

Tipos de sesgo (error sistemático en observaciones clínicas)

El sesgo es un proceso que en cualquier etapa de la investigación (recolección, análisis, interpretación o revisión de los datos), tiende a producir resultados que se desvían de los valores verdaderos, dando conclusiones que difieren de la verdad.

El sesgo de selección: se produce cuando se comparan grupos de pacientes que difieren en los factores

El sesgo de medición: se produce cuando los métodos de medición difieren entre los grupos de pacientes.

El sesgo de confusión: se produce cuando dos factores están asociados y el efecto de uno se confunde o queda distorsionado por el efecto del otro.

Descripción Resumen Español Castellano Con la entrada en vigor de la Ley Orgánica 3/2007 conocida como la Ley de Igualdad la imposición de cuotas de representación paritaria en las candidaturas españolas supuso una alteración de la composición de género en la administración local por ser el nivel más amplio y elemental de la organización política española en donde los individuos han tenido que reconfigurar y redefinir tanto sus prácticas como su imaginario para adaptarse a un escenario forzosamente heterogéneo En esta tesis se evalúa el estado de la igualdad de género en la política municipal gallega para conocer en qué medida la Ley de Igualdad ha resultado efectiva para generar entornos de participación igualitaria y al mismo tiempo para detectar prácticas encubiertas de discriminación que reduzcan su efectividad A través de una metodología desarrollada específicamente para esta investigación se presenta un análisis detallado de la situación del acceso femenino al poder así como de las diferentes situaciones de vulnerabilidad con la que se topan las mujeres en las distintas fases del proceso político desde la selección de candidatos pasando por la designación de cargos y también en el reparto de la gestión de las áreas municipales Así esta tesis contribuye a identificar situaciones potenciales de riesgo para las mujeres surgidas de este nuevo escenario de participación política para que puedan ser corregidas a partir de la implementación de medidas específicas para reducir la desigualdad y de este modo ayudar a conseguir una igualdad de género efectiva

Descripción Resumen Inglés The Spanish Organic Law 3/2007 on women and men equality establishes a double quota of gender representation on electoral lists This fact changed the gender composition of local governments at the most general and elementary level of the Spanish political organization Politicians have had to reconfigure and redefine both their practices and their imaginary to adapt to this new necessarily heterogeneous social stage This dissertation evaluates the gender equality situation in Galician local governments in order to know if the Gender Equality Law has been an effective tool to create an equal participation environment At the same time this research analyzes and discerns covert practices of discrimination against women Through a specifically developed methodology this research presents a detailed analysis of the female access to municipal power as well as of the different situations of vulnerability in which women are found in the different stages of the political process from the selection of the candidates to the appointment of political positions and in the distribution of the management of the work's areas This dissertation contributes to identify potential risk situations for women arising from this new stage of gender political participation In consequence these bad practices could be corrected through the implementation of specific measures to reduce inequality and contributing to achieve effective gender equality
