In the post war period Berlin and Naples experienced a phase of profound changes essentially influenced by external factors the less rigid urban structure which had been ruined by World War II resulting in severe changes in the social and economic structure an uncritical reception and implementation of largely theoretical models of functionalism in urban planning and in the design of the new public building interventions On the one hand between the 1940s and the 1980s Berlin experienced a considerable loss in population a political isolation and an urban splitting as the urban planning institutions deeply influenced by relevant politics slowly and thoroughly changed the cityscape On the other hand Naples suffered from a new phase of immigration as well as from the parallel densification of the old suburbs and the physical expansion of the city limits without consistent and socially appropriate urban planning measures This phase of change so full of contrasts coincided with the establishment of new democratic systems in the Federal Republic of Germany and Italy and with the fundamental goal of socially adequate housing in both the West and the East The research involved a series of historical analyses of the relationship between urban development and social housing for critical reflection and to allow an informed evaluation of the contemporary condition In particular it investigated housing settlements realised in Berlin and Naples in the first four decades of the post war period which corresponds to the period in which public housing was central in both political and urban planning terms The book focuses on places of living the city and the house Consequently it investigates the scale of the project and that of the intervention the relationship between innovation and the cultural reception of urban phenomena and again between the stage of the project and the realisation and upkeep of the interventions between democratic expectations and the adequacy of the administration system These steps have a direct effect on the social identity that inspires structures and transforms the planned and then built city that continuous dialogue between form and content the past that occurs in general through progressive and mutual adaptations In the selection of the case studies we have favoured interventions on the periphery which are those in which theoretical and aesthetic trends have best

manifested themselves and in which planning and design cultures could develop most widely. However, the periphery does not necessarily coincide with the geographical edges of the cities both in Berlin and in Naples. Historical events or the particular topography have naturally shifted the peripheral location along a radius that only ideally starts from the city centre and often extends to its inner fringes. Rather from a sociological point of view, the same interventions generally generate the peripheral condition that is marginalisation or social division. This, as we shall see, can be traced both on the large scale of the city and inside the neighbourhood. The materials are arranged in the following way: the text is introduced by a graphic and synthetic presentation of the historical context in Berlin and Naples and the documentation of the twelve case studies. In the second chapter, Comparison, which was mostly developed as the first by the young scholars involved in the project, three theoretical issues highlighted during the seminars are better presented: the ability of the project to involve the social level, the experimentalism of the interventions in particular in construction technology, social approach and democratic participation, the relationship between public and private in the phases of implementation and the upkeep of the programmes. The third chapter, In Depth Analysis, includes the contributions of the scientists involved to give a better articulated historical and critical analysis of many of the selected case studies and of the wider urban and social context. The closing editorial paper offers a brief overview focusing on a selection of the theoretical nodes that emerged from the comparison of the materials from a contemporary perspective. The publication is the outcome of the homonymous research programme fully funded by DAAD German Academic Exchange Service and runned in 2019 in cooperation between the Technische Universität of Berlin Department of Architecture Habitat Unit with the Università della Campania Luigi Vanvitelli Dipartimento di Architettura e Disegno Industriale in Aversa, Italy.

In der Nachkriegszeit erlebten Berlin und Neapel eine Phase tiefgehender Veränderungen, die im Wesentlichen von externen Faktoren beeinflusst wurde: der aufgelockerten, infolge des Zweiten Weltkriegs ruinierten Stadtform, der starken Veränderung der sozialen und wirtschaftlichen Struktur, der unkritischen Rezeption und Implementierung von stark theoretisch geprägten Modellen des Funktionalismus in der Stadtplanung sowie in der Gestaltung der neuen öffentlichen Bauinterventionen. Auf der einen Seite erlebt Berlin zwischen den 40er und den 80er Jahren einen starken Bevölkerungsverlust, eine politische Isolierung und eine urbane Aufspaltung, indem eine stark politisch beeinflusste Stadtplanung das Stadtbild tief verändert. Auf der anderen Seite leidet Neapel unter einer neuen Einwanderungsphase sowie der parallelen Verdichtung der alten Vorstädte und der physischen Erweiterung der Stadtgrenze, ohne dass konsequente und sozial gemessene stadtplanerische Maßnahmen vorgenommen wurden. Diese kontrastreiche Umbruchsphase stimmt berein mit der Etablierung der neuen demokratischen Regierungssysteme in der Bundesrepublik Deutschland wie auch in Italien und damit mit dem für beide und im Westen wie im Osten grundlegenden Ziel des sozial gerechten Wohnens. Das Forschungsvorhaben beinhaltet eine Reihe von historischen Analysen der Beziehung zwischen Stadtentwicklung und sozialem Wohnungsbau zum Zweck der kritischen Reflexion und um eine fundierte Bewertung der jeweiligen zeitgenössischen Bedingungen zu ermöglichen.

