## **Other Intentions:**

**Intentions** Arabella Lyon, 1998-09-15 The relationship between an author's and an audience's intentions is complex but need not preclude mutual engagement This philosophical investigation challenges existing literary and rhetorical perspectives on intention and offers a new framework for understanding the negotiation of meaning It describes how an audience's intentions affect their interpretations shows how audiences negotiate meaning when faced with a writer's undecipherable intentions and defines the scope of understanding within rhetorical situations Introducing a concept of intention into literary analysis that supersedes existing rhetorical theory Arabella Lyon shows how the rhetorics of I A Richards Wayne Booth and Stanley Fish as well as the hermeneutics of Hans Georg Gadamer fail to account for the complex interactions of author and audience Using Kenneth Burke's concepts of form motive and purpose she builds a more complex notion of intention than those usually found in literary studies then employs her theory to describe how philosophers read Wittgenstein's narratives metaphors and reversals in argument Lyon argues that our differences in intention prevent consistency in interpretations but do not stop our discussions deliberations and actions She seeks to acknowledge difference and the communicative problems it creates while demonstrating that difference is normal and does not end our engagement with each other Intentions combines recent work in philosophy literary criticism hermeneutics and rhetoric in a highly imaginative way to construct a theory of intention for a postmodern rhetoric It recovers and renovates central concepts in rhetorical theory not only intention but also deliberation politics and judgment

**Intentions in Communication** Philip R. Cohen, Jerry L. Morgan, Martha E. Pollack, 1990 Intentions in Communication brings together major theorists from artificial intelligence and computer science linguistics philosophy and psychology whose work develops the foundations for an account of the role of intentions in a comprehensive theory of communication It demonstrates for the first time the emerging cooperation among disciplines concerned with the fundamental role of intention in communication The fourteen contributions in this book address central questions about the nature of intention as it is understood in theories of communication the crucial role of intention recognition in understanding utterances the use of principles of rational interaction in interpreting speech acts the contribution of intonation contours to intention recognition and the need for more general models of intention that support a view of dialogue as a collaborative activity The contributors are Michael E Bratman Philip R Cohen Hector J Levesque Martha E Pollack Henry Kautz Andrew J I Jones C Raymond Perrault Daniel Vanderveken Janet Pierrehumbert Julia Hirschberg Richmond H Thomason Diane J Litman James F Allen John R Searle Barbara J Grosz Candace L Sidner Herbert H Clark and Deanna Wilkes Gibbs The book also includes commentaries by James F Allen W A Woods Jerry Morgan Jerrold M Sadock Jerry R Hobbs and Kent Bach Philip R Cohen is a Senior Computer Scientist at the Artificial Intelligence Center at SRI International and is a Senior Researcher with the Center for the Study of Language and Information Jerry Morgan is Associate Professor Department of Linguistics and Beckman Institute for

Advanced Science and Technology at the University of Illinois Martha E Pollack is a Computer Scientist at the Artificial Intelligence Center at SRI International and is a Senior Researcher with the Center for the Study of Language and Information Intentions in Communication is included in the System Development Foundation Benchmark Series **Acts, Intentions, and Moral Evaluation** Craig M. White, 2022-12-27 This book argues that the moral quality of an act comes from the agent's inner states By arguing for the indispensable relevance of intention in the moral evaluation of acts the book moves against a mainstream objective approach in normative ethics It is commonly held that the intentions knowledge and volition of agents are irrelevant to the moral permissibility of their acts This book stresses that the capacities of agency rather than simply the label agent must be engaged during an act if its moral evaluation is to be coherent The author begins with an ontological argument that an act is a motion or a causing of change in something else He argues that the source of an act's moral meaning is in the agent specifically what the agent is aware of relevant facts around her aims to accomplish He then moves to a series of critical chapters that consider arguments for mainstream approaches to act evaluation including Thomson's dismissal of the agent knowledge and volition requirements Scanlon's arguments for a derivative relevance of intentions to permissibility Frowe's causal roles of agents in the moral evaluation of acts and Bennett's explicit defense of the objective approach The book concludes by offering the author's preferred replacement for the objective approach an Aristotelian Thomist view of acts Acts Intentions and Moral Evaluation will be of interest to scholars and advanced students working in ethics just war theory the ethics of self defense and philosophy of action Intentions in Great Power Politics Sebastian Rosato, 2021-04-20 Why the future of great power politics is likely to resemble its dismal past Can great powers be confident that their peers have benign intentions States that trust each other can live at peace those that mistrust each other are doomed to compete for arms and allies and may even go to war Sebastian Rosato explains that states routinely lack the kind of information they need to be convinced that their rivals mean them no harm Even in cases that supposedly involved mutual trust Germany and Russia in the Bismarck era Britain and the United States during the great rapprochement France and Germany and Japan and the United States in the early interwar period and the Soviet Union and United States at the end of the Cold War the protagonists mistrusted each other and struggled for advantage Rosato argues that the ramifications of his argument for U S China relations are profound the future of great power politics is likely to resemble its dismal past

