Statistical Methods for Food Science John A. Bower, 2009-11-09 The recording and analysis of food data are becoming increasingly sophisticated Consequently the food scientist in industry or at study faces the task of using and understanding statistical methods Statistics is often viewed as a difficult subject and is often avoided because of its complexity and a lack of specific application to the requirements of food science This situation is changing there is now much material on multivariate applications for the more advanced reader but a case exists for a univariate approach aimed at the non statistician This book provides a source text on

accessible statistical procedures for the food scientist and is aimed at professionals and students in food laboratories where analytical instrumental and sensory data are gathered and require some form of summary and analysis before interpretation. It is suitable for the food analyst, the sensory scientist and the product developer and others who work in food related disciplines involving consumer survey investigations will also find many sections of use. There is an emphasis on a hands on approach and worked examples using computer software packages and the minimum of mathematical formulae are included. The book is based on the experience and practice of a scientist engaged for many years in research and teaching of analytical and sensory food science at undergraduate and post graduate level.

Food Science, Production, and Engineering in Contemporary Economies Jean-Vasile, Andrei, 2016-05-12 As the population of the world continues to surge upwards it is apparent that the global economy is unable to meet the nutritional needs of such a large populace. In an effort to circumvent a deepening food crisis it is pertinent to develop new sustainability strategies and practices. Food Science Production and Engineering in Contemporary Economies features timely and relevant information on food system sustainability and production on a global scale. Highlighting best practices, theoretical concepts and emergent research in the field, this book is a critical resource for professionals, researchers, practitioners and academics interested in food science, food economics and sustainability practices.

Handbook of Brewing Graham G. Stewart, Inge Russell, Anne Anstruther, 2017-10-20 With a foreword written by Professor Ludwig Narziss, one of the world's most notable brewing scientists, the Handbook of Brewing Third Edition, as it has for two previous editions, provides the essential information for those who are involved or interested in the brewing industry. The book simultaneously introduces the basics such as the biochemistry and microbiology of brewing processes and also deals with the necessities associated with a brewery which are steadily increasing due to legislation, energy priorities, environmental issues and the pressures to reduce costs. Written by an international team of experts recognized for their contributions to brewing science and technology, it also explains how massive improvements in computer power and automation have modernized the brewhouse while developments in biotechnology have steadily improved brewing efficiency, beer quality and shelf life.

Wine Tasting Ronald S. Jackson, 2009-05-15 Wine Tasting: A Professional Handbook is an essential guide for any professional or serious connoisseur seeking to understand both the theory and practice of wine tasting. From techniques for assessing wine properties and quality including physiological, psychological and physicochemical sensory evaluation to the latest information on types of wine, the author guides the reader to a clear and applicable understanding of the wine tasting process. Including illustrative data and testing technique descriptions, Wine Tasting is for professional tasters, those who train tasters and those involved in designing wine tastings as well as the connoisseur seeking to maximize their perception and appreciation of wine. Revised and updated coverage notably the physiology and neurology of taste and odor perception. Expanded coverage of the statistical aspect of wine tasting, specific examples to show the process, qualitative wine tasting examples for winery staff tasting their own wines, more examples for consumer groups and
