## **Our Changing World:**

Our Changing World-View Jan Christian Smuts, John Patrick Dalton, Robert Broom, John Frederick Vicars Phillips, Ian D MacCrone, John Young Thomson Greig, Theodorus Johannes Haarhof, Cecil Sydney Richards, Sally Herbert Frankel, Reinhold Frederick Alfred Hoernlé, 2021-08-01 Johannesburg was still a brash mining town better known for the production of wealth than knowledge and the University of the Witwatersrand a mere ten years old when in 1932 these ten lectures were delivered under the auspices of the University Philosophical Society They portrayed the ideas of the university's leading academics of the day and the programme of lectures reveals a studied effort to introduce an element of bipartisan political representation between English and Afrikaner in South Africa by including Wits first principal Jan Hofmeyr and politician D F Malan as discussion chairs Yet no black intellectuals were represented and indeed the politics of racial segregation bursts through the text only in a few of the contributions For the most part race is alluded to only in passing As Saul Dubow explains in his new introduction to this re issue of the lectures Our Changing World View was an occasion for Wits leading faculty members to position the young university as a mature institution with a leadership role in public affairs Above all it was a means to project the university as a research as well as a teaching institution led by a vigorous and ambitious cohort of liberal minded intellectuals That all were male and white will be immediately apparent to readers of this reissued volume Ranging from economics psychology a spurious rebuttal of evolution to a substantial revisionist history and the perils of the machine age this book is a sombre reflection of intellectual history and the academy's role in promulgating political and social divisions in South Africa

Wong,Ulrika Candolin,2025-04-23 For many animals behavioural adjustments represent the first response to human modified conditions By improving reproduction and survival such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change Behavioural responses however can also be maladaptive and reduce individual fitness particularly if favourable reaction norms have not yet evolved because animals are encountering conditions that they have never experienced before Clearly behaviour matters But how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes Behavioural Responses to a Changing World Challenges and Applications a companion volume to the first edition published in 2012 examines wildlife behavioural responses to human induced environmental change through a translational lens Despite considerable and growing interest in research on the topic the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real world solutions To redress this the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges from climate change to urbanisation influence animal behaviour and how we can effectively harness knowledge of animal behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world **Our Changing Planet** Federal Coordinating Council for Science, Engineering, and Technology.
