

A photograph of a sunset over a mountain range. The sun is low on the right side, casting a warm orange glow across the sky and the silhouetted mountains. The quote is centered in the upper half of the image, overlaid on a dark, semi-transparent rectangular background.

All our knowledge – past, present,
and future – is nothing compared
to what we will never know.

Our Knowledge Of The Past:

Michael Oakeshott and the Cambridge School on the History of Political Thought Martyn P.

Thompson, 2019-05-20 This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought drawing upon Michael Oakeshott's analysis of the logic of historical enquiry While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute The first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds The second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy In addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents An important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies

Our Knowledge of the Past

Aviezer Tucker, 2009-10-01 This book presents a philosophical analysis of the disciplines that reveal scientific knowledge of the past Aviezer Tucker argues that historiography as a scientific discipline should be considered an attempt to analyze the evidence of past events This new approach to historiography will interest philosophers historians and social scientists concerned with the methodological foundations of their disciplines

How Physics Makes Us Free

J. T. Ismael, 2016-02-03 In 1687 Isaac Newton ushered in a new scientific era in which laws of nature could be used to predict the movements of matter with almost perfect precision Newton's physics also posed a profound challenge to our self understanding however for the very same laws that keep airplanes in the air and rivers flowing downhill tell us that it is in principle possible to predict what each of us will do every second of our entire lives given the early conditions of the universe Can it really be that even while you toss and turn late at night in the throes of an important decision and it seems like the scales of fate hang in the balance that your decision is a foregone conclusion Can it really be that everything you have done and everything you ever will do is determined by facts that were in place long before you were born This problem is one of the staples of philosophical discussion It is discussed by everyone from freshman in their first philosophy class to theoretical physicists in bars after conferences And yet there is no topic that remains more unsettling and less well understood If you want to get behind the facade past the bare statement of determinism and really try to understand what physics is telling us in its own terms read this book The problem of free will raises all kinds of questions What does it mean to make a decision and what does it mean to say that our actions are

determined What are laws of nature What are causes What sorts of things are we when viewed through the lenses of physics and how do we fit into the natural order Ismael provides a deeply informed account of what physics tells us about ourselves The result is a vision that is abstract alien illuminating and Ismael argues affirmative of most of what we all believe about our own freedom Written in a jargon free style How Physics Makes Us Free provides an accessible and innovative take on a central question of human existence

The Truth of History C. Behan McCullagh, 2002-11 Modern relativism and postmodern thought in culture and language challenge the truth of history This book considers how historians confined by argument of their own cultures can still discover truths about the past

The Collected Papers of Bertrand Russell, Volume 10 John Slater, Assisted by Peter Köllner, 2024-12-11 During the period covered by this volume Bertrand Russell first retired from and then resumed his philosophical career In 1927 he published two philosophy books The Analysis of Matter and An Outline of Philosophy His next book in academic philosophy An Inquiry into Meaning and Truth was not published until 1940 Yet Russell published a significant amount of essays and popular books between 1927 and 1946 mostly to finance the running of Beacon Hill School and his growing family Those years also saw his break up with Dora Russell his marriage to Patricia Peter Spence and a move of the family to the United States Volume 10 brings together Russell's writings on ethics politics religion and academic philosophy It is an invaluable guide to the thought and development of one of the most famous philosophers of this century

Lost Causes Jason B. Jones, 2006 What if we didn't always historicize when we read Victorian fiction Lost Causes shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than

the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from *The French Revolution* to *Middlemarch* that literature's engagement with history has to be read otherwise Perhaps perversely *Lost Causes* suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot *Lost Causes* demonstrates that history can carry an ontological as well as an epistemological charge one that suggests a condition of being in the world as well as a way of knowing the world as it really is From this point of view Victorian fiction that addresses the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history *Ayer-Arg Philosophers* John Foster, 2010-07-13 First Published in 1999 The purpose of this series is to provide a contemporary assessment and history of the entire course of philosophical thought Each book constitutes a detailed critical introduction to the work of a philosopher of major influence and significance Alfred Jules Ayer was born on 29 October 1910 and still flourishes Ayer's philosophical writings to date include fourteen books not to mention those he has edited and a host of essays articles and reviews

Thought and Reality Michael Dummett, 2006-10-05 In this short lucid rich book Michael Dummett sets out his views about some of the deepest questions in philosophy The fundamental question of metaphysics is what does reality consist of To answer this Dummett holds it is necessary to say what kinds of fact obtain and what constitutes their holding good Facts correspond with true propositions or true thoughts when we know which propositions or thoughts in general are true we shall know what facts there are in general Dummett considers the relation between metaphysics our conception of the constitution of reality and semantics the theory that explains how statements are determined as true or as false in terms of their composition out of their constituent expressions He investigates the two concepts on which the bridge that connects semantics to metaphysics rests meaning and truth and the role of justification in a theory of meaning He then examines the special semantic and metaphysical issues that arise with relation to time and tense On this basis Dummett puts forward his controversial view of reality as indeterminate there may be no fact of the matter about whether an object does or does not have a given property We have to relinquish our deep held realist understanding of language the illusion that we know what it is for any proposition that we can frame to be true independently of our having any means of recognizing its truth and accept that truth depends on our capacity to apprehend it Dummett concludes with a chapter about God Proceedings of
