The Puzzle of Perceptual Justification Harmen Ghijsen, 2016-04-22 This book provides an accessible and up to date discussion of contemporary theories of perceptual justification that each highlight different factors related to perception i.e. conscious experience higher order beliefs and reliable processes The book's discussion starts from the viewpoint that perception is not only one of our fundamental sources of knowledge and justification but also plays this role for many less sophisticated animals It proposes a scientifically informed reliabilist theory which can accommodate this fact without denying that some of our epistemic abilities as human perceivers are special This allows it to combine many of our intuitions about the importance of conscious experience and higher order belief with the controversial thesis that perceptual justification is fundamentally non-evidential in character

Sensation, Perception and Action Johannes Zanker, 2010-03-02 With a style that is both detailed and accessible this new text from Johannes Zanker provides students with a solid understanding of how our sensory and perceptual systems operate and interact with a dynamic world It not only explains the scientific mechanisms involved but discusses the costs and benefits of these mechanisms within an evolutionary functional framework to encourage important questions such as What is a given sensory mechanism needed for What kind of problem can it solve and what are its limitations How does the environment determine how senses operate How does action affect and facilitate perception This unique interdisciplinary framework allows students to see perceiving and acting as embedded in particular environments and directs them to think about the functional nature of these systems The overall effect is an especially readable authoritative text on Sensation Perception and Action that really brings this fascinating topic to life

Descartes and the Puzzle of Sensory Representation Raffaella De Rosa, 2010-01-07 While much has been written on Descartes' theory of mind and ideas no systematic study of his theory of sensory representation and misrepresentation is currently available in the literature Descartes and the Puzzle of Sensory Misrepresentation is an ambitious attempt to fill this gap It argues against the established view that Cartesian sensations are mere qualia by defending the view that they are representational it offers a descriptivist causal account of their representationality that is

critical of and differs from all other extant accounts such as for example causal teleofunctional and purely internalist accounts and it has the advantage of providing an adequate solution to the problem of sensory misrepresentation within Descartes internalist theory of ideas In sum the book offers a novel account of the representationality of Cartesian sensations provides a panoramic overview and critical assessment of the scholarly literature on this issue and places Descartes theory of sensation in the central position it deserves among the philosophical and scientific investigations of the workings of the human mind

Who Are You, Really? Joshua Rasmussen, 2023-03-21 What does it mean to be human Philosopher Joshua Rasmussen offers a step by step examination into the fundamental nature and ultimate origin of persons Using accessible language and clear logic he argues that understanding what it means to be a person sheds light not only on our own nature but also on the existence of the one who gave us life

After Certainty Robert Pasnau, 2017 No part of philosophy is as disconnected from its history as is epistemology After Certainty offers a reconstruction of that history understood as a series of changing expectations about the cognitive ideal that beings such as us might hope to achieve in a world such as this The story begins with Aristotle and then looks at how his epistemic program was developed through later antiquity and into the Middle Ages before being dramatically reformulated in the seventeenth century In watching these debates unfold over the centuries one sees why epistemology has traditionally been embedded within a much larger sphere of concerns about human nature and the reality of the world we live in It ultimately becomes clear why epistemology today has become a much narrower and specialized field concerned with the conditions under which it is true to say that someone knows something Based on a series of lectures given at Oxford University Robert Pasnau's book ranges widely over the history of philosophy and examines in some detail the rise of science as an autonomous discipline Ultimately Pasnau argues that we may have no good reasons to suppose ourselves capable of achieving even the most minimal standards for knowledge and the final chapter concludes with a discussion of faith and hope

The Living Age, 1877 *The Problem with Pleasure* Laura Frost, 2013-07-09 Aldous Huxley decried the horrors of modern pleasure or the proliferation of mass produced widely accessible entertainment that could degrade or dull the mind He and his contemporaries including James Joyce T S Eliot Gertrude Stein D H Lawrence and Jean Rhys sought to radically redefine pleasure constructing arduous and indirect paths to delight through their notoriously daunting work Laura Frost follows these experiments in the art of unpleasure connecting modernism's signature characteristics such as irony allusiveness and obscurity to an ambitious attempt to reconfigure bliss In *The Problem with Pleasure* Frost draws upon a wide variety of materials linking interwar amusements such as the talkies romance novels the Parisian fragrance Chanel no 5 and the exotic confection Turkish Delight to the artistic play of Joyce Lawrence Stein Rhys and others She considers pop cultural phenomena and the rise of celebrities such as Rudolph Valentino and Gypsy Rose Lee against contemporary sociological scientific and philosophical writings on leisure and desire Throughout her study Frost incorporates recent scholarship on material and visual culture and vernacular modernism recasting the

period's high low elite popular divides and formal strategies as efforts to regulate sensual and cerebral experience Capturing the challenging tensions between these artists' commitment to innovation and the stimulating amusements they denounced yet deployed in their writing Frost calls attention to the central role of pleasure in shaping interwar culture *Sensational Kids Revised Edition* Lucy Jane Miller, Doris A. Waller, 2015-10-22 Restorative Free Will argues for an account of free will that takes seriously the evolutionary development of the key elements of free will It emphasizes a biological understanding of free will that rejects the belief that free will belongs exclusively to humans and seeks to understand free will by examining it writ large in the adaptive behavior of many species Drawing on resources from primatology biology psychology and anthropology Restorative Free Will examines the major compatibilist and libertarian accounts of free will acknowledges their important insights while arguing that each view mistakenly treats an essential element of animal free will as if it were the full account of free will and demonstrates how a broader biological approach to free will integrates those insights into a richer naturalistic free will account **The Blackwell Guide to Continental Philosophy** Robert Solomon, David Sherman, 2008-04-15 The Blackwell Guide to Continental Philosophy is an accessible but sophisticated introduction to the most important figures in Continental philosophy in the last 200 years Presents a definitive introduction to the core figures and topics of continental philosophy Contains newly commissioned essays all of which are written by internationally distinguished scholars Provides a solid foundation for further study Subjects include Hegel Schopenhauer Kierkegaard Marx and Marxism Nietzsche Husserl and Phenomenology Heidegger Sartre critical theory Habermas Gadamer Foucault Derrida postmodernism and French feminism **Ideas, Qualities and Corpuscles** Peter Alexander, 1985-05-09 This study presents a substantial and often radical reinterpretation of some of the central themes of Locke's thought Professor Alexander concentrates on the Essay Concerning Human Understanding and aims to restore that to its proper historical context In Part I he gives a clear exposition of some of the scientific theories of Robert Boyle which he argues heavily influenced Locke in employing similar concepts and terminology Against this background he goes on in Part II to provide an account of Locke's views on the external world and

our knowledge of it He shows those views to be more consistent and plausible than is generally allowed demonstrating how they make sense and enable scientific explanations of nature In examining the views of Locke and Boyle together the book throws light both on the development of philosophy and the beginnings of modern science and in particular it makes a considerable and original contribution to our understanding of Locke s philosophy Adult Catalog: Subjects Los Angeles County Public Library,1970 **Suspect Others** Stuart Earle Strange,2021-07-22 This ethnography considers how spirit mediums interactively create self knowledge out of interpersonal suspicion in the racially and religious diverse Caribbean country of Suriname
