Macroeconomic Planning Studies In Economics:

Economic Planning Studies R. Frisch, 2012-12-06 It is probably true as the editor of these essays and studies by Ragnar Frisch points out that the majority of economists are not well aware of the contributions made to their discipline by Frisch This certainly does not apply however to econometricians In fact Frisch was one of the founding fathers of the Econometric Society and for the first decade of its existence its recognized leader in Europe The annual European meetings were inspired by his enthusiasm his unprecedented didactic talents and his amazingly diversified contributions It is also clear that those members of the Swedish Academy of Sciences who selected candidates for the Nobel Memorial Prize in Economic Science were fully aware of Ragnar Frisch's pathbreaking work when they decided to award him that famous Prize While much of Frisch's earlier work has been published in his later years of activity he hardly took the time to shape the results of his work in an optimal way for wider circulation Although an impressively lucid writer he evidently gave priority to solutions of some of the planning problems he was involved in rather than to formulating them in the characteristically crystal clear and well structured expositions of earlier years I very much welcome therefore Dr Long's initiative to make available to a wider public within the profession some of the few texts Frisch himself produced probably under pressure from his immediate friends and colleagues

Economic Analysis of Institutions and Systems S. Pejovich, 2012-12-06 Economic Analysis of Institutions and Systems aims to redirect the study of what was previously referred to as comparative economic systems toward analysis of the history and development of institutions and the effects of alternative institutional arrangements on economic behavior To this end the book internalizes into a theoretical framework the effects of alternative institutions on the costs of transactions and

incentive structures ii the effects of the costs of transactions and incentives on economic behavior and iii the evidence for refutable implications of those effects In the process it provides the logical premises for various institutions from which refutable implications can be deduced Confessions of an Economic Hit Man, 3rd Edition John Perkins, 2023-02-28 Los Angeles Times Bestseller How do we stop the unrelenting evolution of the economic hit man strategy and China's takeover The riveting third edition of this New York Times bestseller blows the whistle on China's economic hit man EHM strategy exposes corruption on an international scale and offers much needed solutions for curing the degenerative Death Economy In this shocking exposé former EHM John Perkins gives an insider view into the corrupt system that cheats and strong arms countries around the globe out of trillions of dollars and ultimately causes staggering income inequality and ecological devastation EHMs are highly paid professionals who use development loans to saddle countries with huge debts and force them to serve US interests Now a new EHM wave is infecting the world and at the peak of the devastation sits China a newly dominant economic power with its own insidious version of the US EHM blueprint Twelve explosive new chapters detail the allure exploitation and wreckage of China's EHM strategy in Latin America Asia Africa the Middle East and Europe If allowed to continue its rampage the EHM strategy whether executed by the United States or China will destroy life as we know it However all is not lost Perkins offers a plan for transforming this system that places profits above all into a Life Economy that restores the earth He inspires readers to take actions toward a new era of global cooperation that will end the United States's and China's EHM strategies for good The New Confessions of an Economic Hit Man John Perkins, 2016-02-09 Featuring 15 explosive new chapters this new edition of the New York Times bestseller brings the story of Economic Hit Men up to date and chillingly home to the U S but it also gives us hope and the tools to fight back The previous edition of this now classic book revealed the existence and subversive manipulations of economic hit men John Perkins wrote that they are highly paid professionals who cheat countries around the globe out of trillions of dollars Their tools include fraudulent financial reports rigged elections payoffs extortion sex and murder In Perkins's case the tool was debt convincing strategically important countries to borrow huge amounts of money for enormous development projects that served the very rich while driving the country deeper into poverty and debt And once indebted these countries could be controlled In this latest edition Perkins provides revealing new details about how he and others did their work But more importantly in an explosive new section he describes how the EHM tools are being used around the world more widely than ever even in the U S itself The cancer has metastasized yet most people still aren't aware of it Fear and debt drive the EHM system We are hammered with messages that terrify us into believing that we must pay any price assume any debt to stop the enemies who we are told lurk at our doorsteps The EHM system employing false economics bribes surveillance deception debt coups assassinations unbridled military power has become the dominant system of economics government and society today It has created what Perkins calls a Death Economy But Perkins offers hope he concludes with dozens of specific concrete

Collective Goods, Neglected Goods: Dealing With Methodological Failure In The Social Sciences Herbert J Kiesling,2000-01-21 This book argues that mainstream social scientists have failed to be useful because of misguided efforts to use objectivist methods employed in the natural sciences of treating humans as things It argues that the attempt to imitate the objectivism of natural scientists has caused social scientists to both neglect human collective goals and to overlook a virtual gold mine of empirical data which exists because humans can communicate their feelings beliefs and personal

histories This wealth of data exists because of the extraordinary amount of information humans possess due to their ability to interpret and remember their own experiences Part 1 of the book discusses the ways in which objectivism has led to the undue neglect of human social goals across the social sciences Part 2 deals with objectivist failures by using models where motivation depends equally upon all important social goals Cooperative efforts are suggested perhaps by using alternative organizational and institutional arrangements where universities would reorganize the social sciences into single divisions of human sciences
