Whaley,2024-06-01 Democratic decline in the United States and globally a lack of confidence in political institutions and an increasingly violent and divisive political climate raise many questions for the state of political learning and civic engagement A decade ago a task force commissioned by the United States Department of Education called on colleges and universities to affirm their missions to educate for democracy Relatively few have made the investment though dozens of higher education associations and organizations have publicly committed their support to prepare students to address the persistent public issues they are inheriting While there has been a recent upward spike in rote civic knowledge and historically high youth voting rates the United States has seen a decline in political rights and civil liberties and has been listed as a backsliding democracy Since 2010 state legislatures have passed laws making it harder to vote with access to the ballot increasingly dependent on which party controls the state legislature Meanwhile substantial dysfunction and hyperpartisanship in Congress concerns over the impartiality of the judiciary and limited accountability and oversight of the executive branch have contributed to the loss of institutional capacity to address public problems and to declining public confidence in political institutions These trends coincide with problematic rhetoric and growing scrutiny from public officials on how colleges and universities educate students on public issues particularly those centered on class race ethnicity and social justice Issues of free speech and expression have been further nationalized following a high profile hearing of the House Committee on Education and the Workforce that questioned the presidents of Harvard Massachusetts Institute of Technology and University of Pennsylvania about antisemitism on their campuses and as campus protests regarding the Israeli Palestinian conflict have been met with heavy handed responses These episodes serve as loud warning shots to colleges and universities across the country Academic freedom and freedom of speech core tenets of a liberal education are at risk Can higher

education step up and meet the moment Collectively contributors to this volume who come from a broad range of institutions experiences and perspectives provide critical research and analyses as well as innovative approaches for how higher education can fulfill its public role and contribute to building the democratic societies we need **Handbook of Research on the Changing Role of College and University Leadership** Miller, Michael T., Gearhart, G. David, 2021-06-04 Higher education has changed significantly over the past 50 years and the individuals who provide leadership for these institutions has similarly changed The pathway to the college presidency once the domain of academic administration has diversified as an increasing number of development officers student affairs and enrollment management professionals and even politicians have become common in the role It is important to understand who the presidents are in the current environment and the challenges they face Challenges such as dealing with the COVID 19 pandemic enrollment shortfalls Title IX and athletic scandals have risen to the forefront and have contributed to the issues and role of college and university leadership The Handbook of Research on the Changing Role of College and University Leadership provides important research on the topic of college and university leadership especially focusing on the changing role of the college president The chapters discuss college leadership as it is now and how it will evolve into the future Topics included are the role of the president at various types of universities their involvement within university functions and activities and the duties they must carry out and challenges they face This book is ideal for professionals and researchers working in higher education including faculty members who specialize in education public administration the social sciences and management along with teachers administrators teacher educators practitioners researchers academicians and students who are interested in college and university leadership and how this role is transforming Biennial Report of the President , 1919

Community-University Engagement: A Process for Building Democratic Communities Tami L. Moore, 2014-04-29 As the emphasis on economic development through community university engagement intensifies educators and policy makers must learn to think differently about the engagement process This is particularly true when a narrowly defined group of leaders sets the engagement agenda and those who are traditionally underrepresented continue to be marginalized in the conversations about their own futures Emphasizing the importance of community as a context for engagement and building strong relationships over time Moore calls on institutional leaders to intentionally facilitate broad participation by all members of a community in discussions about how and in what direction the community will develop This is the second issue of the 40th volume of the Josse Bass series ASHE Higher Education Report Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication
