## **River Of History Transnational And Transdisciplinary Perspectives On The Immanence Of The Past:**

Legal Histories of the British Empire Shaunnagh Dorsett, John McLaren, 2014-04-24 This book is a major contribution to our understanding of the role played by law in the British Empire. Using a variety of interdisciplinary approaches the authors provide in-depth analyses which shine new light on the role of law in creating the people and places of the British Empire. Ranging from the United States through Calcutta across Australasia to the Gold Coast these essays seek to investigate law's central place in the British Empire and the role of its agents in embedding British rule and culture in colonial territories. One of the first collections to provide a sustained engagement with the legal histories of the British Empire in particular beyond the settler colonies this work aims to encourage further scholarship and new approaches to the writing of the histories of that Empire. Legal Histories of the British Empire Laws, Engagements and Legacies will be of value not only to legal scholars and graduate students but of interest to all of those who want to know more about the laws in and of the British Empire. *The River of History* Peter Farrugia, 2005 The articles in this collection are dedicated to the proposition that human beings make history not just in the sense of being agents of change in the here and now but in the sense that we interpret appropriate and make use of the past for our own purposes in the future. Covering topics that range from teaching history to the concept of property rights and the discipline of history in the television age these essays will radically alter the notion of how we make history. It will show that we are never fully able to bend history to our will and that as we attempt to do so we are often shocked at the turns it takes despite our best efforts to shape it for future generations.

Writing Transnational History Fiona Paisley, Pamela Scully, 2019-09-19 Over the past two decades transnational history has become an established term describing approaches to the writing of world or global history that emphasise movement, dynamism and diversity. This book investigates the emergence of the transnational as an approach, its limits and parameters. It focuses particular attention on the contributions of postcolonial and feminist studies in reformulating transnational historiography as a move beyond the national to one focusing on oceans, the movement of people and the contributions of the margins. It ends with a consideration of developing approaches such as translocalism. The book considers the new kinds of history that need to be written now that the transnational perspective has become widespread. Providing an accessible and engaging chronology of the field it will be key reading for students of historiography and world history.
