Macroeconomics Of Transition Developments In East Central Europe:

The Macroeconomics of Transition Andrzej Kondratowicz, Jan Winiecki, 2005-08-18 How successful has the transition to market economies proved in East Central Europe The decision by the East European countries to move to market economies was accompanied by much hypothesising and expounding of economic theories However now that the initial euphoria has passed it is time for a rational assessment of this transition and the success of those theories in practice Since the more economically advanced countries are situated in East Central Europe Jan Winiecki and Andrzej Kondratowicz have focused their study on Czechoslovakia Hungary Poland and former Yugoslavia The authors present a systematic account of macroeconomic developments and institutional changes They assess progress dealing with the determinants of output macro policies wage price and employment issues and the external balance

The Privatization Process in East-Central Europe Michal Mejstřík, 2012-12-06 It is beyond any doubt that East Central European countries such as Czech Republic Hungary Poland and Slovakia has dramatically changed its shape through its radical transition from centrally planned to the market economies in last 7 years Many economists divide the process of economic transformation into areas of Stabilization Liberalization and Privatization Restructuring The traditional view is that stabilization and liberalization can be achieved rather quickly by balancing budgets balance of payments tightening money supply freeing prices and liberalizing trade but that the area of privatization is one that could be moved to the future and will require much more time Until 1991 none of the post communist nations except former East Germany which had a large decree of support from West Germany had succeeded in privatizing large numbers of enterprises even though more than two years had passed since the changes in government in these nations The privatization has been however seen as an extremely important part of reform package together with stabilization and liberalization especially in the Czech Republic from the very beginning The Czechs originally as a part of the Czechoslovak Federal Republic embarked on an unprecedented path that should have lead not only to stabilization and liberalization but also to very rapid mass privatization of its sector of large enterprises that have dominated its economy to an extreme extent

Entangled Evolutions Peter Gross, 2002-05-08 The revolutions of 1989 swept away Eastern Europe's communist governments and created expectations on the part of many observers that post communist media would lead the liberated societies in establishing and embracing democratic political cultures Peter Gross finds that it was utopian to hold such expectations of the media in societies in transition On the one hand those countries media professionals had all learned their jobs under the communist regimes and could not instantly transform themselves into guides for a politically enabled populace Gross argues On the other hand newcomers to the media world even those who were notable literary figures viewed themselves as social and political leaders rather than mere informers and facilitators of the resocialization required to form new democracies The news media have remained highly politicized and partisan So how are the media civil society and political culture related in societies in transition And can changes in these relationships be anticipated To address these questions *Entangled Evolutions* examines media in post 1989 Eastern Europe It studies the effects of privatization of the media journalists relations to political figures institutional structures such as media laws professional journalistic culture and the media's relation to their market Sources include interviews with journalists and politicians sociological and political data from national surveys and media audience studies
