

	Economic System under Communism	Model of Economic Development
	A People's Republic under strict Soviet domination. Massive collectivization of farming and forced industrialization were later accompanied by selective attempts at free enterprise.	Creating favorable conditions with lasting reforms. Credit growth marred by crime and a weak legal system.
	As Czechoslovakia, within the Soviet sphere of influence after WWII. Relatively developed and minimally indebted within the Communist Bloc, it missed the information and electronics revolution of the 1970s and 1980s.	Stability, economic integration with the West, but inward-looking financial system. The recent crisis: Czech small, slipped into a recession.
	A Soviet satellite state post WWII, yet one of the first CEE reformers having a progressive version of "goulash communism".	Thoroughly privatized economy, foreign capital, affected by macroeconomic budget deficits complicate further reforms.

introduced and used econometric tools to show the relevance of his work to empirically observed phenomena It is very useful to have his work in collected form Kenneth J Arrow Stanford University US This outstanding collection of William Brock s essays illustrates the power of dynamic modelling to shed light on the forces for stability and instability in economic systems The articles selected reflect his best work and are indicative both of the type of policy problem that he finds challenging and the complex methodology that he uses to solve them Also included is an introduction by Brock to his own work which helps tie together the main aspects of his research to date *Understanding Economics* Harlan M.
