*The Other Perennial Philosophy* Alan M. Laibelman, 2000-10-25 *The Other Perennial Philosophy A Metaphysical Dialectic* seeks to synthesize the many fields within science philosophy and religion to achieve the most comprehensive picture ever constructed to incorporate universally held beliefs about God man and the universe This book attempts to accomplish several interrelated purposes to describe the Perennial Philosophy in its depth to analyze the critical elements contained within such a body of thought to bring to light the vast literature of views which are oppositional at least on some level to those contained in the Perennial Philosophy to synthesize these seemingly discordant thoughts into a new vision of the nature of reality to dissect the implications of this new model and lastly and perhaps most importantly to demonstrate that intellect has no innate constraints This book rigorously explores the connections to be made by weaving together the threads of philosophy religious theology mysticism mythology mathematics physics and biochemistry In this study is both a critique and an homage to Perennial Philosophy In evoking a new vision of reality which is at the same time a modernized version of an old image *The Other Perennial Philosophy A Metaphysical Dialectic* seeks to entice readers to rethink their own views on a subject of crucial importance to all This book will appeal to anyone interested in philosophy and religion **Going Against the Flow**

Alan M. Laibelman, 2004 Most contemporary efforts in philosophy treat metaphysics and ethics as isolated arenas of thought Critical analytical exploration of a multitude of ethical theories emanating from historically diverse philosophical and theological traditions demonstrates that a consistent and comprehensive ethic depends upon a solid metaphysical foundation Building upon a metaphysical scheme first explicated in *The Other Perennial Philosophy A Metaphysical Dialectic* Alan M Laibelman elaborates on a syncretistic ethical system incorporating elements from many cross cultural sources and also develops an extensive theory of consciousness inclusive of both transcendental and existential components

**Discreteness, Continuity, & Consciousness** Alan M. Laibelman, 2007 This volume is the third in elaboration of a self consistent and comprehensive philosophical system comprising the areas of metaphysics volume one ethics volume two and epistemology volume three Consciousness is conceived as the principal transcendental agency bringing all of manifestation into existence The current work focuses on methods of cognition sensory representations ratiocination intuition mystical revelation and the parapsychological skills pertaining to telepathy clairvoyance and precognition The discipline of psychophysics is conceived as the unifier for all modalities There is developed both a qualitative and a quantitative mechanism for gaining knowledge Knowledge accumulation was proposed in volume two to be the ethical goal of all lifeforms The purpose toward which that goal is placed in service is in resolution of the metaphysical crisis detailed in volume one

Christopher Ocker, Susanna Elm, 2020-02-26 This collection of essays offers a series of rigorously focused art historical and philosophical studies that examine ways in which materiality has posed and still poses a religious and cultural problem. The volume examines the material agency of objects, artifacts, and environments; art, ritual, pilgrimage, food, and philosophy. It studies the variable senses of materiality, the place of materiality in the formation of modern Western religion, and its role in Christianity's dialogue with non-Western religions. The essays present new interpretations of religious rites and outlooks through the focus on their material components. They also suggest how material engagement theory, a new movement in cultural anthropology and archaeology, may shed light on the cultural history of Christianity in medieval and early modern Europe and the Americas. It thus fills an important lacuna in the study of Western religion by highlighting the longue durée from the Middle Ages to the Modern Period of a current dilemma, namely, the divide between materialistic and what might broadly be called hermeneutical or cultural critical approaches to religion and human subjectivity. **Lectures**

**on Negative Dialectics** Theodor W. Adorno, 2014-11-05 This volume comprises one of the key lecture courses leading up to the publication in 1966 of Adorno's major work *Negative Dialectics*. These lectures focus on developing the concepts critical to the introductory section of that book. They show Adorno as an embattled philosopher defining his own methodology among the prevailing trends of the time. As a critical theorist, he repudiated the worn-out Marxist stereotypes still dominant in the Soviet bloc; he specifically addresses his remarks to students who had escaped from the East in the period leading up to the building of the Berlin Wall in 1961. Influenced as he was by the empirical schools of thought he had encountered in the United States, he nevertheless continued to resist what he saw as their surrender to scientific and mathematical abstraction. However, their influence was potent enough to prevent him from reverting to the traditional idealisms still prevalent in Germany, or to their latest manifestations in the shape of the new ontology of Heidegger and his disciples. Instead, he attempts to define, perhaps more simply and fully than in the final published version, a negative, i.e., critical approach to philosophy. Permeating the whole book is Adorno's sense of the overwhelming power of totalizing, dominating systems in the post-Auschwitz world. Intellectual negativity therefore commits him to the stubborn defence of individuals, both facts and people who stubbornly refuse to become integrated into the administered world. These lectures reveal Adorno to be a lively and engaging lecturer. He makes serious demands on his listeners but always manages to enliven his arguments with observations on philosophers and writers such as Proust and Brecht, and comments on current events. Heavy intellectual artillery is combined with a concern for his students' progress. *A Critique of Jean-Paul Sartre's Ontology* M.A.

Natanson, 2012-12-06 Why is my pain perpetual and my wound incurable, which refuseth to be healed? Jeremiah. Existentialism today refers to faddism, decadentism, morbidity, the philosophy of the graveyard, to words like fear, dread, anxiety, anguish, suffering, aloneness, death, to novelists such as Jean-Paul Sartre, Dostoevski, Camus, Kafka, to philosophers like Kierkegaard, Heidegger, Marcel Jaspers, and Sartre, and because it refers to and is concerned with all of these ideas and persons.

existentialism has lost any clearer meaning it may have originally possessed Because it has so many definitions it can no longer be defined As Sartre writes Most people who use the word existentialism would be embarrassed if they had to explain it since now that the word is all the rage even the work of a musician or painter is being called existentialist A gossip columnist signs himself The Existentialist so that by this time the word has been so stretched and has taken on so broad a meaning that it no longer means anything at all 2 This state of definitional confusion is not an accidental or negligible matter An attempt will be made in this introduction to account for the confusion and to show why any definition of existentialism involves us in a tangle First however it is necessary to state in a tentative and very general manner what points of view are here intended when reference is made to existentialism

Auxier, Lucian Stone, 2001 This book looks at one of today's greatest thinkers and his influential writings on religion science history and Persian mysticism The text includes 33 critical essays by contemporary scholars and Nasr's responses to each of them

*Theology in Global Context* Robert C. Neville, Amos Yong, Peter Heltzel, 2004-01-01 In this festschrift former students of Robert Cummings Neville and fellow theologians reflect critically on Neville's scholarship

**Philosophical Dialectics** Nicholas Rescher, 2007-06-01 A study in philosophical methodology aimed at providing a clear view of the scope and limits of philosophical inquiry
