

What works is not perspective-taking but perspective-seeking: actually talking to people to gain insight into the nuances of their views. That's what good scientists do: instead of drawing conclusions about people based on minimal clues, they test their hypotheses by striking up conversations.

Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included *Phenomenology and the Extreme Sport Experience* Eric

Brymer, Robert Schweitzer, 2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some. If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one's life, then this confusion will continue to exist. However, an in-depth examination of the phenomenology of the extreme sport experience yields a much more complex picture. This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death. Extreme sports are not necessarily synonymous with risk, and participation may not be about risk-taking. Participants report deep inner transformations that influence world views and meaningfulness, feelings of coming home, and authentic integration, as well as a freedom beyond the everyday. Phenomenologically, these experiences have been interpreted as transcendent of time, other space, and body. Extreme sport participation therefore points to a more potent life-enhancing endeavour worthy of further investigation. This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk-taking, the death wish, and the concept of No Fear in extreme sports, and repositions the experience in a previously unexplored manner. This is valuable reading for students and academics interested in Sports Psychology, Social Psychology, Health Psychology, Tourism, Leisure Studies, and the practical applications of phenomenology.

The Ordering of Love Madeleine L'Engle, 2005 A collection of nearly two hundred poems by the prolific writer, including eighteen never before published, weaves together intangible experiences like grief and joy with everyday events of life such as bus rides and hospital visits into vibrant patterns of truth and faith.

Help Seeking in Academic Settings Stuart A. Karabenick, Richard S. Newman, 2013-01-11 Building on Karabenick's earlier volume on this topic and maintaining its high standards of scholarship and intellectual rigor, *Help Seeking in Academic Settings: Goals, Groups, and Contexts* brings together contemporary work that is theoretically as well as practically important. It highlights current trends in the area and gives expanded attention to applications to teaching and learning. The contributors represent an internationally recognized group of scholars and researchers who provide depth of analysis and breadth of coverage. Help seeking is currently considered an important learning strategy that is linked to students' achievement goals and academic performance. This volume not only provides answers to who, why, and when learners seek help but raises questions for readers to consider for future research. Chapters examine help seeking as a self-regulated learning strategy and its relationship to achievement goal theory; help seeking in collaborative groups; culture and help seeking in K-12 and college contexts; help seeking and academic support services such as academic advising centers; help seeking in computer-based interactive learning environments; help seeking in response to peer harassment at school; and help seeking in non-academic settings such as the workplace. This book is intended for researchers, academic support personnel, and graduate students across the field of educational psychology, particularly those interested in student motivation and self-regulation.

Understanding FDI-Assisted Economic Development Sanjaya Lall, Rajneesh Narula, 2013-09-13 It is nowadays well accepted that both economic growth and development are highly dependent on improving not just the availability of capital but also access to technological capabilities infrastructure and resources This has gone hand in hand with an increasing economic liberalization of most developing countries The role of the MNE as a viable source of both capital and technology is one of the key features of this new openness In the process of embracing FDI as a solution to the myriad of economic ills something even the World Bank has begun to do little attempt is made to understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research
