Rivers Of Memory:

Rivers of Memory Harry Middleton, 1993 Rivers, Memory, And Nation-building Dorothy Zeisler-Vralsted, 2014-11-01
Rivers figure prominently in a nation's historical memory and the Volga and Mississippi have special importance in Russian and American cultures. Beginning in the pre-modern world, both rivers served as critical trade routes connecting cultures in an extensive exchange network while also sustaining populations through their surrounding wetlands and bottomlands. In modern times, Mother Volga and the Father of Waters became integral parts of national identity, contributing to a sense of Russian and American exceptionalism. Furthermore, both rivers were drafted into service as the means to modernize the nation-state through hydropower and navigation. Despite being forced into submission for modern-day hydrological regimes, the Volga and Mississippi Rivers persist in the collective memory and continue to offer solace, recreation, and sustenance. Through their histories, we derive a more nuanced view of human interaction with the environment, which adds another lens to our understanding of the past.

Where the River Flows Sean W. Fleming, 2019-08-06
Rivers are essential to every aspect of civilization, yet how many understand how they work? Fleming takes readers on a journey along our planet's waterways, providing a scientist's reflections on the profound interrelationships that rivers have with landscapes, ecosystems, and societies.

Rivers, 1995 Rivers in Russian Literature Margaret Ziolkowski, 2020-11-20
Rivers in Russian Literature focuses on the Russian literary and folkloric treatment of five rivers: the Dnieper, Volga, Neva, Don, and Angara. Each chapter traces within a geographical and historical context the evolution of the literary representation of one river. Imagination may endow a river with aesthetic or spiritual qualities, ethnic, national, or racial associations, or commercial or agricultural symbolism of many kinds. Russian literary responses to these five rivers have much to tell us about the society that produced them, as well as the rivers they treat.

This book examines the afterlife of Partition as imprinted on the memories and postmemories of Hindu and Sikh survivors from West Punjab to foreground the intersection between history, memory, and narrative. It shows how survivors script their life stories to reinscribe tragic tales of violence and abjection into triumphalist sagas of fortitude, resilience, industry, enterprise, and success. At the same time, it reveals the silences, stutters, and stammers that interrupt survivors' narrations to bring attention to the untold stories repressed in their consensual narratives. By drawing upon current research in history, memory, narrative, violence, trauma, affect, home, nation, borders, refugees, and citizenship, the book analyzes the traumatizing effects of both the tangible and intangible violence of Partition by tracing the survivors' journey from refugees to citizens as they struggle to make new homes and lives in an unhomely land. Moreover, arguing that the event of Partition radically transformed the notions of home, belonging, self, and community, it shows that individuals affected by Partition produce a new ethics and aesthetic of displacement and embody new ways of being in the world. An important contribution to the field of Partition studies, this book will be of interest to researchers on South Asian

Boon, 2012-01-01 Ultimately I propose that considering internalization as embodiment is a critical methodological shift in understanding mystical methods in general and especially for probing recollection mysticism in depth The inner man as opposed to the outer man is a Pauline and Lutheran commonplace that is too frequently taken out of context leading historians of the Renaissance in general and of Spanish Renaissance religion in particular to value references to internal or mental methods of spirituality as an improvement over external or bodily rituals This book takes its cue from the recent cognitive turn in medieval studies that complicates studies of the body in religion by focusing on the embodied aspects of cognition claiming a continuum between body and soul rather than a hierarchy I argue that medieval theories of cognition made the divorce of the body from the soul impossible for a Galenic doctor even one who spoke of the body and the world with contempt and by implication impossible for his Castilian audience Without serious consideration of Laredo's reliance on an embodied soul rather than on a body soul dualism
