**Nuclear Wastes** National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Committee on Separations Technology and Transmutation Systems, 1996-03-23 Disposal of radioactive waste from nuclear weapons production and power generation has caused public outcry and political consternation Nuclear Wastes presents a critical review of some waste management and disposal alternatives to the current national policy of direct disposal of light water reactor spent fuel The book offers clearcut conclusions for what the nation should do today and what solutions should be explored for tomorrow The committee examines the currently used once through fuel cycle versus different alternatives of separations and transmutation technology systems by which hazardous radionuclides are converted to nuclides that are either stable or radioactive with short half lives The volume provides detailed findings and conclusions about the status and feasibility of plutonium extraction and more advanced separations technologies as well as three principal transmutation concepts for commercial reactor spent fuel The book discusses nuclear proliferation the U S nuclear regulatory structure issues of health safety and transportation the proposed sale of electrical energy as a means of paying for the transmutation system and other key issues **Parameters**, 1978 **Consumer Safety Regulation** Peter Asch, 1988 An examination of the current debate in the US between those who argue that unregulated private markets will impose unacceptable risks on the public and those who argue that government safety regulations infringe freedom *Bifurcated Politics* Byron E. Shafer, 1988 Even today when it is often viewed as an institution in decline the national party convention retains a certain raw emotional populist fascination Bifurcated Politics is a portrait of the postwar convention as a changing institution a changing institution that still confirms the single most important decision in American politics With the 1988 elections clearly in mind Byron Shafer examines the status of the national party convention which is created and dispersed within a handful of days but nevertheless becomes a self contained world for participants reporters and observers alike He analyzes such dramatic developments as the disappearance of the contest over the presidential nomination and its replacement by struggles over the publicizing of various campaigns the decline of party officials and the rise of the organized interests and the large and growing disjunction between what is happening at the convention hall and what the public sees between the convention on site and the convention on screen He argues that despite

its declining status the postwar convention has attracted and mirrored most of the major developments in postwar politics the nationalization of that politics and the spread of procedural reform a changing connection between the general public and political institutions even the coming of a new and different sort of American politics Bifurcated Politics tells the story of most of the postwar conventions along with the nominating campaigns that preceded them But it also develops a picture of the changing American politics around those stories It will become the definitive study of the national party convention
