

A black and white photograph of two people rappelling down a steep, rocky cliff face. The person on the right is higher up, and the person on the left is lower down. They are both wearing helmets and harnesses. The background shows a vast, open landscape with a body of water and distant mountains.

Our Common Journey A Pioneering Approach To Cooperative Environmental Management:

Our Common Journey Paul E. de Jongh, Seán Captain, 1999 Our Common Journey is an insider account told through dozens of candid interviews with leading business and environmental experts around the world De Jongh's co author Sean Captain provides an American perspective and renders the concepts fully accessible to an English speaking audience making the book a global guide to a sustainable planet Jacket

Ibss: Economics: 1999 Compiled by the British Library of Political and Economic Science, 2000-12-07 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Environmental Integration Ton Bührs, 2009-04-09 The environmental challenges facing humankind can most effectively be met through environmental integration incorporating environmental considerations into everyday human thinking behavior and practices at both the individual and collective levels Increasingly people and organizations throughout the world are taking the environment into account but at the same time there is insufficient integration of attitudes policies and programs People and groups have different and often conflicting views and interpretations of what is desirable or required to protect the environment Environmental Integration looks at the ways that governments can play a crucial role in advancing promoting and shaping a singular integrated environmental policy

Environmental Contracts: Comparative Approaches to Regulatory Innovation in the United States and Europe Eric W. Orts, Kurt Deketelaere, 2001-03-20 Environmental regulation has come of age in recent decades as the blunt methods of command and control have been subjected to trenchant criticism from both economists and lawyers in the United States and Europe As a result of this intellectual development as well as continuing and increasing severity of environmental problems there is a need for fresh thinking about regulatory methods that are rational from both economic and legal points of view This book focuses on the viability of one particular regulatory innovation the use of agreements or contracts for environmental regulation as it has been practised in the United States and Europe The various contributions explore the general idea that certain kinds of environmental problems may best be addressed through contracts among interested parties including representatives of various levels of government business local community and employment representatives and public interest groups The parties get together to discuss a particular problem and then agree to an agreement or contract designed to address key issues and interests At least in some situations this approach may yield greater flexibility stronger commitment and more creative outcomes than traditional command and control regulation Experiments in the use of environmental contracts have begun on both sides of the Atlantic a fact which makes the comparative study offered here especially timely and valuable

The Social Construction of Climate Change Mary E. Pettenger, 2016-02-24 Individuals international organizations and states are calling for the world to confront climate change Efforts such as the Kyoto Protocol have produced intractable disputes and are deemed inadequate This volume adopts two constructivist perspectives norm

centred and discourse to explore the social construction of climate change from a broad theoretical level to particular cases The contributors contend that climate change must be understood from the context of social settings and that we ignore at our peril how power and knowledge structures are generated They offer a greater understanding of why current efforts to mitigate climate change have failed and provide academics and policy makers with a new understanding of this important topic

A Thousand Shades of Green Peter Winsemius,Ulrich Guntram,2013-06-17 What does it mean for the environment is a strategic corollary of almost any significant business decision today and companies must take seriously their responsibilities to regulators customers employees and the wider society A Thousand Shades of Green is aimed at business leaders in need of a clear understanding of the key corporate environmental challenges and the insight and vision to meet them imperatives such as engaging stakeholders and developing partnerships understanding the policy making process forming corporate responses and drafting environmental management strategies with the promise of genuine competitive advantage for their companies Drawing on their extensive consultancy experience with some of the most progressive companies around the world the authors examine why and how businesses must confront the rapidly developing agenda set by environmental constraints and social and regulatory pressure They identify the corporate environmental challenge with that of change management and advocate a recognition that there is no single strategy or endgame applicable to all companies there are a thousand shades of green Only by pursuing thorough reflective consistent competitive and proactive strategies will businesses be able to avoid being embroiled in costly and complex reactive approaches

Leading Change toward Sustainability Bob Doppelt,2017-09-08 As the world struggles to cope with the growing

threat of a global carbon crisis Doppelt has revised one of the best books ever written about change management leadership and sustainability to focus on de carbonisation Doppelt s research presented in this hugely readable book demystify the sustainability change process by providing a theoretical framework and a methodology that managers can use to successfully transform their organisations to embrace sustainable development Filled with case examples interviews and checklists on how to move corporate and governmental cultures toward sustainability the book argues that the key factors that facilitate change appear in the successful efforts at companies such as AstraZeneca Nike Starbucks IKEA Chiquita Interface Swisscom and Norm Thompson and in governmental efforts such as those in the Netherlands and Santa Monica in California For these and other cutting edge organisations leading change is a philosophy for success Leading Change toward Sustainability has been used by change leaders around the world to guide their internal global warming and sustainability organisational change initiatives This new edition is essential reading for leaders from all types of organisations

