The Publishers' Trade List Annual ,1980 **Canadian Economic Forecasting** Mervin Daub,1987-11-01 Daub discusses both the rationale for the practice of forecasting and the methods commonly used and traces the history of aggregate economic forecasting in Canada examining the structure conduct and performance of the present forecasting industry particularly the nature of demand and supply pricing and promotion considerations and profits and efficiency He also examines factors which influence the accuracy of forecasts and reviews the record of Canadian forecasting In the last chapters Daub considers public policy aspects of economic forecasting Should forecasters be held liable for inaccurate forecasts Should they be subject to regulation He concludes by observing that the practice of forecasting is inextricably linked to our sense of time as is the very different exercise of time keeping with clocks or watches It is socially complex highly institutionalized and informed by the many and varied visions we carry of the world Through it we attempt to organize and shape our individual and collective futures Until uncertainty is eliminated from human affairs forecasting will continue to

be a necessary social practice despite recurring bouts of cynicism as to its worth

The Power of Economic Ideas Alex Millmow,2010-05-01 Economics Keynes once wrote can be a very dangerous science Sometimes though it can be moulded to further the common good though it might need a leap in mental outlook a whole new zeitgeist to be able to do so This book is about a transformation in Australian economists thought and ideas during the interwar period It focuses upon the interplay between economic ideas players and policy sometimes in the public arena In a decade marked by depression recovery and international political turbulence Australian economists moved from a classical orthodox economic position to that of a cautious Keynesianism by 1939 We look at how a small collective of economists tried to influence policy making in the nineteen thirties Economists felt obliged to seek changes to the parameters as economic conditions altered but more importantly as their insights about economic management changed There are three related

themes that underscore this book Firstly the professionalisation of Australian economics took a gigantic leap in this period aided in part by the adverse circumstances confronting the economy but also by the aspirations economists held for their discipline A second theme relates to the rather unflattering reputation foisted upon interwar economists after 1945 That transition underlies a third theme of this book namely how Australian economists were emboldened by Keynes s General Theory to confidently push for greater management of economic activity By 1939 Australian economists conceptualized from a new theoretic framework and from one which they advanced comment and policy advice This book therefore will rehabilitate the works of Australian interwar economists arguing that they not only had an enviable international reputation but also facilitated the acceptance of Keynes s General Theory among policymakers before most of their counterparts elsewhere
