**Managing (e)Business Transformation** Ali Farhoomand, M. Lynne Markus, Guy Gable, Shamza Khan, 2021-01-21 Managing e-Business Transformation comprises text and cases designed to show students how a business can be transformed into an internetworked enterprise where IT infrastructures are used to link customers, suppliers, partners, and employees to create superior economic value. The book is written based on the premise that integrating internet technologies throughout the value chain is crucial to building and managing customer relationships. Importantly, it underscores the centrality of basic business and economic principles within the context of a networked environment. The book builds on established business and economic theories, concepts, and fundamentals to show that e-business will soon be synonymous with business. The book takes a strong managerial perspective, especially popular with MBA students, to argue that the internet is simply an enabling technology which allows firms to build the infrastructure needed to operate in an evolving business world. The application of theory concepts is emphasized throughout and contains a range of international case studies to enhance the learning experience. This book is a must for all students studying e-business strategy at undergraduate, MBA, and postgraduate level. Also available is a companion website with extra features to accompany the text.