*Vision and Certitude in the Age of Ockham* Katherine H. Tachau, 1988 When William of Ockham lectured on Lombard's Sentences in 1317-1319 he articulated a new theory of knowledge Its reception by fourteenth century scholars was however largely negative for it conflicted with technical accounts of vision and with their interpretations of Duns Scotus This study begins with Roger Bacon a major source for later scholastics efforts to tie a complex of semantic and optical explanations together into an account of concept formation truth and the acquisition of certitude After considering the challenges of Peter Olivi and Henry of Ghent Part I concludes with a discussion of Scotus's epistemology Part II explores the alternative theories

of Peter Aureol and William of Ockham Part III traces the impact of Scotus and then of Aureol on Oxford thought in the years of Ockham's early audience culminating with the views of Adam Wodeham Part IV concerns Aureol's intellectual legacy at Paris the introduction of Wodeham's thought there and Autrecourt's controversies      *Anticipations and Purchases* Francis Thomas Juster, 2015-12-08 The author is concerned with whether or not surveys of consumer anticipations can improve predictions of purchase behavior relative to predictions that use only objective variables obtainable at the same date The basic objective of the study is improved predictions of changes over time Originally published in 1964 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      **PsychoBabbleJabble** Kurt D LaRose, 2021-02-09 This book will likely irritate every reader at some point One chapter is so bold it intones the good of a mother who kills her children The chapter does not say the murderous mother was a good woman or that she did a good thing it doesn't say that her actions should be without penalty or consequence The chapter suggests basically in a metaphoric and anecdotal ending that the mother loves the ones she killed PsychoBabbleJabble is full of these kinds of challenges this book is written and designed to tackle human judgment My work as a therapist a clinician and as a helper in different settings and in different states even I am licensed in Florida the District of Columbia and Missouri plus with my hypnosis training all of these play a role in this writing The reader will see and experience the maneuvering of words each used to explain and help promote understanding in how people's judgments are formed Many judgments are those that I like to call terminal thoughts For some reason or another certain thoughts are seemingly non negotiable to the holder of them With terminal thoughts in mind we all have them I'm able to using my writing go with the reader using their various lines of thinking as if their beliefs are absolutely true Then near each chapter ending I include an alternative and new perspective where a question about the once absolute belief is now wedged toward and in between a different belief Wedged meaning a small detail of alternative thought is strategically placed juxtaposition to a terminal thought that the reader once used or uses still maybe to hold up a rationale supporting truth By each chapter's end the belief is jolted loose a tiny bit hopefully It is in that jolting where a belief becomes finally questioned and questionable This text contains my best writing and some of my best clinical recall All of my training is included in some way in every part of this text the hypnosis training kicks my writing up a notch Here using people's RIGHTNESS as an ally in shaping a new belief I contradict the old truth while valuing it in key and passionate areas of what might be called life and the people that make it so That's what I'd say this book hopes to do to jolt loose just a little bit those absolute judgments we as humans may unknowingly without ill intent and possibly mistakenly hold as settled      **The Language of Thought in Late Medieval**

**Philosophy** Jenny Pelletier, Magali Roques, 2018-01-02 This edited volume presents new lines of research dealing with the language of thought and its philosophical implications in the time of Ockham It features more than 20 essays that also serve as a tribute to the ground breaking work of a leading expert in late medieval philosophy Claude Panaccio Coverage addresses topics in the philosophy of mind and cognition externalism mental causation resemblance habits sensory awareness the psychology illusion representationalism concepts universal transcendental identity syncategorematic logic and language definitions syllogisms modality supposition obligationes etc action theory belief will action and more A distinctive feature of this work is that it brings together contributions in both French and English the two major research languages today on the main theme in question It unites the most renowned specialists in the field as well as many of Claude Panaccio s former students who have engaged with his work over the years In furthering this dialogue the essays render key topics in fourteenth century thought accessible to the contemporary philosophical community without being anachronistic or insensitive to the particularities of the medieval context As a result this book will appeal to a general population of philosophers and historians of philosophy with an interest in logic philosophy of language philosophy of mind and metaphysics

