Sentence Dynamics:

Crises of the Sentence Jan Mieszkowski, 2019-04-02 There are few forms in which so much authority has been invested with so little reflection as the sentence Though a fundamental unit of discourse it has rarely been an explicit object of inquiry often taking a back seat to concepts such as the word trope line or stanza To understand what is at stake in thinking or not thinking about the sentence Jan Mieszkowski looks at the difficulties confronting nineteenth and twentieth century authors when they try to explain what a sentence is and what it can do From Romantic debates about the power of the stand alone sentence to the realist obsession with precision and revision to modernist experiments with ungovernable forms Mieszkowski explores the hidden allegiances behind our ever changing stylistic ideals By showing how an investment in superior writing has always been an ethical and a political as well as an aesthetic commitment *Crises of the Sentence* offers a new perspective on our love hate relationship with this fundamental compositional category

Dynamics in Logic and Language Dun Deng, Mingming Liu, Dag Westerståhl, Kaibo Xie, 2023-02-23 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the Third Tsinghua Interdisciplinary Workshop on Logic Language and Meaning TLLM 2022 which was held virtually in April 2022 The 9 full papers presented in this volume were carefully reviewed and selected from 13 submissions The workshop covers a wide range of topics such as dynamic semantics logical dynamics Dynamic Epistemic Logic Discourse Representation Theory formal semantics free choice inference update semantics and donkey sentences

O jazyce básnickém Jan Mukařovský, 1976-01-01 **Johan van Benthem on Logic and Information Dynamics** Alexandru Baltag, Sonja Smets, 2014-08-27 This book illustrates the program of Logical Informational Dynamics Rational agents exploit the information available in the world in delicate ways adopt a wide range of epistemic attitudes and in that process constantly change the world itself Logical Informational Dynamics is about logical systems putting such activities at center stage focusing on the events by which we acquire information and change attitudes

Its contributions show many current logics of information and change at work often in multi agent settings where social behavior is essential and often stressing Johan van Benthem's pioneering work in establishing this program. However this is not a Festschrift but a rich tapestry for a field with a wealth of strands of its own. The reader will see the state of the art in such topics as information update, belief change, preference learning over time and strategic interaction in games. Moreover no tight boundary has been enforced and some chapters add more general mathematical or philosophical foundations or links to current trends in computer science. The theme of this book lies at the interface of many disciplines. Logic is the main methodology but the various chapters cross easily between mathematics, computer science, philosophy, linguistics, cognitive and social sciences while also ranging from pure theory to empirical work. Accordingly the authors of this book represent a wide variety of original thinkers from different research communities. And their interconnected themes challenge at the same time how we think of logic, philosophy and computation. Thus very much in line with van Benthem's work over many decades the volume shows how all these disciplines form a natural unity in the perspective of dynamic logicians broadly conceived exploring their new themes today. And at the same time in doing so it offers a broader conception of logic with a certain grandeur moving its horizons beyond the traditional study of consequence relations.

The Dynamics of Focus Structure
Nomi Erteschik-Shir, 1997. In this book Nomi Erteschik-Shir develops a new theory of focus structure integrating insights from syntax, semantics, phonology and pragmatics. She explores the role of focus structure in grammar examining the interface between focus structure and syntax, the semantics of focus structure and the intonation associated with it. Dr Shir defines a grammatical level of f structure, focus structure, which is an annotated s structure in which topic and focus constituents are marked. F structure feeds both PF (Phonological Form) and semantics and is sensitive to lexical information. Dr Shir argues that f structure and not LF (Logical Form) is the input to a semantic rule of predication. One of the major results of Dr Shir's analysis is that wh movement turns out to be subject to the same constraint which accounts for anaphora and other subject object asymmetries.

