

Macroecology 43rd Symposium Of The British Ecological Society

British Ecological Society. Symposium

Macroecology 43rd Symposium Of The British Ecological Society:

Macroecology: Concepts and Consequences British Ecological Society. Symposium, 2003-08 Macroecology Concepts and Consequences brings together for the first time major researchers in the field to present overviews of current thinking about the form and determinants of macroecological patterns Each section presents different viewpoints on the answer to a key question in macroecology such as why are most species rare why are most species small bodied and why are most species restricted in their distribution **Macroecology: Concepts and Consequences** Tim Blackburn, Kevin Gaston, 2003

Island Bats Theodore H. Fleming, Paul A. Racey, 2010-03-15 The second largest order of mammals Chiroptera comprises more than one thousand species of bats Because of their mobility bats are often the only native mammals on isolated oceanic islands where more than half of all bat species live These island bats represent an evolutionarily distinctive and ecologically significant part of the earth's biological diversity Island Bats is the first book to focus solely on the evolution ecology and conservation of bats living in the world's island ecosystems Among other topics the contributors to this volume examine how the earth's history has affected the evolution of island bats investigate how bat populations are affected by volcanic eruptions and hurricanes and explore the threat of extinction from human disturbance Geographically diverse the volume includes studies of the islands of the Caribbean the Western Indian Ocean Micronesia Indonesia the Philippines and New Zealand With its wealth of information from long term studies Island Bats provides timely and valuable information about how this fauna has evolved and how it can be conserved Encyclopedia of Theoretical Ecology Alan Hastings, Louis J.

Gross, 2012-05-31 A bold and successful attempt to illustrate the theoretical foundations of all of the subdisciplines of ecology including basic and applied and extending through biophysical population community and ecosystem ecology Encyclopedia of Theoretical Ecology is a compendium of clear and concise essays by the intellectual leaders across this vast breadth of knowledge Harold Mooney Stanford University A remarkable and indispensable reference work that also is flexible enough to provide essential readings for a wide variety of courses A masterful collection of authoritative papers that convey the rich and fundamental nature of modern theoretical ecology Simon A. Levin Princeton University Theoretical ecologists exercise their imaginations to make sense of the astounding complexity of both real and possible ecosystems Imagining a real or possible topic left out of the Encyclopedia of Theoretical Ecology has proven just as challenging This comprehensive compendium demonstrates that theoretical ecology has become a mature science and the volume will serve as the foundation for future creativity in this area Fred Adler University of Utah The editors have assembled an outstanding group of contributors who are a great match for their topics Sometimes the author is a key authoritative figure in a field and at other times the author has enough distance to convey all sides of a subject The next time you need to introduce ecology students to a theoretical topic you'll be glad to have this encyclopedia on your bookshelf Stephen Ellner Cornell University Everything you wanted to know about theoretical ecology and much that you didn't know you needed to know but will now Alan Hastings

and Louis Gross have done us a great service by bringing together in very accessible form a huge amount of information about a broad complicated and expanding field Daniel Simberloff University of Tennessee Knoxville

The Theory of Ecology Samuel M. Scheiner, Michael R. Willig, 2011-06-15 Despite claims to the contrary the science of ecology has a long history of building theories Many ecological theories are mathematical computational or statistical though and rarely have attempts been made to organize or extrapolate these models into broader theories The Theory of Ecology brings together some of the most respected and creative theoretical ecologists of this era to advance a comprehensive conceptual articulation of ecological theories The contributors cover a wide range of topics from ecological niche theory to population dynamic theory to island biogeography theory Collectively the chapters ably demonstrate how theory in ecology accounts for observations about the natural world and how models provide predictive understandings It organizes these models into constitutive domains that highlight the strengths and weaknesses of ecological understanding This book is a milestone in ecological theory and is certain to motivate future empirical and theoretical work in one of the most exciting and active domains of the life sciences

Mangrove Ecosystems: A Global Biogeographic Perspective Victor H. Rivera-Monroy, Shing Yip Lee, Erik Kristensen, Robert R. Twilley, 2017-11-03 This book presents a comprehensive overview and analysis of mangrove ecological processes structure and function at the local biogeographic and global scales and how these properties interact to provide key ecosystem services to society The analysis is based on an international collaborative effort that focuses on regions and countries holding the largest mangrove resources and encompasses the major biogeographic and socio economic settings of mangrove distribution Given the economic and ecological importance of mangrove wetlands at the global scale the chapters aim to integrate ecological and socio economic perspectives on mangrove function and management using a system level hierarchical analysis framework The book explores the nexus between mangrove ecology and the capacity for ecosystem services with an emphasis on thresholds multiple stressors and local conditions that determine this capacity The interdisciplinary approach and illustrative study cases included in the book will provide valuable resources in data information and knowledge about the current status of one of the most productive coastal ecosystem in the world

Trophic Ecology James E. Garvey, Matt Whiles, 2016-09-19 This book is a bridge between ecological paradigms organismal community approaches to food web dynamics and ecosystem level approaches to production The unification of organismal community and ecosystem approaches in ecology is emerging due to the growing availability of new techniques for assessing trophic interactions and their implications for ecosystems Trophic Ecology is a formal text for both newcomers to the discipline as well as seasoned professionals looking for new ideas and refreshers on old topics A wide range of topics are explained including autotrophy heterotrophy omnivory decomposition foraging behavior and theory trophic cascades bioenergetics and production The audience is upper level undergraduate students and entry level graduate students interested in autecological organismal approaches to ecology community and ecosystem ecology It is also a

reference text for instructors teaching upper division courses providing examples from the literature quantitative approaches to teach and new hypotheses yet to be fully tested by ecologists

Ecología de comunidades Fabián Jaksic A.,2007 En esta segunda edición de Ecología de comunidades se explica la teoría que sirve de base a la praxis ecológica comunitaria y se presentan análisis y ejemplos que caracterizan la ecología de comunidades con énfasis en estudios de nuestra región principalmente de Chile y Argentina En relación a la primera edición se han eliminado secciones que en la última década han quedado obsoletas y se han agregado temas ligados tales como redes tróficas e invasiones biológicas El libro está organizado en 14 capítulos autocontenidos que no requieren leerse en ningún orden particular y se complementa con dos apéndices uno con perspectiva histórica y otro con énfasis epistemológico Las más de mil referencias citadas cubren desde trabajos clásicos hasta contemporáneos La citación es ecléctica con una mezcla de autores principalmente estadounidenses europeos y australianos pero también con numerosas referencias a trabajos que han hecho contribuciones importantes desde Sudamérica en particular por ecólogos comunitarios chilenos argentinos y uruguayos