Architettura e Disegno Industriale der Universit della Campania Luigi Vanvitelli in Aversa Italien durchgef hrt wurde Nel secondo dopoguerra Berlino e Napoli vivono una fase di profondo cambiamento condizionato in maniera preponderante da fattori esterni tra questi la parziale disgregazione della forma urbana causata dai bombardamenti bellici ed il cambiamento della struttura socio economica nazionale a cui si sovrappone il recepimento delle teorie funzionaliste nella pianificazione urbana e nella progettazione dei nuovi interventi di edilizia residenziale pubblica Per un verso tra gli anni quaranta e gli anni ottanta Berlino rileva una pesante contrazione demografica l isolamento politico internazionale la separazione interna causata dalla costruzione del Muro gli effetti di una pianificazione urbana influenzata dallo sdoppiamento statale derivante dalla fondazione nel 1949 della Repubblica Federale e della Repubblica Democratica Per altro verso Napoli osserva una nuova fase di immigrazione che si aggiunge alla naturale crescita demografica del primo dopoguerra lo sviluppo urbano dei sobborghi e dei centri dell entroterra l espansione fisica ma non amministrativa dei confini della citt l inadeguatezza ed il costante ritardo dell apparato politico ed amministrativo nella gestione dei fenomeni sociali ed urbani Si tratta in entrambe i casi di una fase carica di contrasti che coincide con la fondazione delle nuove repubbliche liberali in Germania Ovest ed in Italia e con la definitiva affermazione della questione abitativa e della residenza popolare che assurge in ambito tedesco orientale al rango di elemento funzionale alla stessa costruzione statale Lo studio indaga la relazione tra sviluppo urbano ed edilizia residenziale pubblica e si propone come strumento di riflessione critica e di valutazione informata sulla condizione contemporanea Le indagini e le valutazioni storiche si concentrano sugli interventi realizzati nei primi quarant anni del dopoguerra ovvero nel periodo in cui la questione abitativa diviene urgente e centrale sia in termini politici che urbanistici Lo sguardo si concentra quindi sui luoghi dell abitare la citt e la casa indaga e confronta la scala teorica e quella reale il rapporto tra innovazione e recezione culturale confronta i piani del progetto della costruzione e della successiva manutenzione degli interventi urbani tra aspettative democratiche ed adeguatezza del sistema amministrativo Si tratta di passaggi che hanno effetto diretto sull identit sociale che di risposta riempie di senso la citt costruita attraverso un dialogo tra forma e contenuto che procede per progressivi e reciproci adattamenti Nella selezione dei casi studio sono stati privilegiati interventi di periferia ovvero quelli in cui le culture della pianificazione e del progetto hanno potuto manifestarsi nella maniera pi completa Come si vedr la periferia non coincide necessariamente con i margini geografici delle citt sia a Berlino che a Napoli infatti gli eventi storici o la particolare topografia hanno dislocato la condizione periferica lungo un raggio che solo idealmente parte dal centro della citt Da un punto di vista sociologico e per la coincidenza di diversi fattori inoltre gli stessi interventi residenziali hanno generato al loro interno la condizione periferica che si manifestata generalmente nelle consuete forme di degrado degli spazi comuni nella mancanza di prossimit funzionale nell emarginazione sociale I materiali del testo sono organizzati in tre parti nel primo capitolo Documentation si introduce al contesto storico amministrativo ed urbanistico e si presentano schematicamente e secondo un criterio uniforme i dodici casi studio selezionati

Nel secondo capitolo Comparison che come il primo stato redatto dai giovani ricercatori coinvolti nel progetto vengono meglio presentate tre questioni teoriche emerse nel corso dei laboratori di ricerca la capacità del progetto di coinvolgere il piano sociale il carattere sperimentale degli interventi in particolare per tecnologia costruttiva approccio sociale e partecipazione democratica il rapporto tra il piano amministrativo pubblico ed il piano civico privato nelle fasi di realizzazione e mantenimento dei programmi residenziali Il terzo capitolo In Depth Analysis raccoglie i contributi degli studiosi coinvolti per approfondire l'analisi storica e critica dei casi studio e del più ampio contesto urbano e sociale Infine le conclusioni raccolgono i principali nodi teorici emersi in una prospettiva aperta alla condizione contemporanea La pubblicazione restituisce e meglio sviluppa sul piano documentale e critico i materiali raccolti nel corso di due laboratori tenuti nel 2019 presso la Technische Universität di Berlino Dipartimento di Urbanistica e Sviluppo urbano sostenibile Habitat Unit e l'Università della Campania Luigi Vanvitelli Dipartimento di Architettura e Disegno industriale di Aversa nell'ambito dell'omonimo progetto di ricerca finanziato dal DAAD Servizio Tedesco per lo Scambio Accademico

The Globalisation of Modern Architecture Robert Adam, 2012-04-25 Taking the break up of the Soviet Union and the entry of Russia China and India into the global market as the start of a new era of globalisation Robert Adam compares new developments in architecture and urban design with major shifts in the balance of power since 1990 Based on the principle that design unavoidably follows social change politics and economics this analysis casts a new light on recent architecture Starting with the lead up to events in the 1990s links are established between the global dominance of the North Atlantic economies architectural style and a dramatic increase in international architectural practice The widely observed homogeneity of the global consumer economy is examined in relation to branding tourism and international competition between cities and parallels are drawn with universal architectural and urban types iconic architecture and the rise of the star architect Contrasting pressures to maintain differences are identified in the break up of nation states identity politics targeted marketing and environmentalism and these are related to attempts to reinforce local identity through architecture and urban design Using social political and economic change as a guide to new directions in architecture and urban design the book ends by tracing the changes in global power revealed by the 2008 Western financial crash and its immediate impact on the built environment By comparing past patterns of cultural influence the book speculates on how architecture and urban design may come to reflect wider global trends

Rethinking the French City Monique Yaari, 2008-01-01 This book considers the post 68 French city as a prism through which to understand the contemporary world and France's specificity within it The reader is invited to join in a series of exploratory strolls through texts buildings and neighborhoods and thereby share in a process of discovery Zeroing in on international architectural debates a range of key Parisian exhibitions and major urban design decisions in Paris Montpellier and Lille Yaari unravels an often acerbic French critique of both modern and postmodern positions on culture technology and the city This critique stemming from the competing claims of national

identity the ethics of architecture and display and an anthropologically informed revision of prevailing views on the city has sparked in France a passionate search for a third path which the author proposes to term *apr s moderne* Breaking new ground in the field of French Studies through cultural analysis of the contemporary city this study brings new insight to scholars and professionals in architecture and urbanism and will interest all others for whom France and cities in general hold special appeal
