A Contemporary Historiography of Economics Till D ppe, E. Roy Weintraub, 2018-10-03 In recent years the focus of historians of economic

thought has changed to also include the ideas and practices of contemporary economists This has opened up new questions regarding the utilization of sources choice of method narrative styles and ethical issues as well as a new awareness of the historian's place role and task This book brings together leading contributors to provide for the first time a methodological overview of the historiography of economics Emphasising the quality of the scholarship of recent decades the book seeks to provide research tools for future historians of economic thought as well as to any historians of social science with an interest in historiographic issues

Macroeconomic Instability and Coordination Axel Leijonhufvud, 2000 Axel Leijonhufvud has made a unique contribution to the development of macroeconomic theory This volume draws together his insightful essays dealing with the extremes of economic instability great depressions high inflation and the transition from socialism to a market economy In several of the papers Leijonhufvud brings a neo institutionalist perspective to the problems of coordination in economic systems The papers within *Macroeconomic Instability and Coordination* some of them already considered classics deal with the questions that dominated Leijonhufvud's interest throughout his career as an economist what are the limits to an economy's capacity to coordinate the activities of its members How does the behavior of the system change under extreme conditions In what ways does its performance depend upon the institutions that govern the market process

The Structural Determinants of the Labor Share in Europe Dilyana Dimova, 2019-03-22 The labor share in Europe has been on a downward trend This paper finds that the decline is concentrated in manufacture and among low to mid skilled workers The shifting nature of employment away from full time jobs and a rollback of employment protection unemployment benefits and unemployment benefits have been the main contributors Technology and globalization hurt sectors where jobs are routinizable but helped others that require specialized skills High skilled professionals gained labor share driven by productivity aided by flexible work environments while low and mid skilled workers lost labor share owing to globalization and the erosion of labor market safety nets

The New Development Economics Jomo K.S., Ben Fine, 2006 This volume provides a critique of the post Washington Consensus in neoliberal economics

Books Rose Arny, 2003-04 *On Interpreting Keynes* Bruce Littleboy, 2013-03-07 There is discontent with how the textbooks have come to reinterpret Keynes but there is little communication between the most prominent schools of criticism This book argues that this lack of dialogue is mistaken and damaging A synthesis is possible as many of the arguments between them can be traced to simple misunderstandings and differences of emphasis *Partisan Politics in the Global Economy* Geoffrey Garrett, 1998-03-13 Geoffrey Garrett challenges the conventional wisdom about the domestic effects of the globalization of markets in the industrial democracies the erosion of national autonomy and the demise of leftist alternatives to the free market He demonstrates that globalization has strengthened the relationship between the political power of the left and organized labour and economic policies that reduce market generated inequalities of risk and wealth Moreover macroeconomic outcomes in the era of global markets have been as good or better in strong left labour regimes social democratic corporatism as in other industrial countries Pessimistic visions of the inexorable dominance of capital over labour or radical autarkic and nationalist backlashes against markets are significantly overstated Electoral politics have not been dwarfed by market dynamics as social forces Globalized markets have not rendered immutable the efficiency equality trade off *The Oxford Handbook of the Welfare State* Francis G. Castles, Stephan Leibfried, Jane Lewis, Herbert Obinger, Christopher Pierson, 2012-09-06 The Oxford Handbook of the Welfare State is the authoritative and definitive guide to the contemporary welfare state In a volume consisting of nearly fifty newly written chapters a broad range of the world's leading scholars offer a comprehensive account of everything one needs to know about the modern welfare state The book is divided into eight sections It opens with three chapters that evaluate the philosophical case for and against the welfare state Surveys of the welfare state's history and of the approaches taken to its study are followed by four extended sections running to some thirty five chapters in all which offer a comprehensive and in depth survey of our current state of knowledge across the whole range of issues that the welfare state embraces The first of these sections looks at inputs and actors including the

roles of parties unions and employers the impact of gender and religion patterns of migration and a changing public opinion the role of international organisations and the impact of globalisation The next two sections cover policy inputs in areas such as pensions health care disability care of the elderly unemployment and labour market activation and their outcomes in terms of inequality and poverty macroeconomic performance and retrenchment The seventh section consists of seven chapters which survey welfare state experience around the globe and not just within the OECD Two final chapters consider questions about the global future of the welfare state The individual chapters of the Handbook are written in an informed but accessible way by leading researchers in their respective fields giving the reader an excellent and truly up to date knowledge of the area under discussion Taken together they constitute a comprehensive compendium of all that is best in contemporary welfare state research and a unique guide to what is happening now in this most crucial and contested area of social and political development
