Macroeconomic Determinants Of International Migration In Europe Population Stories:

Macro-economic Determinants of International Migration in Europe Roel Peter Wilhelmina Jennissen, 2004 Discusses macro economic determinants of international migration in Europe **Determinants of Illegal Migration** Robert Wiliater Sibarani, 2018-10-08 Deportation remains a critical issue within labour migration from East Java to Malaysia The research presented in this book focuses on the most predominant factors determining why workers from East Java migrate illegally to Malaysia It finds out that the difference between wages before migration and expected wages in Malaysia the low educational level below junior secondary school being married and being between 15 and 30 years old increases the probability the workers from East Java migrate illegally to Malaysia Based on the findings the recommendations which are proposed to local government are to communicate actively with the migrant candidates to explain legal migration to implement strict control against the presence of illegal agents and encourage opening more branches of PPTKIS Private Agency for Placement of Indonesian Migrant Workers Abroad in the remote areas in East Java *The Macroeconomics of Open Economies Under Labour Mobility* George M Agiomirgianakis, 2019-05-29 First published in 1999 this study recognises the importance of international labour mobility for modern economics This is in large part due to its effects on the size age structure and skills of the labour force the human flow between countries and the expected rise in scale as a result of income differentials demographic pressures and differential labour force growth rates along with developments in transport and communications These migrations are increasingly volatile and unpredictable whilst being concentrated in regions like Australia the USA Sub Saharan Africa and Western Europe Given the extensive literature on the microeconomic view George M Agiomirgianakis aims to extend the debate on open economy macroeconomics through an exploration of international labour mobilities and their effects on open economies with flexible exchange rates **The SAGE Handbook of International Migration** Christine Inglis, Wei Li, Binod Khadria, 2019-11-05 The SAGE Handbook of International Migration provides an authoritative and informed analysis of key issues in international migration including its crucial significance far beyond the more traditional questions of immigrant settlement and incorporation in particular countries Bringing together chapters contributed by an international cast of leading voices in the field the Handbook is arranged around four key thematic parts Part 1 Disciplinary Perspectives on Migration Part 2 Historical and Contemporary Flows of Migrants Part 3 Theory Policy and the Factors Affecting Incorporation Part 4 National and Global Policy Challenges in Migration The last three decades have seen the rapid increase and diversification in the types of international migration and this Handbook has been created to meet the need among academics and researchers across the social sciences policy makers and commentators for a definitive publication which provides a range of perspectives and insights into key themes and debates in the field Immigrant Integration in Europe Angela Paparusso, 2021-08-08 This topical book sheds light on immigrants subjective well being by analysing the main factors associated with self reported life satisfaction among immigrants and natives It

