Modern Fighting Aircraft F 4 Phantom II:

F-4, Phantom II Doug Richardson, Mike Spick, 1984 F-4 Phantom II Doug Richardson, Mike Spick, 1984 **USAF McDonnell Douglas F-4 Phantom II** Peter E. Davies, 2013-04-20 A definitive technical guide to the USAF and foreign variants of the McDonnell Douglas F4 Phantom In many respects the most successful versatile and widely used combat aircraft of the post war era the F 4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F 4Cs took over MiG fighting duties from the F 100 Super Sabre Although the F 4 was never intended as a dog fighter to tangle with light nimble gun armed MiGs it was responsible for destroying 109 MiGs in aerial combat At the end of their careers many of the survivors from the 3 380 land based Phantoms were converted into target drones for training purposes New aircraft were also built for West Germany Iran and Israel As Peter Davies outlines in this illustrated history the USAF s experience with the Phantom showed clearly that the air to air fighter was still a necessity Its decision to fund its successor the McDonnell Douglas F 15 Eagle as well as the F 16 Fighting Falcon and F 22A Raptor was heavily influenced by the lessons of US and other Phantom pilots in combat **Aviation Fact File** , Modern Fighting Aircraft F-4 , 1984 USAF F-4 Phantom II MiG Killers 1965-68 Peter E. Davies, 2012-11-20 The USAF introduced the F 4C Phantom II into the Vietnam war in April 1965 from Ubon RTAB Thailand The F 4C D soon became the Air Force s principal fighter over the North destroying 85 MiGs by the close of 1968 This book describes how the USAF turned a gunless naval interceptor into an opponent to the more nimble VPAF MiGs It explains how the Air Force gradually followed US Navy initiatives in the use of the F 4 s missile armament but employed very different tactics and aircrew training The roles of key personalities such as Col Robin Olden are discussed together with armament and markings crews and engagements **Engineering the F-4 Phantom II** Glenn E. Bugos, 1996 Conceived in 1953 in a chickenwire covered cubicle known as the advanced design cage at McDonnell Aircraft the F 4 Phantom II fighter bomber was produced for 25 years serving a full workload in Vietnam for the Navy Marines and Air Force and surviving through the 1990s in the air arms of eleven nations While most case studies of modern aircraft focus on the many ways the military industrial complex goes wrong this trenchant invigorating study looks deeper at how those who built the complex intended it to work Step by step the reader discovers how the relationships among parts systems procedures economies and missions were shaped by relationships among people scientists engineers testers program managers subcontractors military strategists pilots and corporate leaders Drawing on exhaustive research including interviews with key players the author makes a major advance in the burgeoning body of literature on technology management by showing how McDonnell worked through the problems of technical integration that plagued defense engineering in the 1960s and 1970s and led to programs full of complexity It is as much a study of how aircraft manufacturers and military officers went about their business as it is a life and times history of an important aircraft *Nuclear Propulsion for Naval Warships*

Davies, 2012-11-20 Although designed as a carrier borne interceptor the F 4 Phantom II was a very successful ground attack aircraft for the US Marines paving the way for it use in this capacity by the USAF and many other air forces It was closely involved in some of the toughest battles of the Vietnam War Twenty five US Marine Corps squadrons flew versions of the Phantom II and 11 of them used the aircraft in South East Asia from May 1965 through to early 1973 Rather than the air to

air missiles that were the main component in the original F 4 armament these aircraft carried an ever expanding range of weaponry Some toted 24 500 lb bombs and others strafed with up to three 20 mm gun pods while most flew daily sorties delivering napalm Snakeye bombs and big Zuni rockets Many US Marines holding small outpost positions in Laos and South Vietnam against heavy Viet Cong attack owed their lives to the Phantom II pilots who repeatedly drove off the enemy

Featuring stunning profile illustrations and photographs throughout this book examines these missions in the context of US Marine Corps close support doctrine using the direct experience of a selection of the aircrew who flew and organised those missions
