Programs for the Handicapped , A Sensory Curriculum for Very Special People Flo Longhorn, 2011-09-12 This uniquely valuable book arose from the author's work with profoundly disabled children in a special needs school The sensory impairment of the children meant that they were unable to learn from traditional teaching methods as they were unaware of the world around them Our very first awareness of our surroundings and ourselves come through our senses of smell touch taste sight hearing and movement and without them we are isolated To benefit from the normal school curriculum children with sensory impairment must learn to develop each of their senses individually and in combination a process the non handicapped child goes through spontaneously and unconsciously This book outlines a curriculum for each of the senses in turn using stimuli that can be varied to suit the age of the child or young person Demonstrating how these can be combined to create a multisensory experience and how this newly developed awareness can be integrated into the rest of the school curriculum This book was developed from the author's work with profoundly disabled children their sensory impairment meant that traditional teaching was unsuccessful as they were unaware of the world around them Flo Longhorn sets out a curriculum for developing each sense both individually and in combination using stimuli that can be varied according to the age of the child This book shows how these techniques can be amalgamated to create multisensory experiences and how this new awareness can be integrated into the rest of the school curriculum Designed for teachers and parents of children with profound multiple disabilities combined with sensory and physical impairment this has become a classic work

Encyclopedia of Special Education Cecil R. Reynolds, Elaine Fletcher-Janzen, 2007-02-26 The Third Edition of the highly acclaimed Encyclopedia of Special Education has been thoroughly updated to include the latest information about new legislation and guidelines In addition this comprehensive resource features school psychology neuropsychology reviews of new tests and curricula that have been developed since publication of the second edition in 1999 and new biographies of important figures in special education Unique in focus the Encyclopedia of Special Education Third Edition addresses issues of importance ranging from theory to practice and is a critical reference for researchers as well as those working in the special education field

The Education and Care of Children with Severe, Profound and Multiple Learning Disabilities Richard Aird, 2013-12-19 This is a practical guide to managing the whole curriculum for children with severe learning difficulties SLD Crucial guidance and effective strategies are provided on how to reconcile the rights needs and aspirations of such children in light of recent national trends and QCA guidelines

Handbook of Treatment Approaches in Childhood Psychopathology Johnny L. Matson, 2013-03-07 The treatment of psychopathology in children has been a centerpiece of the overall field of problem behaviors in children Therefore a considerable number of data have been accumulated particularly in recent years These efforts have expanded at such a rate as to result in the publication of several new journals such as the Journal of Clinical Child Psychology and Education and Treatment of Children Similarly many standard general clinical journals have begun to devote more attention to children Despite these efforts few books have emerged that are devoted directly and specifically to treatment in childhood psychopathology This volume's scope is broad in that it reviews not only behavior therapy but also the rapidly expanding efforts in psychopathology and traditional psychotherapy and at an advanced level It is designed to provide an in depth scholarly review of the empirical evidence including an overview and analysis of the available techniques their effectiveness and the limitations and complications arising from the use of these treatment methods with the full range of psychopathology displayed by children Many nationally and internationally recognized experts have agreed to contribute chapters to this book and we hope that what has emerged is an up to date and authoritative volume *Developmental Disabilities Abstracts*, 1977

International Handbook of Behavior Modification and Therapy Alan S. Bellack, Michel Hersen, Alan E.

Kazdin, 2012-12-06 It is particularly gratifying to prepare a second edition of a book because there is the necessary implication that the first edition was well received Moreover now an opportunity is provided to correct the problems or limitations that existed in the first edition as well as to address recent developments in the field Thus we are grateful to our friends colleagues and students as well as to the reviewers who have expressed their approval of the first edition and who have given us valuable input on how the revision could best be structured Perhaps the first thing that the reader will notice about the second edition is that it is more extensive than the first The volume currently has 41 chapters in contrast to the 31 chapters that comprised the earlier version Chapters 3 9 29 and 30 of the first edition either have been dropped or were combined whereas 14 new chapters have been added In effect we are gratified in being able to reflect the continued growth of behavior therapy in the 1980s Behavior therapists have addressed an ever increasing number of disorders and behavioral dysfunctions in an increasing range of populations The most notable advances are taking place in such areas as cognitive approaches geriatrics and behavioral medicine and also in the treatment of childhood disorders Encyclopedia of Special Education, Volume 2 Cecil R. Reynolds, Kimberly J. Vannest, Elaine Fletcher-Janzen, 2018-03-06 The only comprehensive reference devoted to special education The highly acclaimed Encyclopedia of Special Education addresses issues of importance ranging from theory to practice and is a critical reference for researchers as well as those working in the special education field This completely updated and comprehensive A Z reference includes about 200 new entries with increased attention given to those topics that have grown in importance since the publication of the third edition such as technology service delivery policies international issues neuropsychology and RTI The latest editions of assessment instruments frequently administered in

from writing teams of acknowledged experts providing a balance of both academic and practitioner perspectives The book covers a myriad of topics and themes and has the core purpose of informing and supporting everyone who is interested in improving the quality of education and support for children and young adults with severe profound and multiple learning difficulties and their families Each chapter contains careful presentations and analyses of the findings from influential research and its practical applications and the book is a treasure chest of experiences suggestions and ideas from practitioners that will be invaluable for many years to come The chapters include many vignettes gathered from practitioners in the field and are written specifically to be rigorous yet accessible The contributors cover topics related to the rights and needs of children and young adults from 0 25 years crucial features of high quality education characteristics of integrated provision and effective and sensitive working with families to ensure the best possible outcomes for their children Crucially the voice of the learners themselves shines through Historical provision that has had an impact on developing services and modern legislation aimed at improving provision and services are also discussed The contributed chapters are organised into six themed parts Provision for learners with SLD PMLD Involving stakeholders Priorities for meeting the personal and social needs of learners Developing the curriculum Strategies for supporting teaching and learning Towards a new understanding of education for learners with SLD PMLD This text is an essential read for students on courses and staff working in and with the whole range of educational settings catering for children and young adults with severe profound and multiple learning difficulties not just for teachers but also for support staff speech and language therapists physiotherapists psychologists nurses social workers and other specialists

A Different View of Curriculum and Assessment for Severe, Complex and Profound Learning Disabilities Peter Imray, Lila Kossyvakis, Michael Sissons, 2023-12-01 A Different View of Curriculum and Assessment links a theoretical pedagogical model with a sympathetic practical model of curriculum and assessment difference for those with PMLD CLD and SLD Split into two parts this accessible resource combines theoretical explanations with first hand accounts of how this works in educational establishments through the analysis of evidence based practice carried out in a number of English special specialist schools The expert authors challenge the notion that a national or common core standards curriculum however expertly differentiated is fit for purpose for the PMLD CLD and SLD populations in any country A Different View offers cogent and reasoned arguments for considering that irrespective of age such learners learn differently to their neuro typical conventionally developing peers If they learn differently this book shows how we should be teaching them differently Reflecting the centrality of process over product this book will clearly explain how each individual learner might be enabled and facilitated to become the best they can be and do the best they can do in order to fully realise their potential as equal and independent citizens