thereby draws upon subjective components of well being which are now receiving growing attention in well being research It also fills in a gap in migration research which has not yet focused on the study of immigrants well being Starting from a broader focus on Europe the book then looks more closely at Italy This is a key country in the immigration policy field in Europe but where the study of immigrants integration from a subjective perspective has been rarely addressed so far The book provides suggestions for constructing and implementing immigration and integration policies by not only taking into account the needs of the host societies but also the experiences opinions requirements and expectations of immigrants This book is very useful for academic and policy researchers working on immigrant integration issues The International Migration Review ,1996 **Oxford Textbook of Global Public Health** Roger Detels,Quarraisha Abdool Karim,Fran Baum,Liming Li,Alastair H Leyland,2021-10-29 The Oxford Textbook of Global Public Health is the ultimate resource on the subject of public health and epidemiology It offers a global and comprehensive perspective on wide ranging public health needs and priorities in modern health care Thoroughly revised and updated for the seventh edition the book is split into three main topics The Scope of Public Health covers the development of the discipline determinants of health and disease and policies law and ethics The second volume focuses on The Methods of Public Health including the science of epidemiology social science techniques and environmental techniques Finally The Practice of Public Health is fully explored with sections on specific public health problems ways of prevention and control the varying needs of different populations and the functions of public health services and professionals Three new editors have joined for this edition Liming Li China Fran Baum Australia and Alastair H Leyland UK complimenting Quarraisha Abdool Karim South Africa and Roger Detels USA for a truly global perspective on public health Featuring over 225 contributors from countries all over the world ensures that the book covers public health from all aspects with vastly different health systems and priorities Featuring new chapters on gender identity and gender based violence environmental health and climate change genomics and epidemiology and emerging and re emerging infectious diseases the seventh edition of the Oxford Textbook of Global Public Health remains the most comprehensive text on the subject and is a vital resource for public health practitioners and trainees clinical epidemiologists and students in the field **Sociological Abstracts** Leo P. Chall,2004 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters dissertations and conference papers *User's Guide to the Population, Resources, Environment and Development Databank (PRED Bank, Version 2.1)* United Nations. labour force economic growth agriculture natural resource use their trends from 1961 to 1990 The PopMap Retrieval System PopMap version 3 01 which accompanies the database makes it possible to generate thematic maps of PRED Bank variables to manipulate data save selected data in a choice of data formats World Population Monitoring, 1997 ,1998 Provides recent information on selected aspects of international migration covering topics such as the international migration agenda international policies documented and undocumented migrants refugees and asylum seekers and gender issues Focus is on issues covered in chapter X of the Program of Action of the International Conference on Popu International Migration Jonathon Moses,2013-04-04 Jonathon Moses makes moral political and economic arguments in favor of the free mobility of human beings across national borders Pointing to the importance of immigration to the success of many nations he shows that Europe itself now faces a falling population and has over the past fifty years actively encouraged huge immigration from other countries There is near consensus across the political spectrum that the free movement of goods and free movement of capital are good for economies and therefore should apply to people as well **World Population Monitoring** ,1997

Class Formations and Inequality Structures in Contemporary African Migration John A. Arthur,2014-10-15 This book examines the influences of social class and inequality structures on migration in Africa using information from Ghana As the country achieves moderate to significant economic gains driven in part by the country's diaspora communities the desire to migrate has intensified Migration is now synonymous with social mobility and self improvement It has been found that existing class and status inequalities are analytically inseparable from the social and cultural processes underpinning the motivations behind Ghanaian migration Migrant class and socioeconomic attributes are closely intertwined reinforcing and operating at every level of the migration decision making to influence the motivation to migrate the type and form of migration the direction of the migration its timing and ultimately the outcomes and expectations that migrants associate with their decision to migrate From a historical and contemporary perspective this book argues that power and class based structural relationships are significant components in understanding how migratory diasporas shape and are shaped in turn by social class and inequality The social class identities that Ghanaian immigrants manifest in the United States are often based on immigrant formulations and importation of class dynamics from the home country These identities are then transformed in the countries of destination and replayed or relived back home thereby creating multiple class identities that are powerful forces in inducing social changes In essence migrant social class attributes formed before and post migration is significant because it holds the possibilities of transforming the social structures of migrant sending countries As migrants return home and seek reintegration into the body polity of the home society conflicts emanating from changes in their class dynamics may hinder or promote sociocultural and economic development Hence the imperative of the central government is to understand and incorporate into national development planning the social class characteristics of its citizens who are leaving as well as those who are returning **Population Change and Economic Development in East Asia** Andrew

