**Macromolecular Syntheses - Volume 1 A Periodic Publication of Methods for the Preparation of Macromolecules** C. G. Overberger, 1963     *Macromolecules · 1* H.G. Elias, 2012-12-06 The second edition of this textbook is identical with its fourth German edition and it thus has the same goals precise definition of basic phenomena a broad survey of the whole field integrated representation of chemistry physics and technology and a balanced treatment of facts and comprehension The book thus intends to bridge the gap between the often oversimplified introductory textbooks and the highly specialized texts and monographs that cover only parts of macromolecular science The text intends to survey the whole field of macromolecular science Its organization results from the following considerations The chemical structure of macromolecular compounds should be independent of the method of synthesis at least in the ideal case Part I is thus concerned with the chemical and physical structure of polymers Properties depend on structure Solution properties are thus discussed in Part II solid state properties in Part III There are other reasons for discussing properties before synthesis For example it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics the gel effect without knowledge of the glass transition temperature etc Part IV treats the principles of macromolecular syntheses and reactions     **Macromolecules** Hans-Georg Elias, 2013-06-29 Like so many of its kind this textbook originated from the requirements of teaching While lecturing on macromolecular science as a required subject for chemists and materials

scientists on the undergraduate graduate and postgraduate levels at Swiss Federal Institute of Technology at Zurich 1960 1971 I needed a one volume textbook which treated the whole field of macromolecular science from its chemistry and physics to its applications in a not too elementary manner This textbook thus intends to bridge the gap between the often oversimplified introductory books and the highly specialized texts and monographs that cover only parts of macromolecular science This first English edition is based on the third German edition 1975 which is about 40% different from the first German edition 1971 a result of rapid progress in macromolecular science and the less rapid education of the writer This text intends to survey the whole field of macromolecular science Its organization results from the following considerations The chemical structure of macromolecular compounds should be independent of the method of synthesis at least in the ideal case Part I is thus concerned with the chemical and physical structure of macro molecules Properties depend on structure Solution properties are thus discussed in Part II solid state properties in Part III There are other reasons for discussing properties before syntheses For example it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics of the glass temperature etc    [Encyclopedia of Polymer Blends, Volume 1](#) Avraam I.
