Critical Terrorism Studies since 11 September 2001 David Miller, Jessie Blackbourn, Helen Dexter, Rani Dhanda, 2016-04-08 Academic studies of terrorism grew exponentially in number after the September 11 attacks The problem was that much of this work of orthodox terrorism studies was biased often shoddily researched and was too closely identified with the power centres of Western states Its denizens were often former and sometimes current officials or officers in the military intelligence services or the security industry or were funded by them In response the project of Critical Terrorism Studies was intended to give a

more rounded account of political violence in the world It focuses on neglected issues like state terrorism Western counterinsurgency propaganda and misinformation More than a decade since the founding of the critical project this book asks what has been learned It showcases leading examples of critical terrorism studies and presents an agenda for the expansion of an evidence based approach to political violence and terrorism With chapters by leading authorities such as Joseba Zulaika Michael Stohl Mary Hickman and Richard Jackson the book evaluates how far the critical project has come and where it is going next This book was published as a special issue of Critical Studies on Terrorism

Financial Literacy Education Asta Zokaityte, 2017-06-26 This book explores the issue of consumer financial education responding to increased interest in and calls to improve people's financial literacy skills and abilities to understand and manage their money New conceptual frameworks introduced in the book offer academic audiences an innovative way of thinking about the project on financial literacy education Using the concepts of education regulation and financial knowledge democratisation to analyse the financial education project in the UK the book exposes serious and often ignored limitations to using information and education as tools for consumer protection It challenges the mainstream representation of financial literacy education as a viable solution to consumer financial exclusion and poverty Instead it argues that the project on

financial literacy education fails to acknowledge important dependences between consumer financial behaviour and the socio economic political and cultural context within which consumers live Finally it reveals how these international and national calls for ever greater financial education oversimplify and underestimate the complexity of consumer financial decision making in our modern times
