Economic Forecasting N. Carnot,V. Koen,B. Tissot,2005-08-12 *Economic Forecasting* provides a comprehensive overview of macroeconomic forecasting The focus is first on a wide range of theories as well as empirical methods business cycle analysis time series methods macroeconomic models medium and long run projections fiscal and financial forecasts and sectoral forecasting In addition the book addresses the main issues surrounding the use of forecasts accuracy communication challenges and their policy implications A tour of the economic data and forecasting institutions is also provided *IMF Staff Papers, Volume 57, No. 2* International Monetary Fund. Research Dept.,2010-06-29 This paper introduces a new database of financial reforms covering 91 economies over 1973 2005 It describes the content of the database the information sources utilized and the coding rules used to create an index of financial reform It also compares the database with other measures of financial liberalization provides descriptive statistics and discusses some possible applications The database provides a multifaceted measure of reform covering seven aspects of financial sector policy Along each dimension the database provides a graded rather than a binary score and allows for reversals Macroeconomics for Development Raghbendra Jha,2023-01-13 Providing a broad overview of the impact of COVID 19 on economic development this timely book examines closely the macroeconomic aspects of economic development and the design of monetary policies under extreme crises **Economic Forecasting and Policy** N. Carnot,V. Koen,B. Tissot,2011-07-26 *Economic Forecasting* provides a comprehensive overview of macroeconomic forecasting The focus is first on a wide range of theories as well as empirical methods business cycle analysis time series methods macroeconomic models medium and long run projections fiscal and financial forecasts and sectoral forecasting Post-Keynesian Growth Theory Lavoie, Marc,2022-02-17 *Post Keynesian Growth Theory* is a collection of 18 articles by Marc Lavoie published between 1995 and 2020 with an extended foreword by Eckhard Hein Marc Lavoie s introduction recalls how he became attracted to the post Keynesian theory of growth more than 45 years ago and explains how and why this book came about **IMF Staff Papers, Volume 57, No. 1** International Monetary Fund. Research Dept.,2010-03-26 Do highly indebted countries suffer from a debt overhang Can debt relief foster their growth rates To answer these important questions this article looks at how the debt growth relation varies with indebtedness levels as well as with the quality of policies and institutions in a panel of developing countries The main findings are that in countries with good policies and institutions there is evidence of debt overhang when the net present value of debt rises above 20 25 percent of GDP however debt becomes irrelevant above 70 80 percent In countries with bad policies and institutions thresholds appear to be lower but the evidence of debt overhang is weaker and we cannot rule out that debt is always irrelevant Indeed in such countries as well as in countries with high indebtedness levels investment does not depend on debt levels The analysis suggests that not all countries are likely to profit from debt relief and thus that a one size fits all debt relief approach might not be the most appropriate one *FX Intervention in the New Keynesian Model*

Zineddine Alla, Mr. Raphael A Espinoza, Mr. Atish R. Ghosh, 2017-09-29 We develop an open economy New Keynesian Model with foreign exchange intervention in the presence of a financial accelerator mechanism We obtain closed form solutions for the optimal interest rate policy and FX intervention under discretionary policy in the face of shocks to risk appetite in international capital markets The solution shows that FX intervention can help reduce the volatility of the economy and mitigate the welfare losses associated with such shocks We also show that when the financial accelerator is strong the risk of multiple equilibria self fulfilling currency and inflation movements is high We determine the conditions under which indeterminacy can occur and highlight how the use of FX intervention reinforces the central bank's credibility and limits the risk of multiple equilibria *IMF Staff Papers, Volume 50, No. 1*

Mr. Robert P. Flood, 2003-04-17 Forty years ago Marcus Fleming and Robert Mundell developed independent models of macroeconomic policy in open economies Why do we link the two and why do we call the result the Mundell Fleming rather than Fleming Mundell model **Higher education for**

public good Noluthando S. Matsiliza, 2023-03-01 This book focuses on the knowledge area of higher education governance organisational dynamics leadership and decolonisation We have observed that governance discourse has been excluded in debates that concern the public good The construct of public good seeks to support higher education that does not support a capitalist view of profit making arguably to respond to societal demands and needs such as developmental efforts through academic functions Higher Education focuses on interconnected multi disciplinary constructs intending to provide services for the public good The issue of public good is an interesting construct that puts universities on the spot since they are expected to be responsive to environmental changes and stakeholder needs through the functioning of accountable governance structures These governance structures are compelled to comply with policy demands within external and internal environmental factors This experience has exposed universities to systematic challenges that are local regional and global and which forces them to adapt while serving stakeholders and society This book will also interrogate the governance of South African public universities in the post decolonisation era and new demands from stakeholders **New Facets of**

Economic Complexity in Modern Financial Markets Catherine Kyrtsov, Didier Sornette, Chris Adcock, 2020-06-04 The book is motivated by the disruptions introduced by the financial crisis and the many attempts that have followed to propose new ideas and remedies Assembling contributions by authors from a variety of backgrounds this collection illustrates the potentials resulting from the marriage of financial economics complexity theory and an out of equilibrium view of the economic world Challenging the traditional hypotheses that lie behind financial market functioning new evidence is provided about the hidden factors fuelling bubbles the impact of agents heterogeneity the importance of endogeneity in the information transmission mechanism the dynamics of herding the sources of volatility the portfolio optimization techniques the financial innovation and the trend identification in a nonlinear time series framework Presenting the advances made in financial market analysis and putting emphasis on nonlinear dynamics this book suggests interdisciplinary methodologies for

Yang,Luis-Felipe Zanna,2015-12-30 Despite the voluminous literature on fiscal policy very few papers focus on low income countries LICs This paper develops a new Keynesian small open economy model to show analytically and through simulations that some of the prevalent features of LICs different types of financing including aid the marginal efficiency of public investment and the degree of home bias play a key role in determining the effects of fiscal policy and related multipliers in these countries External financing like aid increases the resource envelope of the economy mitigating the private sector crowding out effects of government spending and pushing up the output multiplier The same external financing however tends to appreciate the real exchange rate and as a result traded output can respond quite negatively reducing the overall output multiplier Although capital scarcity implies high returns to public capital in LICs declines in public investment efficiency can substantially dampen the output multiplier Since LICs often import substantial amounts of goods public investment may not be as effective in stimulating domestic production in the short run
