

Word Problem of the Day

On This Day in History

September 5: On this date in 1985, an expedition of explorers from the United States and from France located the wreckage of the R.M.S. Titanic, about 13,000 feet below sea level. It was approximately 660 miles off the coast of Newfoundland in the north Atlantic Ocean. The R.M.S. of the ship's name indicates that it was a Royal Mail Ship, officially responsible for transporting mail for the British postal system. The Titanic was carrying 3,423 sacks of mail containing seven million pieces of mail, as well as five mail clerks. Many artifacts have been recovered from the wreckage of the ship, but no mail has been found.

What was the average number of pieces of mail in each of the British mail sacks aboard the Titanic?

September edition

On This Day in History

September 18: The first lighthouse in America was lit on this date in 1716. Boston Light, situated on Little Brewster Island at the entrance to Boston Harbor, was destroyed by the British in 1776. It was rebuilt in 1783. While it has been automated like all other U.S. lighthouses, Boston Light is still manned by the Coast Guard who maintain the facility and give tours of this historic landmark. A white light flashes every 10 seconds from Boston Light. In periods of poor visibility, a fog signal blasts every 30 seconds in addition to the light.

What is the ratio of fog signal blasts to light flashes on a foggy day at Boston Light?
