Ships and Other Seacraft Nigel Hawkes,1999 Explains how ships sailboats jet skis and other water vehicles work what keeps them afloat and how they are constructed Ships and Other Seacraft Brian Williams,1983-01-01 Ships and Other Sea Craft Nigel Hawkes,1999 A look at ships sailing boats jet skis and hydrofoils with instructions and plans for making a fully working model sailing boat In the HOW SCIENCE WORK series illustrated with artworks and cutaways Ideal for National Curriculum KS2 **The Natural and Societal Challenges of the Northern Sea Route** Willy

Østreng,2013-04-17 Yohei Sasakawa The Northern Sea Route is the shortest shipping route connecting the Far East and Europe However the route has been practically inaccessible to commercial vessels due to the harsh natural conditions in the area which make navigation possible for only a small part of the year and then only with an icebreaker leading the way Opening the Northern Sea Route would greatly facilitate international shipping making two routes a northbound one through the NSR and a southbound one through Suez available throughout all seasons The Northern Sea Route would also help to boost economic development including the exploitation of natural resources in Russian regions along the coast of the Arctic Ocean Thanks to international cooperation we have been able to set up and successfully conclude a special project to investigate the possibilities of developing the Northern Sea Route as a commercial route while protecting the environment wildlife and peoples of the Arctic Ocean region This represents a highly significant step in terms of future global development

The Sea Voyage Narrative Robert Foulke, 2013-10-11 From The Odyssey to Moby Dick to The Old Man and the Sea the long tradition of sea voyage narratives is comprehensively explained here supported by discussions of key texts **Human Dispersal, Human Evolution, and the Sea** John F. Cherry, Thomas P. Leppard, 2025-02-21 Human Dispersal Human Evolution and the Sea is the first book length treatment of what has become known as the global Palaeolithic seafaring debate Until recently common consensus dictated that only in the last ten thousand years have humans routinely permanently and cross culturally traversed seas and oceans to colonize new lands New and sometimes contentious data from the Mediterranean and Island Southeast Asia challenge that consensus suggesting to some researchers that long distance voyaging is a behavior of great antiquity These scholars suggest that oceans and seas facilitated and encouraged planetary dispersal in our own genus rather than acting as barriers to dispersal If this model is correct it necessitates a radical rethinking of not only the big patterns of human history but also more deeply our models of emergent human behavior and

when the capacity for highly complex and coordinated group behaviors emerged Exploring the data in detail the authors here show how a complex series of interrelated problems has tended to be treated in reductionist or overly simplistic terms Cherry and Leppard elucidate this complexity by bringing to bear perspectives from archaeology ecology and evolutionary biology They demonstrate not only that a series of unique circumstances evolutionary behavioral environmental and economic conspired to drive mass ubiquitous global colonization over the last ten millennia but also that earlier sparser data provide real insight into key social and behavioral thresholds even if there is little evidence to support the oceans as highways model for species other than our own A major intervention in this important debate Human Dispersal Human Evolution and the Sea explains the deep significance of the problem and the profound implications for history archaeology and biological anthropology