A Survey of Sustainable Development Jonathan Harris, Timothy Wise, Kevin Gallagher, Neva R. Goodwin, 2013-04-16 Perpetual economic growth is physically impossible on a planet with finite resources Many concerned with humanity s future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals Sustainable development brings together elements of economics public policy sociology ecology resource management and other related areas and while the term has become quite popular it is rarely defined and even less often is it understood A Survey of Sustainable Development addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic The volume offers ten sections on topics including economic and social dimensions of sustainable development the North South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature followed by two to three page abstracts of the most important articles or book chapters on the topic A Survey of Sustainable Development is the sixth and final volume in the Frontier Issues of Economic Thought series produced by the Global Development And Environment Institute at Tufts University Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study The book is an essential reference for students and scholars concerned with economics environmental studies public policy and administration international development and a broad range of related fields

Environmentalism of the Poor Joan Martínez-Alier, 2003-01-01 This is a wonderful book rich in empirical detail full of theoretical insights offering hope in a bleak world altogether inspiring a tremendous achievement of having helped to create the disciplines of ecological economics and political ecology bringing them alive in this book and making their insights available to the developing worldwide movement for environmental justice Pat Devine Environmental Values Any book by the ecological economist Joan Martinez Alier is a Big Publishing Event this is a book by a writer who loves his subject knows it well respects its history and is driven by the desire to do justice These are qualities enough to send you to the bookshop or the library in search of The Environmentalism of the Poor Andrew Dobson Environment Politics The book is a worthy and in depth contribution to debates about political ecology and ecological economics It should be read by all environmental and ecological economists who wish to make their analysis more relevant Tim Forsyth Progress in Development Studies A marvellous combination of insight research and activism A must read for policymakers practitioners and academics alike and for anyone concerned with sustainable development environmentalism or poverty alleviation Human Ecology Journal one of the most important environmental books to have been published recently Martinez Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics Eurig Scandrett Friends of the Earth Scotland The book has three main strengths its bibliography which is extensive the global perspective on the environmental movement and the relationship with poverty and the general theme of this interdisciplinary work which is not so much to provide new information but to consider the existing information in a new light Martinez Alier is to be commended for taking such a step in the literature the writing style is extremely approachable Recommended B J Peterson Choice Joan Martinez Alier combines the honest discipline of a scholar with the passionate energy of an activist The result The Environmentalism of the Poor is highly recommended Herman E Daly University of Maryland College Park US The Environmentalism of the Poor has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them The book analyses several manifestations of the growing environmental justice movement and also of popular environmentalism and the environmentalism of the poor which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society The author studies in detail many ecological distribution conflicts in history and at present in urban and rural settings showing how poor people often favour resource conservation The environment is thus not so much a luxury of the rich as a necessity of the poor It concludes with the fundamental questions who has the right to impose a language of valuation and who has the power to simplify complexity Joan Martinez Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross section of academics ecologists and environmentalists *Stopping Climate Change* Paul Ekins, 2023-11-30 Written by one of the leading experts in the field Paul Ekins Stopping Climate Change provides a comprehensive overview of what is required to achieve real zero carbon dioxide emissions by 2050 and negative

