Seventh Year Industrial Civilization In Transition:

The Seventh Year William Jackson Davis,1979 **The Death of Industrial Civilization** Joel Jay Kassiola,1990-08-14

The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one Resettling America Gary J. Coates,2023-06-10 Nominated for 1982 Transformational Book Award an

international competition sponsored by Renewal Magazine *A Prosperous Way Down* Howard T. Odum,Elisabeth C. Odum,2011-05-18 A Prosperous Way Down the last book by Howard T and Elisabeth C Odum has shaped politics and planning as nations states and localities begin the search for ways to adapt to a future with vastly increased competition for energy It considers ways in which a future with less fossil fuel could be peaceful and prosperous Although history records the collapse of countless civilizations some societies and ecosystems have managed to descend in orderly stages reducing demands and selecting and saving what is most important The authors make recommendations for a more equitable and cooperative world society with specific suggestions based on their evaluations of trends in global population wealth distribution energy sources conservation urban development capitalism and international trade information technology and education Available for the first time in paperback this thoughtful provocative book forces us to confront assumptions about our world s future and provides both a steadying hand and a call to action with its pragmatic analysis of a global transition

Explorations in Environmental Political Theory Joel Jay Kassiola,2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster

Nutritional Considerations in a Changing World G. H. Bourne,1984-03-19 **Requiem For Modern Politics**

William Ophuls,2019-05-20 This long promised sequel to Ophuls s influential and controversial classic *Ecology and the Politics of Scarcity* is an equally provocative critique of the liberal philosophy of government Ophuls contends that the modern political paradigm that is the body of political concepts and beliefs bequeathed to us by the Enlightenment is no longer intellectually tenable or practically viable Our attempt to live individually hedonistically and rationally has failed utterly causing a comprehensive crisis that is at once political military economic ecological ethical psychological and spiritual Liberal politics has abandoned virtue rejected community and flouted nature thereby becoming the author of its own demise By exposing the intrinsically contradictory and self destructive character of Hobbesian political systems Ophuls subverts our conventional wisdom at every turn Indeed his impassioned text reads more like a Greek tragedy than a conventional political argument He critiques feminism multiculturalism the welfare state and a host of other liberal shibboleths but Ophuls is not

yet another neoconservative The aim of his thesis is far more radical and progressive offering a political vision that entirely transcends the categories of liberal thought His is a Thoreauvian vision of a politics of consciousness rooted in ecology as the moral and intellectual basis for governance in the twenty first century Ophuls holds that a polity based on a renewed erotic connection with nature offers a genuine solution to this crisis of contemporary civilization and that only within such a polity will it be possible to fulfill the worthy liberal goal of individual self development Ophuls s work will interest and challenge a wide spectrum of readers though it will not necessarily be well liked or easily accepted No one will put down this book with his or her settled convictions about American culture intact nor will readers ever again take modern civilization and its survival for granted

The Church in Response to Human Need Vinay Samuel,Chris Sugden,2003-02-04 An important contribution to the ongoing discussion of the church s relationship to social development this book contains the revised conference proceedings from the consultation The Church in Response to Human Need held in Wheaton Illinois in June of 1983 In the papers collected here writers from five continents consider whether the Bible indicates any method for ministry among the poor the place of the poor in God s plan God s purpose and the movement of human history the nature of the gospel of the kingdom and the interrelation of the gospel and human culture In addition to the individual papers the book includes the statement Transformation which was produced by the consultation as a whole

Challenges and Opportunities Howard F. Didsbury, Jr.,1986-09-17 Challenges and Opportunities

Adapting to the End of Oil Maynard Kaufman,2008-09-15 Adapting to the End of Oil Toward an Earth Centered Spirituality Americans who burn more fossil fuels than any other country will have a hard time adapting to the end of cheap oil This book explains how our materialistic values evolved to make us such wasteful consumers and how corporations profit at our expense The bad news is that rising prices of oil may bankrupt our economy unless we learn how to reduce our energy use The good news is that earth centered values are being affirmed by increasing numbers of people The book shows how earth centered spirituality can help us live more modestly on the earth and preserve the climate

Routledge Library Editions: Energy Various,2021-07-09 Reissuing works originally published between 1964 and 1994 this set of ten volumes is an excellent collection of works on energy production and consumption economics and policy conservation and the crisis International in scope the volumes look at household energy conditions energy in the developing world political history and various other issues within the world of fuel and power This set is a resource for environment studies economics policy and politics sociology geography and other studies considering the use of energy in our world

The Year 1 Arnold Mindell,2019-05-21 This book is an extension of the author s therapeutic work with the concept of the dreambody Just as the unconscious or dreambody signals its problems and solutions in dreams and in the body so the collective unconscious of the planet does the same Attention to these signals can pave the way for global therapy literally making the planet and its people whole and healthy

Overpopulation David E. Newton,2015-12-15 Thanks to modern medicine people are living longer But can our planet support such a large population

Experts weigh in on the subject introducing readers to ideas and key details including how populations grow change and how trends are measured Take Action boxes suggest research activities students can do to increase their understanding of the issue

Families and the Energy Transition John Byrne,David A. Schulz,Marvin B. Sussman,2019-06-26 Originally published in 1985 This volume on household energy conditions considers the energy crisis in the United States and offers an important appraisal of the future of energy consumption by families and the family s adaptations to decreasing energy availability The chapters in the first section investigate the cultural dimensions of energy use at the household level looking at attitudes and trends The second section considers energy policy especially conservation with a special chapter on elderly households while the third presents case studies and projections of the future patterns and changes in energy consumption This is a fascinating snapshot of thinking on families and the effects of energy use

Energy and Land Use Robert W. Burchell,David Listokin,1982 In an era of federal deficits and struggling municipalities the states have emerged as the most significant governmental actors of the 1990s But state governments face a major challenge of fiscal planning in the midst of economic change Bahl and Duncombe tackle this challenge head on Using New York as a case in point they identify looming dangers for state revenue and expenditure planning created by the economic shifts of the 1980s The authors offer invaluable lessons for the 1990s They question forcing a 1960s tax policy through a 1990s economy and they seek long range fiscal planning In place of the mad scramble for eleventh hour solutions to annual budget crises The book is thought provoking exhaustively researched and sensibly written a glimmer of sanity in an uncertain time Its lessons are applicable everywhere and should be read by all those seeking a route through the tangled thickets of government policy for economic growth
