Instruments and the Imagination Thomas L. Hankins, Robert J. Silverman, 2014-07-14 Thomas Hankins and Robert Silverman investigate an array of instruments from the seventeenth through the nineteenth century that seem at first to be marginal to science magnetic clocks that were said to operate by the movements of sunflower seeds magic lanterns ocular harpsichords machines that played different colored lights in harmonious mixtures Aeolian harps a form of wind chime and other instruments of natural magic designed to produce wondrous effects By looking at these and the first recording instruments the stereoscope and speaking machines the authors show that scientific instruments first made their appearance as devices used to evoke wonder in the beholder as in works of magic and the theater The authors also demonstrate that these instruments even though they were often tricks were seen by their inventors as more than trickery In the view of Athanasius Kircher for instance the sunflower clock was not merely a hoax but an effort to demonstrate however fraudulently his truly held belief that the ability of a flower to follow the sun was due to the same cosmic magnetic influence as that which moved the planets and caused the rotation of the earth The marvels revealed in this work raise and answer questions about the connections between natural science and natural magic the meaning of demonstration the role of language and the senses in science and the connections among art music literature and natural science Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Dwight's journal of music J.S. Dwight, *The Rise of European Music, 1380-1500* Reinhard Strohm, 2005-02-17 This is a detailed and comprehensive survey of music in the late middle ages and early Renaissance By limiting its scope to the 120 years which witnessed perhaps the most dramatic expansion of our musical heritage the book

responds in the 1990s to the tremendous increase in specialised research and public awareness of that period Three of the four main Parts I II IV describe the development of polyphony and its cultural contexts in many European countries from the successors of Machaut d 1377 to the achievements of Josquin des Prez and his contemporaries working in Renaissance Italy around 1500 Part III by contrast illustrates the musical life of the institutions and musical practices outside the realm of composed polyphony that were traditional and common all over Europe The book proposes fresh views in each chapter discussing dozens of musical examples adducing well known and hitherto unknown documents and referring to and evaluating the most recent scholarship in the field

Quotation and Cultural Meaning in Twentieth-Century Music

David Metzger,2003-04-17 Throughout the twentieth century musicians frequently incorporated bits of works by other musicians into their own compositions and performances When a musician borrows from a piece he or she draws upon not only a melody but also the cultural associations of the original piece By working with and altering a melody a musician also transforms those associations This book explores that vibrant practice examining how musicians used quotation to participate in the cultural dialogues sustained around such areas as race childhood madness and the mass media

MicroBionic: Radical Electronic Music and Sound Art in the 21st Century Thomas Bey William Bailey,2012-12-10 Micro Bionic is an exciting survey of electronic music and sound art from cultural critic and mixed media artist Thomas Bey William Bailey This superior revised edition includes all of the original supplements neglected by the publishers of the first edition including a full index bibliography additional notes commentary and an updated discography As the title suggests the unifying theme of the book is that of musicians and sound artists taking bold leaps forward in spite of or sometimes because of their financial technological and social restrictions Some symptoms of this condition include the gigantic discography amassed by the one man project Merzbow the drama of silence enacted by onkyo and New Berlin Minimalism the annihilating noise transmitted from the humble laptop computers of Russell Haswell and Peter Rehberg and much more besides Although the journey begins in the Industrial 1980s in order to trace how the innovations of that period have gained greater currency in the present it surveys a wide array of artists breaking ground in the 21st century with radical attitudes and techniques A healthy amount of global travel and concentrated listening have combined to make this a sophisticated yet accessible document unafraid to explore both the transgressive extremes of this culture and the more deftly concealed interstices thereof Part historical document part survival manual for the marginalized electronic musician part sociological investigation Micro Bionic is a number of different things and as such will likely generate a variety of reactions from inspiration to offense Numerous exclusive interviews with leading lights of the field were also conducted for this book William Bennett Whitehouse Peter Christopherson r i p Throbbing Gristle Coil Peter Rehberg John Duncan Francisco Lopez Carl Michael von Hausswolff Bob Ostertag Zbigniew Karkowski and many others weigh in with a diversity of thoughts and opinions that underscore the incredible diversity to be found within new electronic music itself