emissions thereafter which is the only way to stop human induced climate change This will require innovation in socio technical systems and in human behaviour on an unprecedented scale Stopping Climate Change describes the changes required to meet this goal in technologies social institutions and individual activities Paul Ekins examines in detail issues around the supply and demand of energy and materials and the efficiency of their use It also analyses greenhouse gas removal technologies offsetting and geoengineering and plots the reduction of the non CO2 greenhouse gas emitting activities Having set out the changes required Ekins considers the economic implications in terms of both the innovation and investments that are necessary to bring them about and the effects that these are likely to have on national economies The evidence presented points clearly to the economic impacts of decarbonisation being positive for the majority of countries and for the world as a whole even before considering the benefits of avoided climate change When the health benefits of stopping the burning of fossil fuels are factored in the global net benefits of decarbonisation are unequivocal Drawing on examples from the UK and Europe but with wider relevance at a global scale Stopping Climate Change clearly shows how determined policy action at different levels could stop climate change It will be of great interest to students scholars and policymakers researching and working in the field of climate change and energy policy Europe and Global Climate Change Paul G. Harris,2007-01-01 This book is likely to become the definitive study on European global climate change politics Its focus on the formulation ratification and implementation of the Kyoto Protocol within Europe make it essential reading for all who wish to understand how domestic foreign policy influenced the European Union s decision to ratify the Kyoto Protocol despite the United States decision to abandon the agreement The book provides important historical background case studies of the most influential European countries to shape the Kyoto Protocol and an assessment of what enlargement means for the implementation of the agreement It also examines how Europe s policies have shaped and been shaped by participation in the Kyoto negotiation and implementation processes It will be an important item for the libraries of any institution or scholar with an interest in the role of Europe in addressing climate change Miranda Schreurs University of Maryland US The core objective of this book is to better understand the role of foreign policy the crossovers and interactions between domestic and international politics and policies in efforts to preserve the environment and natural resources Underlying this objective is the belief that it is not enough to analyze domestic or international political actors institutions and processes by themselves We need to understand the interactions among them something that explicit thought about foreign policy can help us do The eclectic group of contributors explore European and EU responses to global climate change and provide insights into issues on environmental protection sustainable development international affairs and foreign policy *Business, Government and Sustainable Development* Gerard Keijzers,2005 Keijzers provides an introduction to the evolution of the collaborative stakeholder approach to sustainable development in the context of changing environmental policies **Something New Under the Sun** J. R. McNeill,2001-04-17 Traces the history of environmental change around the world in the twentieth

century its human causes and consequences **Sustainability** Bryan G. Norton, 2010-11-15 While many disciplines contribute to environmental conservation there is little successful integration of science and social values Arguing that the central problem in conservation is a lack of effective communication Bryan Norton shows in *Sustainability* how current linguistic resources discourage any shared multidisciplinary public deliberation over environmental goals and policy In response Norton develops a new interdisciplinary approach to defining sustainability the cornerstone of environmental policy using philosophical and linguistic analyses to create a nonideological vocabulary that can accommodate scientific and evaluative environmental discourse Emphasizing cooperation and adaptation through social learning Norton provides a practical framework that encourages an experimental approach to language clarification and problem formulation as well as an interdisciplinary approach to creating solutions By moving beyond the scientific arena to acknowledge the importance of public discourse *Sustainability* offers an entirely novel approach to environmentalism **Partnering for the Environment** Eric C. Poncelet, 2004-02-10 Environmental policy domains are increasingly adopting strategies of cooperation over those of conflict Decision making processes founded upon collaboration and public participation are receiving more attention and favor and in turn engendering multistakeholder environmental partnerships In his thoughtful analysis Eric C Poncelet seeks to illuminate the mechanics of these partnerships especially at the level of social interaction Drawing on ethnographic research performed with four case study partnerships in the European Union and the United States Poncelet focuses on the diverging ways that stakeholders think talk and conventionally act with regard to the environmental issues at stake Also explored are the roles of environmental partnerships as sites of personal transformation where participants and their perspectives conceptualizations and expectations can and do change *Partnering for the Environment* concludes by examining the broader implications of multistakeholder partnerships for the future of environmental decision making and suggests ways by which these partnerships may be more effectively used and managed **Choice** ,2000 **Sustainable food production and ethics** Werner Zollitsch, Christoph Winckler, Susanne Waiblinger, Alexander Haslberger, 2023-08-28 Sustainability has become an issue widely debated in many countries Given the central role of food supply and the emotional relationship that modern mankind still has to its food sustainability is seen as a value which has to be maintained throughout food supply chains The complexity of modern food systems invokes a variety of ethical implications which emerge from contrasts between ideals perceptions and the conditions of technical processes within food systems and the concerns connected to this This book covers a broad range of aspects within the general issue of sustainable food production and ethics Linking different academic disciplines topics range from reflections about the roots of sustainability and the development of concepts and approaches to globalisation and resilience of food systems as well as specific ethical aspects of organic farming and animal welfare Modern technologies which are intensely advocated by certain stakeholder groups and their societal challenges are addressed as are many other specific cases of food production and processing consumer

perception and marketing