The Dynamics of Language Lutz Marten, 2015-01-27. For the whole of the last half century most theoretical syntacticians have assumed that knowledge of language is different from the tasks of speaking and understanding. There have been some dissenters but by and large this view still holds sway. This book takes a different view; it continues the task set in hand by Kempson et al (2001) of arguing that the common sense intuition is correct: that knowledge of language consists in being able to use it in speaking and understanding. *The Dynamics of Language* argues that interpretation is built up across a sequence of words relative to some context and that this is all that is needed to explain the structural properties of language. The dynamics of how interpretation is built up is the syntax of a language system. The authors' first task is to convey to a general linguistic audience with a minimum of formal apparatus the substance of that formal system. Secondly, as linguists, they set themselves the task of applying the formal system to as broad an array of linguistic puzzles as possible, the languages analysed ranging from English to Japanese and Swahili. It argues that knowledge in language consists

of being able to use it in speaking and understanding It analyses a variety of languages from English to Japanese and Swahili It appeals to a wide audience in the disciplines of language linguistics anthropology education psychology cognitive science law media studies and medicine

The Social Dynamics of Pronominal Systems Paul Bouissac, 2019-07-15 Personal pronouns have a special status in languages As indexical tools they are the means by which languages and persons intimately interface with each other within a particular social structure Pronouns involve more than mere grammatical functions in live communication acts They variously signal the gender of speakers as parts of utterances or in their anaphoric roles They also prominently indicate with a range of degrees the kind of social relationships that hold between speakers from intimacy to indifference from dominance to submission and from solidarity to hostility Languages greatly vary in the number of pronouns and other address terms they offer to their users with a distinct range of social values Children learn their relative position in their family and in their society through the correct use of pronouns When languages come into contact because of population migrations or through the process of translation pronouns are the most sensitive zone of tension both psychologically and politically This volume endeavours to probe the comparative pragmatics of pronominal systems as social processes in a representative set from different language families and cultural areas

Dynamics and Management of Reasoning Processes John-Jules Ch. Meyer, Jan Treur, 2013-04-17 This volume the 6th volume in the DRUMS Handbook series is part of the after math of the successful ESPRIT project DRUMS Defeasible Reasoning and Uncertainty Management Systems which took place in two stages from 1989 1996 In the second stage 1993 1996 a work package was introduced devoted to the topics Reasoning and Dynamics covering both the topics of Dynamics of Reasoning where reasoning is viewed as a process and Reasoning about Dynamics which must be understood as pertaining to how both designers of and agents within dynamic systems may reason about these systems The present volume presents work done in this context This work has an emphasis on modelling and formal techniques in the investigation of the topic Reasoning and Dynamics but it is not mere theory that occupied us Rather research was aimed at bridging the gap between theory and practice Therefore also real life applications of the modelling techniques were considered and we hope this also shows in this volume which is focused on the dynamics of reasoning

processes In order to give the book a broader perspective we have invited a number of well known researchers outside the project but working on similar topics to contribute as well We have very pleasant recollections of the project with its lively workshops and other meetings with the many sites and researchers involved both within and outside our own work package

Meaning: the Dynamic Turn Jaroslav Peregrin, 2021-07-26 In recent decades many theories of formal semantics of natural language have undergone what can be called a dynamic turn they have moved from treating language as a static system to considering it in action and to taking meanings as crucially involving context change potentials The theories however usually concentrate much more on the hows of the turn than on its whys and as a result the conceptual foundations of dynamic semantics are much less elaborated than its technical side This book based on a conference held in Prague in September 2001 is a contribution to filling this gap it consists of papers addressing from various sides the foundational questions of the dynamic theories of meaning It includes contributions of writers who are commonly held as authorities concerning the turn who however here concentrate more on the why s than on the how s of dynamic semantics Hence the book should be of interest both for those who want to know what the turn is about and for those who are not satisfied with knowing the technical side of dynamic semantics and want to know its point

