Otto Wagner Adolf Loos And The Road To Modern Architecture:

Otto Wagner, Adolf Loos, and the Road to Modern Architecture Werner Oechslin, 2002-07-04 Contemporary architectural theory emphasizes the importance of tectonics the term used to articulate the relationship among construction structure and architectural expression Yet little consideration has been given to the term s origins or historical significance In this study Oechslin examines the attempts by early Modern theoreticians of architecture to grapple with the relationship between appearance and essence He locates the culmination of this search for truth in architectural expression in the work of Adolf Loos and the writings of theorists such as B tticher Le Corbusier and Lux **Introducing Architectural Tectonics** Chad Schwartz, 2016-10-04 Introducing Architectural Tectonics is an exploration of the poetics of construction Tectonic theory is an integrative philosophy examining the relationships formed between design construction and space while creating or experiencing a work of architecture In this text author Chad Schwartz presents an introductory investigation into tectonic theory subdividing it into distinct concepts in order to make it accessible to beginning and advanced students alike The book centers on the tectonic analysis of twenty contemporary works of architecture located in eleven countries including Germany Italy United States Chile Japan Bangladesh Spain and Australia and designed by such notable architects as Tadao Ando Herzog de Meuron Kengo Kuma Olson Kundig and Peter Zumthor Although similarities do exist between the projects their distinctly different characteristics location and climate context size program construction methods and range of interpretations of tectonic expression provide the most significant lessons of the book helping you to understand tectonic theory Written in clear accessible language these investigations examine the poetic creation of architecture showing you lessons and concepts that you can integrate into your own work whether studying in a university classroom or practicing in a professional office **Nelson Goodman and Modern Architecture** Kasper Lægning, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman s aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman s aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman s concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman s framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory

Architect's Drawings A Selection of Sketches by World Famous Architects through History, 2025-08-31 Architect's Drawings A Selection of Sketches by Architects Through History is a fascinating journey into the role of sketches in the design process From the Renaissance to contemporary practice this book explores how architects have used drawings not just as technical tools but as instruments of imagination inspiration and communication

Building Theories Franca Trubiano, 2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mzi res Boullé Laugier Rondelet Semper Viollet le Duc Hbsch Btticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

The Baroque in Architectural Culture, 1880-1980 Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume Space Time and Architecture Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As

Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture *Setting the Scene* Alistair Fair, 2016-03-03

During the twentieth century an increasingly diverse range of buildings and spaces was used for theatre Theatre architecture was re formed by new approaches to staging and performance while theatre was often thought to have a reforming role in society Innovation was accompanied by the revival and reinterpretation of older ideas The contributors to this volume explore these ideas in a variety of contexts from detailed discussions of key architects work including Denys Lasdun Peter Moro Cedric Price and Heinrich Tessenow to broader surveys of theatre in West Germany and Japan Other contributions examine the Malm Stadsteater ideal theatres in post war North America found space in 1960s New York and Postmodernity in 1980s East Germany Together these essays shed new light on this complex building type and also contribute to the wider architectural history of the twentieth century **Vienna** Richard Cockett, 2023-11-07 How can one European capital be responsible for most of the West s intellectual and cultural achievements in the twentieth century Viennese ideas saturate the modern world From California architecture to Hollywood Westerns modern advertising to shopping malls orgasms to gender confirmation surgery nuclear fission to fitted kitchens every aspect of our history science and culture is in some way shaped by Vienna The city of Freud Wittgenstein Mahler and Klimt was the melting pot at the heart of a vast metropolitan empire But with the Second World War and the rise of fascism the dazzling coteries of thinkers who squabbled debated and called Vienna home dispersed across the world where their ideas continued to have profound impact Richard Cockett gives us the entirety of this extraordinary story Tracing Vienna s rich intellectual history from psychoanalysis to Reaganomics Cockett encompasses everything from the communist rebels of Red Vienna to the neoliberal economists of the Austrian School This is the panoramic account of how one city made the modern world and how we all remain inescapably Viennese *Ornament*

and *European Modernism* Loretta Vandi, 2017-09-22 These in depth historical and critical essays study the meaning of ornament the role it played in the formation of modernism and its theoretical importance between the mid nineteenth century and the late twentieth century in England and Germany Ranging from Owen Jones to Ernst Gombrich through Gottfried Semper Alois Riegl August Schmarsow Wilhelm Worringer Adolf Loos Henry van de Velde and Hermann Muthesius the contributors show how artistic theories are deeply related to the art practice of their own times and how ornament is imbued with historical and social meaning