**The Security Dilemmas of Southeast Asia** A. Collins, 2000-08-17 The Security Dilemmas of Southeast Asia utilises a key security concept to examine one of the most dramatic regions of the world Focusing on ethnic tensions intra ASEAN rivalries and the emergence of Chinese hegemony the security dilemma is used to provide insights into a wide range of the region s contemporary security issues In addition the book expounds upon some of the new uses of the security dilemma exploring both its applicability to ethnic tensions and a new variant a state induced security dilemma

*Studies in Metaphysics* Peter A. French, Theodore Edward Uehling, Howard K. Wettstein, 1979 *Studies in Metaphysics* was first published in 1979 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions

**The Resolution of Conflict** Morton Deutsch, 1973-01-01 The basic question to which this book is addressed is not how to eliminate or prevent conflict but rather how to make it productive or minimally how to prevent it from being destructive I shall not deal with situations of pure conflict in which inevitably one side loses what the other gains My interest is in conflict where there is a mixture of cooperative and competitive interests where a variety of outcomes is possible mutual loss gain for one and loss of the other and mutual gain Thus my query can be restated as an investigation of the conditions under which the participants will evolve a cooperative relationship or a competitive relationship in a situation which permits either from the introduction

**Theories of War and Peace** Michael E. Brown, Owen R. Cote, Jr., Sean M. Lynn-Jones, Steven E. Miller, 1998-09-15 New approaches to understanding war and peace in the changing international system What causes war How can wars be prevented Scholars and policymakers have sought the answers to these questions for centuries Although wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and

prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

**Multiagent Systems and Applications** Dennis Jarvis, Jacqueline Jarvis, Ralph Ronnquist, Lakhmi C. Jain, 2012-12-14 Since its conception almost 30 years ago the BDI Belief Desire Intention model of agency has become established along with Soar as the approach of choice for practitioners in the development of knowledge intensive agent applications However in developing BDI agent applications for over 15 years the authors of this book have observed a disconnect between what the BDI model provides and what is actually required of an agent model in order to build practical systems The GORITE BDI framework was developed to address this gap and this book is written for students researchers and practitioners who wish to gain a practical understanding of how GORITE is used to develop BDI agent applications In this regard a feature of the book is the use of complete annotated examples As GORITE is a Java framework a familiarity with Java or a similar language is assumed but no prior knowledge of the BDI model is required

**Intelligent Agents VIII** John-Jules C. Meyer, Milind Tambe, 2002-06-19 This volume is the eighth in the Intelligent Agents series associated with the ATAL workshops These workshops on Agent Theories Architectures and Languages have established themselves as a tradition and play the role of small but internationally well known conferences on the subject where besides theory per se also integration of theory and practice is in focus Specifically ATAL dresses issues of theories of agency software architectures for intelligent agents methodologies and programming languages for realizing agents and software tools for applying and evaluating agent based systems ATAL 2001 featured two special tracks in which both the more theoretical formal and the more practical aspects were present viz Formal Theories of Negotiation organized by Frank Dignum and Agents for Hand Held Mobile or Embedded Devices organized by Tim Finin There was also an extra session on RoboCup Rescue organized and presented by Satoshi Tadokoro and Ranjit Nair ATAL 2001 attracted 68 papers from over 20 countries all over the world of which 30 were selected for presentation at the workshop and publication in this volume We invited two outstanding speakers Fausto Giunchiglia Trento Italy and Tom Dean Brown USA

**Being Amongst Others** Eric Chelstrom, 2009-03-26 Our world can be a bewildering place The sense of awe and wonder at the states of affairs in which we find ourselves immersed give rise to philosophical questions Philosophical reflection is a critical attempt to come to grips with our place in the world and the various problems we encounter in respect