Group Trust Dynamics Zuri Deepwater, AI, 2025-02-21 *Group Trust Dynamics* explores the complex world of trust within groups and organizations examining how it s formed maintained and sometimes lost This book uniquely combines insights from organizational psychology and behavioral economics to provide a holistic understanding It emphasizes that trust isn t a static trait but a dynamic process influenced by psychological biases economic incentives and communication For example cognitive biases like the halo effect can significantly impact trust assessments while economic incentives shape trusting behavior in group settings The book delves into the psychological underpinnings of trust judgments the economic incentives that drive trusting behavior and the critical role of communication and shared experiences It reveals how trust directly impacts team performance innovation and employee well being The approach blends rigorous research with clear explanations and real world examples making it accessible to a broad audience Structured in three major sections the book first analyzes the psychological aspects of trust then the economic dimensions and finally the impact of communication and leadership It culminates with practical strategies for building trust and addresses the ethical implications of trust management offering valuable insights for managers leaders and anyone seeking to enhance collaboration within their teams

Dynamic Processes and Reading Novels Irene O'Leary, 2025-05-12 This book is about the dynamic processes that generate novel reading It takes the view that the world is composed of dynamic processes and introduces a process dynamics approach to articulate this stance This fresh perspective draws on literary studies process philosophy and neuroscience to argue that dynamic literary and microcognitive processes constantly reconfigure the conditions that they co create during reading Analyses of *The PowerBook* by Jeanette Winterson *The Curious Incident of the Dog in the Night time* by Mark Haddon and *Oryx and Crake* by Margaret Atwood consider style

narration allusion and creativity in interaction with diverse microcognitive processes involved in reading The analyses are strengthened by taking live action into account illuminating changes that many critical perspectives miss or standardise and avoiding reliance on illusory ideal readers and readings In proposing a process approach to dynamics and its analysis this book paves the way for new research across disciplines *Meaning and the Dynamics of Interpretation* Hans

Kamp,2013-10-17 This selection of research papers written by Hans Kamp presents the core of his scientific research on natural language semantics and its relation to logic philosophy and linguistics Arranged in six sections the topics range from philosophical reflection on the foundational issues in the ancient Sorites Paradox with a formal account of its solution to a detailed account of presuppositions in dynamic semantics Ranking among the philosophers with great and lasting influence on formal semantics Hans Kamp contributed early foundational research to core theoretical topics like temporal reference and vagueness then pushed the boundaries of the discipline in new and productive directions Showing the importance of non truth functional aspects of meaning Discourse Representation Theory proved the value of a dynamic approach to interaction of text and context for our understanding of anaphora word meaning and context dependence This collection shows very clearly how Kamp has forged ground breaking connections among semantics computation and mental representation challenging the once dominant Fregean anti psychologism while demonstrating that the best theoretical research can simultaneously yield important computational applications and novel cognitive insights Barbara Partee University of Massachusetts Amherst Hans Kamp has been rewarded with the Rolf Schock Prize in 2024 *Dynamics of Meaning*

Gennaro Chierchia,2009-02-20 In *The Dynamics of Meaning* Gennaro Chierchia tackles central issues in dynamic semantics and extends the general framework Chapter 1 introduces the notion of dynamic semantics and discusses in detail the phenomena that have been used to motivate it such as donkey sentences and adverbs of quantification The second chapter explores in greater depth the interpretation of indefinites and issues related to presuppositions of uniqueness and the E type strategy In Chapter 3 Chierchia extends the dynamic approach to the domain of syntactic theory considering a range of empirical problems that includes backwards anaphora reconstruction effects and weak crossover The final chapter develops the formal system of dynamic semantics to deal with central issues of definites and presupposition Chierchia shows that an approach based on a principled enrichment of the mechanisms dealing with meaning is to be preferred on empirical grounds over approaches that depend on an enrichment of the syntactic apparatus *Dynamics of Meaning* illustrates how seemingly abstract stances on the nature of meaning can have significant and far reaching linguistic consequences leading to the detection of new facts and influencing our understanding of the syntax semantics pragmatics interface *Sentence*