Pretty Rosalind Galt, 2011-05-31 Film culture often rejects visually rich images treating simplicity austerity or even ugliness as the more provocative political and truly cinematic choice Cinema may challenge traditional ideas of art but its opposition to the decorative represents a long standing Western aesthetic bias against feminine cosmetics Oriental effeminacy and primitive ornament Inheriting this patriarchal colonial perspective which treats decorative style as foreign or sexually perverse filmmakers critics and theorists have often denigrated colorful picturesque and richly patterned visions in cinema Condemning the exclusion of the pretty from masculine film culture Rosalind Galt reevaluates received ideas about the decorative impulse from early film criticism to classical and postclassical film theory The pretty embodies lush visuality dense mise en scene painterly framing and arabesque camera movements styles increasingly central to world cinema From European art cinema to the films of Wong Kar wai and Santosh Sivan from the experimental films of Derek Jarman to the popular pleasures of Moulin Rouge the pretty is a vital element of contemporary cinema communicating distinct sexual and political identities Inverting the logic of anti pretty thought Galt firmly establishes the decorative image as a queer aesthetic uniquely able to figure cinema's perverse pleasures and cross cultural encounters Creating her own critical tapestry from perspectives in art theory film theory and philosophy Galt reclaims prettiness as a radically transgressive style shimmering with threads of political agency

Architecture Oriented Otherwise David Leatherbarrow, 2012-04-17 So much writing about architecture tends to evaluate it on the basis of its intentions how closely it corresponds to the artistic will of the designer the technical skills of the builder or whether it reflects the spirit of the place and time in which it was built making it not much more than the willful or even subconscious assemblage of objects that result from design and construction techniques Renowned writer and thinker David Leatherbarrow in this groundbreaking new book argues for a richer and more profound but also simpler way of thinking about architecture namely on the basis of how it performs Not simply how it functions but how it acts its manner of existing in the world including its effects on the observers and inhabitants of a building as well as on the landscape that situates it In the process Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances intended and otherwise of buildings

Seeing and Beyond Deborah J. Johnson, David Ogawa, Kermit Swiler Champa, 2005 This volume is an exciting eclectic collection of essays in honor of Kermit S Champa a leading scholar of impressionism and critic of twentieth century art The lead essay by David

Carrier is followed by others from several generations of scholars and museum curators trained by Professor Champa. Together they cover an extremely wide historical range from the eighteenth to twenty first centuries and honor Professor Champa's own scholarly rigor, methodological diversity and intellectual breadth through topics ranging from art history to cultural studies. Germany's other modernity Leif Jerram, 2018-09-30 This book is about what it meant to build a city in Germany at the turn of the twentieth century. It explores the physical spaces and mental attitudes that shaped lives, restructured society and conditioned beliefs about the past and expectations for the future in the crucial German generations that formed the young Reich, fought the Great War and experienced the Weimar Republic. Focusing on ordinary buildings and the way they shaped ordinary lives, this study shows how material space could influence the lives of citizens from the ways the elderly slept at night to the economy of the city as a whole. It also shows how we integrate the spaces and places of our lives into our explanations of politics, culture and economics. It is aimed at those who want to understand urban modernity, Wilhelmine and Weimar Germany, the use of space in social policy and politics and the design of cities.

Schindler, Kings Road, and Southern California Modernism Robert Sweeney, Judith Sheine, 2012-10-30 This book establishes R M Schindler's Kings Road House amongst the icons of modernist housing as crucial as Le Corbusier, Walter Gropius, Mies van der Rohe or Frank Lloyd Wright to the story of twentieth century residential design. Weaving together an impressive blend of primary sources, Sweeney and Sheine illuminate heretofore unknown or neglected stories regarding Schindler's life, his relationship with his mentors, most notably Wright himself and the development of his unique theories about space. These essays will interest both scholars and practitioners of architecture as well as readers wishing to learn more about the development of architectural modernism in general.
