Big House on the Prairie John M. Eason, 2017-03-06 For the past fifty years America has been extraordinarily busy building prisons Since 1970 we have tripled the total number of facilities adding more than 1 200 new prisons to the landscape This building boom has taken place across the country but is largely concentrated in rural southern towns In 2007 John M Eason moved his family to Forrest City Arkansas in search of answers to key questions about this trend Why is America building so many prisons Why now And why in rural areas Eason quickly learned that rural demand for prisons is complicated Towns like Forrest City choose to build prisons not simply in hopes of landing jobs or

economic wellbeing but also to protect and improve their reputations For some rural leaders fostering a prison in their town is a means of achieving order in a rapidly changing world Taking us into the decision making meetings and tracking the impact of prisons on economic development poverty and race Eason demonstrates how groups of elite whites and black leaders share power Situating prisons within dynamic shifts that rural economies are undergoing and showing how racially diverse communities lobby for prison construction Big House on the Prairie is a remarkable glimpse into the ways a prison economy takes shape and operates *The Five Towns* Leslie Tonner, 2015-05-05 Set against the backdrop of post World War II America this sweeping novel follows three very different families as they search for love and fulfillment in Long Island's fabled gilded ghetto the Five Towns In 1950 the Five Towns are a burgeoning suburban destination for those in search of a better life Arthur Freundlich is one of those pioneers With the recent influx of Jews to Long Island the former GI has relocated his mother pregnant wife and three year old daughter from a tiny apartment in Queens to a split level house in Cedarhurst a world apart from the cramped quarters of Brooklyn and Queens that Arthur knew In his wealthy insulated corner of this formerly WASP y small town community Harvard educated John Dodge lives with his wife and their son Christopher who causes a scandal when he falls in love with beautiful Jewish Melanie Miller A black woman struggling to raise her family in turbulent times Lulu Pearce leaves blue collar Inwood every morning to work as a maid in middle class homes in Woodmere But an unwanted pregnancy could forever alter the course of her future As America comes of age these three families battle bigotry racism and dramatically changing mores in one of Long Island's most famous suburban enclaves

Fitchen,2019-04-02 Rural America as a place and a way of life is undergoing major transformation The farm crisis and the decline of manufacturing dealt a double blow to the rural economy in the 1980s Rural communities continue to lose farms factories and young people Rural lands are increasingly being sought as places for vacation homes state prisons and waste dumps Rural people are ambivalent about new residents and activities that are coming in and unsure of their own rural identity Old assumptions about rural life and rural community are now open to question Based on years of field observations

and hundreds of interviews in fifteen rural counties in upstate New York Fitchen's book explores these interconnected changes It describes the financial stress in dairy farming and the efforts families made to hold onto their farms It records the stunned disbelief and difficult adjustment of rural factory workers and small communities as local plants shut down The author chronicles the struggles of communities plagued by toxic chemicals in their drinking water and of young families slipping farther into poverty She reports on some communities that are campaigning to win a state prison and others that are protesting against a proposed radioactive waste dump The book illustrates the persistence of rural ingenuity and determination but argues that these alone cannot solve the problems of rural America A well informed federal and state commitment is necessary With policies and programs appropriate for rural situations most communities could adapt creatively to the changes integrate around a new rural identity and survive into the twenty first century as enduring social settings for their residents

Sustainable Development in the Southeastern Coastal Zone F. John Vernberg,Winona B. Vernberg,Thomas Siewicki,1996 Rapid population growth in the southeastern coastal zone has had an important influence on both resource management policy at the federal state

regional and local levels and the findings of environmental impact studies These twenty six papers represent a variety of disciplines and such topics as policy in its broadest sense environmental resources and population trends Jacket **Trends in Social Cohesion** Council of Europe,2012-01-01 Annotation We are at a point in history where economic inequalities are more widespread each day The situation of extreme poverty experienced by the majority of the populations in developing countries Third World countries often coincides with an absence of democracy and the violation of the most fundamental rights But in so called First World countries a non negligible proportion of inhabitants also live in impoverished conditions albeit mainly relative poverty and are denied their rights The European situation which this publication aims to analyse is painful the entire continent is afflicted by increasing poverty and consequently by the erosion of living conditions and social conflicts The economic and financial crisis has resulted in the loss of millions of jobs and created job insecurity for many still working Economic insecurity raises social tensions aggravating xenophobia for instance Yet the economic and financial crisis could present a good opportunity to rethink the economic and social system as a whole Indeed poverty in modern societies has never been purely a question of lack of wealth It is therefore urgent today to devise a new discourse on poverty In pursuit of this goal the Council of Europe is following up this publication in the framework of the project Human rights of people experiencing poverty co financed by the European Commission Growing Smarter Robert D. Bullard,2007-01-12 The smart growth movement aims to combat urban and suburban sprawl by promoting livable communities based on pedestrian scale diverse populations and mixed land use But as this book documents smart growth has largely failed to address issues of social equity and environmental justice Smart growth sometimes results in gentrification and displacement of low and moderate income families in existing neighborhoods or transportation policies that isolate low income populations Growing Smarter is one of the few books to view smart growth from an environmental justice perspective examining the effect of the built environment on access to economic opportunity and quality of life in American cities and metropolitan regions The contributors to Growing Smarter urban planners sociologists economists educators lawyers health professionals and environmentalists all place equity at the center of their analyses of place space and race They consider such topics as the social and environmental effects of sprawl the relationship between sprawl and concentrated poverty and community based regionalism that can link cities and suburbs They examine specific cases that illustrate opportunities for integrating environmental justice concerns into smart growth efforts including the dynamics of sprawl in a South Carolina county the debate over the rebuilding of New Orleans after Hurricane Katrina and transportation related pollution in Northern Manhattan Growing Smarter illuminates the growing racial and class divisions in metropolitan areas today and suggests workable strategies to address them Environmental Law Reporter ,2000 **Counting Heads** David Marusek,2007-10-16 Counting Heads is David Marusek s extraordinary launch as an SF novelist The year is 2134 and the Information Age has given rise to the Boutique Economy in which mass production and mass consumption are rendered

obsolete Life extension therapies have increased the human lifespan by centuries Loyal mentars artificial intelligences and robots do most of society s work The Boutique Economy has made redundant ninety nine percent of the world s fifteen billion human inhabitants The world would be a much better place if they all simply went away Eleanor K Starke one of the world s leading citizens is assassinated and her daughter Ellen is mortally wounded Only Ellen the heir to her mother s financial empire is capable of saving Earth from complete domination plotted by the cynical selfish immortal rich that is if she survives Her cryonically frozen head is in the hands of her family s enemies A ragtag ensemble of unlikely heroes join forces to rescue Ellen s head all for their own purposes Counting Heads arrives as a science fiction novel like a bolt of electricity galvanizing readers with an entirely new vision of the future