to the complexities encountered in everyday life In the most basic terms phenomenology is the study of the structures and relations of phenomena Phenomenology begins from a descriptive analysis of our experiences of the world It grants precedent to the first person perspective how phenomena appear to consciousness There are any number of problems related to the plenitude of kinds of experiences which confront us through the course of our lives in addition to the structure of consciousness itself This volume presents a variety of views on a number of the phenomena of our everyday lives offering positions on such things from the nature of consciousness to the structures of religious or political experiences Its appeal however should not be limited to philosophers alone given that all persons can relate to the subject matter of the essays For instance one author asks what is friendship The present work may also be understood as a gesture toward bridging the division between the valuable insights of continental and analytic philosophical traditions The authors include a combination of established academics such as Jeffrey Wattles the best selling author of The Golden Rule and young scholars from varied philosophical backgrounds This collection is divided into four sections I Foundational Elements of Experience II The Experiencing Subject What is it to be a Subject III Amongst Others The Social World and IV Social Objects and Institutions Each section represents a level of experience from the most basic structures of experience to the subject's experience of the world and objects in it to experiences and interactions with others ending at the results of the codifications of certain social practices and beliefs The sections treat their respective topics principally even if they share material with other essays Our experiences of the life world the world of human praxis contain a multiplicity of elements the divisions of this work are meant to demarcate various types of phenomena not to offer any definitive thesis regarding a hierarchy or structure of relations

**A Defense of Abortion** David Boonin, 2003 David Boonin has written the most thorough and detailed case for the moral permissibility of abortion yet published Critically examining a wide range of arguments that attempt to prove that every human fetus has a right to life he shows that each of these arguments fails on its own terms He then explains how even if the fetus does have a right to life abortion can still be shown to be morally permissible on the critic of abortion's own terms

**Counter-Terrorism Community Engagement** Jason Hartley, 2021-04-19 This book offers insights into the building of trust in Muslim communities through community engagement in a climate of counter terrorism Police engagement with Muslim communities is complex with a history of distrust This book first attempts to understand the role and implications of uncertainty on community engagement in Muslim communities and then explores the cultural nuances associated with the demonstration of trustworthiness and decisions to bestow trust It further highlights the complexities and implications for Muslim leaders when trying to simultaneously engage police and appease their own communities the book exposes community perceptions of an over reaction by authorities that has moved suspicion from a handful of terrorists to the entire Muslim community resulting in problematic community perceptions that Muslim communities are being targeted by police The findings suggest that the intentionality of police is a highly significant consideration in trust negotiations and reveals a

number of cultural preferences considered critical to trust negotiations The book further highlights opportunities to enhance the development of trust and avoid pitfalls that can be problematic to community engagement The lessons learned seek to enhance the existing body of literature regarding strategies and resources to improve counter terrorism community engagement with Muslim communities This book will be of much interest to students of counter terrorism preventing violent extremism deradicalization and security studies      Reid-Arg Philosophers Keith Lehrer, 2010-07-13 This book is available either individually or as part of the specially priced Arguments of the Philosophers Collection The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought Each book constitutes a detailed critical introduction to the work of a philosopher of major influence and significance The author's reason for writing this book is that the philosophy of Thomas Reid is widely unread while the combination of soundness and creativity of his work is unexcelled      *Cutting Rhythms* Karen Pearlman, 2012-08-21 This groundbreaking book presents a brand new methodology for improving a film edit      **Intelligent Agents V: Agents Theories, Architectures, and Languages** Jörg Müller, Munindar P. Singh, Anand S. Rao, 2007-04-29 The leading edge of computer science research is notoriously ckle New trends come and go with alarming and unfailing regularity In such a rapidly changing eld the fact that research interest in a subject lasts more than a year is worthy of note The fact that after ve years interest not only remains but actually continues to grow is highly unusual As 1998 marked the fth birthday of the International Workshop on Agent Theories Architectures and Languages ATAL it seemed appropriate for the organizers of the original workshop to comment on this remarkable growth and re ect on how the eld has developed and matured The rst ATAL workshop was co located with the Eleventh European Conference on Arti cial Intelligence ECAI 94 which was held in Amsterdam The fact that we chose an AI conference to co locate with is telling at that time we expected most researchers with an interest in agents to come from the AI community The workshop which was planned over the summer of 1993 attracted 32 submissions and was attended by 55 people ATAL was the largest workshop at ECAI 94 and the clear enthusiasm on behalf of the community made the decision to hold another ATAL workshop simple The ATAL 94 proceedings were formally published in January 1995 under the title Intelligent Agents and included an extensive review article a glossary a list of key agent systems and unusually for the proceedings of an academic workshop a full subject index The high scientific and production values embodied by the ATAL 94 proceedings appear to have been recognized by the community and resulted in ATAL proceedings being the most successful sequence of books published in Springer Verlag's Lecture Notes in Arti cial Intelligence series
