Reyner Banham and the Paradoxes of High Tech Todd Gannon, 2017-09-05 Reyner Banham and the Paradoxes of High Tech reassesses one of the most influential voices in twentieth century architectural history through a detailed examination of Banham's writing on High Tech architecture and its immediate antecedents Taking as a guide Banham's habit of structuring his writings around dialectical tensions Todd Gannon sheds new light on Banham's early engagement with the New Brutalism of Alison and Peter Smithson his measured enthusiasm for the clip on approach developed by Cedric Price and the Archigram group his advocacy of well tempered environments fostered by integrated mechanical and electrical systems and his late career assessments of High Tech practitioners such as Norman Foster Richard Rogers and Renzo Piano Gannon devotes significant attention to Banham's late work including fresh archival materials related to *Making Architecture* The Paradoxes of High Tech the manuscript he left unfinished at his death in 1988 For the first time readers will have access to Banham's previously unpublished draft introduction to that book **An Everyday Modernism** Marc Treib, 1999 The first large scale examination of William Wurster's work **Language of post-modern architecture; revised enlarged edition** C.A. Jencks, 1978 **Rethinking Modernity** Antigoni Katsakou, 2020-05-31 This book proposes alternative interpretations of broadly debated concepts within architectural modernity Bringing into view the work of lesser known architects from across the globe alongside previously unexplored aspects of mainstream masters of the Modern Rethinking Modernity puts forward a compelling case for the range and diversity of architectural projects encompassed by this term Exploring themes such as the use of colour materials ornament local traditions and identities Rethinking Modernity challenges readers to build

a better understanding of a crucial moment in architectural history and of design trends shaping the present day production of the built environment Complementing the RIBA Publishing titles *Redefining Brutalism* and *Revisiting Postmodernism* this book sits within a series of books aiming to explore new interpretations of well loved architectural movements richly illustrated with rarely seen archive photography and lesser known projects **Modern Architecture** Otto Wagner,1988 In 1896 Otto Wagner s *Modern Architecture* shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner s historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner s tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner s revolutionary lan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity *Modern Architecture* is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **The New Moderns** Charles Jencks,1990 Dialogues with neo modernists Peter Eisenman Philip Johnson Richard Meier Fumihiko Maki pictorial surveys of Frank Gehry Rem Koolhaas Norman Foster Richard Rogers I M Pei

Contemporary Architects Muriel Emanuel,2016-01-23 **Materials and Meaning in Architecture** Nathaniel Coleman,2020-02-20 Interweaving architecture philosophy and cultural history *Materials and Meaning in Architecture* develops a rich and multi dimensional exploration of materials and materiality in an age when architectural practice seems otherwise preoccupied with image and visual representation Arguing that architecture is primarily experienced by the whole body rather than chiefly with the eyes this broad ranging study shows how the most engaging built works are as tactile as

they are sensuous communicating directly with the bodily senses especially touch It explores the theme of material imagination and the power of establishing place identity in an architect's work to consider the enduring expressive possibilities of material use in architecture The book's chapters can be dipped into each individual chapter providing close readings of built works by selected modern masters Scarpa Zumthor Williams and Tsien insights into key texts and theories Ruskin Loos Bachelard or short cultural histories of materials wood brick concrete steel and glass And yet taken together the chapters build to a powerful book length argument about how meaning accrues to materials through time and about the need to reinsert the bodily experience of materiality into architectural design It is thus also in part a manifesto arguing for architecture to act as a bulwark against the tide of an increasingly depersonalised built environment With insights for a wide range of readers ranging from students through to researchers and professional designers *Materials and Meaning in Architecture* will cause theorists to rethink their assumptions and designers to see new potential for their projects

The Baroque in Architectural Culture, 1880-1980 Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

Scientific American, 1901 *The Athenaeum*, 1874 **Energy Efficient Buildings** Dean Hawkes, Wayne Forster, 2002-07-30 At the beginning of the twenty first century the debate on the vulnerability of the global environment has given a new significance to the environmental agenda in architecture *Understanding Architecture* Leland M. Roth, 2018-03-13 This widely acclaimed beautifully illustrated survey of Western architecture is now fully revised throughout including essays on non

Western traditions The expanded book vividly examines the structure function history and meaning of architecture in ways that are both accessible and engaging Scientific American Building Monthly ,1892 *Designed To Live In* Elisabeth Beazley,2024-05-24 Originally published in 1962 this book traces the main influences behind modern design in domestic architecture It does so against the context of the effect each new dwelling has on its environment and the effect its design has on those in the surrounding and often older historic housing stock Diverse influences such as the bye law street and Le Corbusier s Ville Radieuse are discussed while the ideas bearing on the individual private house range from those of the early nineteenth century villa builders to Frank Lloyd Wright s prairie houses and the work of Mies van der Rohe The book closes with a detailed discussion of the problems and possibilities of domestic design in house building in the late 20th Century
