychographic inventories position brands create promotional themes and develop brand personalities
