System Gabe J. Maletta, Francis J. Pirozzolo, 1980 **The Aging Body** Susan Krauss Whitbourne, 2012-12-06 The objective of this book is to provide information that will be useful to people in a variety of disciplines who wish to learn more about normal aging processes in the human body Although gerontologists in the biological sciences are making great strides in research on human aging and documenting this work in monographs texts and review chapters this information is generally

not easily accessible nor is it comprehensible to nonprofessionals in these fields This book is intended to provide a summary of this work along with its implications for psychological functioning of the aging individual The majority of the book is devoted to describing the results of research on the physiological changes in the human body with aging and to seeking explanations for these age effects This description has been approached in such a way as to make it readable for the nonspecialist but also to focus on research issues that will be useful reading for those who are currently working in these particular areas In addition throughout the book I have tried to develop some themes regarding physiological and psychological adaptation during adulthood

Molecular Neurobiology of the Olfactory System F.L. Margolis, T.V. Getchell, 2013-11-11 The sense of smell and the olfactory system have been a subject of intrinsic interest for millennia Inquiry into the structure and function of the olfactory system is based on a long tradition that dates back at least to the ancient Greeks The mechanistic basis for the sensitivity and selectivity of this chemosensory detection system has always posed a challenge and remained largely a mystery Recently there has been a renaissance of interest in it and especially in the application of contemporary techniques of biochemistry and cellular and molecular biology In this volume current research utilizing these approaches is discussed in depth by a group of scientists who are among the current leaders in the applications of these techniques to the olfactory system These authors address a wide range of questions that bear directly on the olfactory system but have broader biological implications as well The various chapters have been grouped into five broad subject areas that emphasize diverse but related questions Transduction and Ligand Receptor Interactions considers the biochemical bases of stimulus access interaction transduction elimination and information processing

The Wiley Handbook on the Aging Mind and Brain Matthew Rizzo, Steven Anderson, Bernd Fritzsche, 2018-05-29 A thought provoking treatise on understanding and treating the aging mind and brain. This handbook recognizes the critical issues surrounding mind and brain health by tackling overarching and pragmatic needs so as to better understand these multifaceted issues. This includes summarizing and synthesizing critical evidence, approaches and strategies from multidisciplinary research, all of which have advanced our understanding of the neural substrates of attention, perception, memory, language, decision making, motor behavior, social cognition, emotion, and other mental functions. Written by a plethora of health experts from around the world, *The Wiley Handbook on the Aging Mind and Brain* offers in depth contributions in 7 sections: Introduction, Methods of Assessment, Brain Functions and Behavior across the Lifespan, Cognition, Behavior and Disease, Optimizing Brain Function in Health and Disease, Forensics, Competence, Legal, Ethics and Policy Issues, and Conclusion, and New Directions. Geared toward improving the recognition, diagnosis and treatment of many brain based disorders that occur in older adults and that cause disability and death, it seeks to advance the care of patients who have perceptual, cognitive, language, memory, emotional, and many other behavioral symptoms associated with these disorders. Addresses principles and practice relevant to challenges posed by the US National Academy of Sciences and National Institute of Aging. NIA Presents materials at a scientific level that is appropriate for a wide variety of providers. *The Wiley Handbook on the Aging Mind and Brain* is an important text for neurologists, psychiatrists, psychologists, physiatrists, geriatricians, nurses, pharmacists, social workers, and other primary caregivers who care for patients in routine and specialty practices, as well as students, interns, residents, and fellows.

The Second Fifty Years Institute of Medicine, Division of Health Promotion and Disease Prevention, 1992-02-01 Taking its title from the second 50 years of the human life span of about 100 years, this book presents wide ranging and practical recommendations for health care providers, policymakers, and other sectors of society. These recommendations range from setting new national policies to changing the way elderly patients are interviewed in the doctor's office and from what exercises older persons should do to how city planners should design our urban environment. The bulk of this volume presents the latest research on 13 major health threats to the elderly, covering prevalence, impact on the older person's life cost, and intervention. In addition, the authors provide a detailed analysis of why older people often do not receive the benefit of prevention programs.
