3 Keys to Keeping Your Teen Alive Anne Marie Hayes, 2011-04-01 Imagine lying awake in bed waiting to hear the front door open so you'll know your teen is home safely But instead tonight the doorbell rings Your heart stops when you see the police officers in the doorway and you know instantly that your life will never be the same again Wouldn't you do ANYTHING to go back and change things By then it will be too late The time to prepare your teen to drive and survive is NOW 3 Keys to Keeping Your Teen Alive provides a simple step by step plan to prepare teens to become safe responsible drivers Parents can use it to teach their teens to drive or to make sure they cover all the bases in their practice sessions after the teen has taken a professional driver training course 3 Keys to Keeping Your Teen Alive includes 25 structured driving lessons great advice from top experts checklists to follow and other useful tools There are true stories quizzes and puzzles to keep your teen interested and reinforce the learning The companion website TeensLearntoDrive.com has additional resources and links to great instructional informational videos that complement each lesson The program works with Graduated Driver Licensing GDL Programs 3 Keys to Keeping Your Teen Alive is straightforward and easy to follow but will take a lot of time patience and dedication from both of you parent and teen Isn't it worth it

The Fast and The Furious: Drivers, Speed Cameras and Control in a Risk Society Dr Helen Wells, 2012-10-01 The Fast and The Furious Drivers Speed Cameras and Control in a Risk Society presents a sociological and

criminological perspective critical to understanding the driver's role at the centre of road safety interventions. Such an approach is argued as crucial to an understanding of attempts to reduce road crashes, deaths and injuries as approaching such questions from an engineering or educational perspective. The book offers an explanation for the continued debate about one road safety intervention, the speed camera, by situating that debate within contemporary literature about the risk society (Beck 1992) and more broadly understood experiences of risk faced on a daily basis by drivers. Rather than a focus on risk as something that can be objectively assessed, measured and managed separately from the social context in which it is encountered, it suggests that risk is something that permeates this particular debate from every angle. The book achieves its aims by utilising sociological and criminological perspectives to investigate issues such as the social context in which it is possible for drivers to reject official scientific expertise about crash causation and camera effectiveness, the self-defined respectability of the population being problematised and its juxtaposition with a proper police focus on real criminals, the reconceptualisation of law-breaking as risk-taking rather than inherently wrong behaviour and its consequences for the enforcement of laws based on risk assessment, the experience of being controlled by technology and of receiving what is essentially automated justice. These and other issues are explored and suggested as illuminating of both the real concerns underpinning this debate and potentially instructive for future attempts to control risky behaviour both within and beyond a road safety context.