Mason, 2001 The fifteen essays in this volume address from several viewpoints the question of what role population change played in East Asia's rapid economic development *Routledge Handbook of Immigration and Refugee Studies* Anna Triandafyllidou, 2015-10-05 The Routledge Handbook of Immigration and Refugee Studies offers a comprehensive and unique study of the multi disciplinary field of international migration and asylum studies Utilising contemporary information and analysis this innovative Handbook provides an in depth examination of legal migration management in the labour market and its affect upon families in relation to wider issues of migrant integration and citizenship With a comprehensive collection of essays written by leading contributors from a broad range of disciplines including sociology of migration human geography legal studies political sciences and economics the Handbook is a truly multi disciplinary book approaching the critical questions of Migration and the labour market Integration and citizenship Migration families and welfare Irregular migration smuggling and trafficking in human beings asylum and forced migration Organised into short thematic and geographical chapters the Routledge Handbook of Immigration and Refugee Studies provides a concise overview on the different topics and world regions as well as useful guidance for both the starting and the more experienced reader The Handbook's expansive content and illustrative style will appeal to both students and professionals studying in the field of migration and international organisations *World Economic Outlook, April 2018* International Monetary Fund. Research Dept., 2018-07-26 The upswing in global investment and trade continued in the second half of 2017 At 3.8 percent global growth in 2017 was the fastest since 2011 With financial conditions still supportive global growth is expected to tick up to a 3.9 percent rate in both 2018 and 2019 Advanced economies will grow faster than potential this year and next euro area economies are set to narrow excess capacity with support from accommodative monetary policy and expansionary fiscal policy will drive the US economy above full employment Aggregate growth in emerging market and developing economies is projected to firm further with continued strong growth in emerging Asia and Europe and a modest upswing in commodity exporters after three years of weak performance Global growth however is projected to soften beyond the next couple of years with most advanced economies likely returning to potential growth rates well below precrisis averages Growth is projected to remain subpar in several emerging market and developing economies including in some commodity exporters that continue to face substantial fiscal consolidation needs Beyond the next few quarters risks clearly lean to the downside The current recovery offers a window of opportunity to advance policies and reforms that secure the current upswing and raise medium term growth to the benefit of all **How Migrants Choose Their Destinations** Dominika Pszczółkowska, 2024-04-24 This book reveals how decisions regarding where to migrate are made what factors are considered how these change over time and why some destinations are more attractive to certain categories of people Based on rich existent and new data the book explains the destination choices of Polish migrants to the four most frequently chosen destinations countries the UK Ireland Germany and the Netherlands Examined through a sophisticated theoretical

framework allowing for the incorporation of factors resulting from several fields economics public policies demography and migration theories it paints a nuanced and balanced picture of European migration This book will be of key interest to scholars and students of migration studies Central and Eastern European politics and more broadly to sociology political science social geography and international relations The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Let Their People Come Lant Pritchett, 2006-09-15 In *Let Their People Come* Lant Pritchett discusses five irresistible forces of global labor migration and the immovable ideas that form a political backlash against it Increasing wage gaps different demographic futures everything but labor globalization and the continued employment growth in low skilled labor intensive industries all contribute to the forces compelling labor to migrate across national borders Pritchett analyzes the fifth irresistible force of ghosts and zombies or the rapid and massive shifts in desired populations of countries and says that this aspect has been neglected in the discussion of global labor mobility *Let Their People Come* provides six policy recommendations for unskilled immigration policy that seek to reconcile the irresistible force of migration with the immovable ideas in rich countries that keep this force in check In clear accessible prose this volume explores ways to regulate migration flows so that they are a benefit to both the global North and global South

High-Skilled Migration

Mathias Czaika, 2018-02-08 Political and scientific debates on migration policies have mostly focused on governments efforts to control or reduce low skilled asylum and irregular migration or to encourage the return migration of these categories Less research and constructive discourse has been conducted on the role and effectiveness of policies to attract or retain high skilled workers An improved understanding of the drivers and dynamics of high skilled migration is essential for effective policy making as most highly developed and emerging economies experience growing shortages of high skilled labour supply in certain occupations and sectors and skilled immigration is often viewed as one way of addressing these Simplistic assumptions that high skilled migrants are primarily in pursuit of higher wages raise the expectation that policies which open channels for high skilled immigration are generally successful Although many countries have introduced policies aimed at attracting and facilitating the recruitment of high skilled workers not all recruitment efforts have had the desired effects and anecdotal evidence on the effectiveness of these programmes is rather mixed The reason is that the rather narrow focus on migration policy coincides with a lack of systematic and rigorous consideration of other economic social and political drivers of migration which may be equally or sometimes even more important than migration policies per se A better understanding of migration policies their making consequences and limitations requires a systematic knowledge of the broader economic social and political structures and their interaction in both origin and destination countries This book enhances this vibrant field of social scientific enquiry by providing a systematic multidisciplinary and global analysis of policies driving international high skilled migration processes in their interaction with other migration drivers at the individual city national

and international level **Europe and Central Asia Economic Update, May 2018** World Bank, 2018 With growth in Europe and Central Asia likely at its peak this report addresses two questions How well is the region prepared for an expected slowdown How well has the economic upswing been used to adjust to the digital revolution The report specifically focuses on cryptocurrency and blockchain activities in the region
