Security And The State In Southern Africa:

Security and the State in Southern Africa Agostinho Zacarias, 1998-12-31 Setting out the problem of security and placing it in an historical framework the author of this work picks his way through the complexities of political theory and the tangled political history of southern Africa He argues that the present formation of states has been shaped by the struggle of the African peoples for emancipation and the resistance of the European settler communities and that South Africa has attempted to maintain regional order based on principles of domination exploitation and inequality founded on a colonial past and apartheid The result has been a security system which is inherently militaristic nation focused and state centred and has led to confrontation within states and in the region Zacarius therefore explores the concept of people centred security and the legitimate state and regards these as essential building blocks in ensuring state and regional stability and security

State Security in South Africa James Michael Roherty, 1992 This work is a study of civil military relations in the Republic of South Africa while Pieter Willem Botha was prime minister 1978-89 The author's controversial thesis is that Prime Minister Botha recognizing that his country had reached the historical juncture when it needed to establish a new political order encompassing all of its diverse peoples moved effectively to prepare the ground for fundamental constitutional change What was needed above all were stabilization measures to assure the support of the white population for reform Botha used the South African defence force as his primary instrument By 1989 Professor Roherty maintains a striking degree of stabilization had been achieved within the country and throughout South Africa and the groundwork for epochal change had been prepared The author makes use of exclusive interviews with South Africans from the political military intelligence corporate and academic worlds

Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically

this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility

Security and Democracy in Southern Africa Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007 A study of the ambiguity of democratization and how it can generate violence Southern Africa has embarked on one of the world's most ambitious security co-operation initiatives seeking to roll out the principles of the United Nations at regional levels This book examines the triangular relationship between democratization the character of democracy and its deficits and national security practices and perceptions of eleven southern African states Based on national studies conducted by African academics and security practitioners over three years it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co-operation in the developing world The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict Building a common security regime in southern Africa will require moving beyond regime solidarity In particular progress will mean building multinational institutions entrenching democratic practices drawing on civil society and integrating the southern African project with that of the African Union The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system

Security and Development in Southern Africa Nana Poku, 2001-04-30 With the end of white dominated South Africa many observers have argued for a positive transformation of the whole of Southern Africa based upon market integration and increased cooperation among the states of the region Poku and the contributors to this collection re-examine this optimistic scenario and they point to the problems of translating good intentions into actual policies In reality the economic imbalance between South Africa and its neighbors poses severe problems for the region Far from finding a stronger ally in regional reconstruction and development the countries in the region are finding that for many in South Africa they simply do not matter that much The analysis points to greater polarization which may imply greater marginalization of the poorer countries in the region Moreover a major widening of the gap between the richer South Africa and some or all of the weaker economies may lead to increased tensions and breakdown of regional relations even to a situation detrimental to economic development in the region A provocative analysis by some of the leading politico-economic thinkers of the region the volume will be of great use to scholars researchers and policy makers involved with Southern African development

Security and Politics in South Africa Peter C. J. Vale, 2003 Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century

Covert Action Magda Long, Rory Cormac, Genevieve Lester, Mark Stout, Damien Van Puyvelde, 2025-11-03 A comparative international perspective challenges conventional narratives about unacknowledged intervention Covert action is generally understood as politically motivated and plausibly deniable interference by one state in the affairs of

another state It includes propaganda political or economic subversion paramilitary action and assassinations Covert action is the most consequential and controversial form of secret statecraft and it has become a ubiquitous feature of international politics However it is often sensationalized or seen through a narrow US centric lens Covert Action challenges this conventional narrative and redefines secret statecraft by offering a groundbreaking comparative international perspective that explores the practice of unacknowledged intervention across twenty countries and a range of eras Bringing together leading scholars from around the world this volume moves beyond the American and wider anglosphere perspectives to examine covert action practices across states regime types and time This book will be important reading for historians political scientists and policymakers and it provides a foundational study of the hidden mechanisms of international power It takes a global perspective and thus transforms the understanding of how nations truly interact behind the scenes revealing covert action as a complex form of international statecraft *Globalization and the National Security State* Norrin M.

Ripsman,T.V. Paul,2010-03-18 In the past two decades many have posited a correlation between the spread of globalization and the decline of the nation state In the realm of national security advocates of the globalization thesis have argued that states power has diminished relative to transnational governmental institutions NGOs and transnational capitalism Initially they pointed to declines in both global military spending which has risen dramatically in recent years and interstate war But are these trends really indicative of the decline of nation state s role as a guarantor of national security In *Globalization and the National Security State* T V Paul and Norrin M Ripsman test the proposition against the available evidence and find that the globalization school has largely gotten it wrong The decline in interstate warfare can largely be attributed to the end of the Cold War not globalization Moreover great powers the US China and Russia continue to pursue traditional nation state strategies Regional security arrangements like the EU and ASEAN have not achieved much and weak states the ones most impacted by the turmoil generated by globalization are far more traditional in their approaches to national security preferring to rely on their own resources rather than those of regional and transnational institutions This is a bold argument and Paul and Ripsman amass a considerable amount of evidence for their claims It cuts against a major movement in international relations scholarship and is sure to generate controversy *Regional Integration for Food Security in Southern Africa* Siphamandla Zondi,2004 The food crisis in Southern Africa is compounded by socio economic health and environmental problems There is a diminishing income generating labour supply and a low food production rate in areas which may be beset by drought famine HIV AIDS or conflict That agriculture is a viable sector for economic growth is posited on the fact that this sector provides a livelihood for some 70% of the region s population Nevertheless the continent has failed to produce enough food for consumption The acceleration of the process of globalisation has exacerbated the difficult and imbalanced agricultural environment in which poor countries must operate which so this volume maintains can only be addressed through integrated approaches at a regional level Furthermore the failure of so many international food relief

programmes indicates that an approach harnessed by the regional bodies such as Nepad and SADC may be the most effective strategy to ensure the prospect of food security **A Federal South Africa** Percy Alport Molteno,1896
